1. INTRODUCTION

In 1996, Congress passed into law the Health Insurance Portability and Accountability Act (HIPAA). This Act directs the federal government to adopt national electronic standards for automated transfer of certain health care data between health care payers, plans, and providers. Now that these standards are in place, the Veterans Health Administration (VHA) will submit claims containing the required standard data content to all payers accepting electronic data interchange (EDI).

1.1. Revenue Process

The overall patient billing revenue process for the VHA is summarized in the table below:

Revenue Cycle				
Intake	UR	Billing	Collection	UR
Patient Registration Insurance Identification Insurance Verification	Pre-certification & Certification Continued Stay	Documentation EDI Bill Generation MRA Claim status messages	Establish Receivables A/R Follow-up Lockbox Collection Correspondence	Appeals

During the Intake phase, the patient is registered. Insurance information is identified and/or verified.

In the Utilization Review phase, the patient is pre-certified and certified, and continued stay reviews are performed.

In the Billing phase, the patient encounter is documented and coded. An electronic data interchange (EDI) bill and/or Medicare Remittance Advice (MRA) request is generated and sent to the payer. Claim status messages include information that appears on the Claims Status Awaiting Resolution (CSA) report.

During the Collections phase, establishment of receivables, accounts receivables follow-up, lockbox, and any collection correspondence take place.

Another Utilization Review can take place if there are any appeals.

EDI Billing provides the VHA with the capability to submit Institutional and Professional claims electronically as 837 Health Care Claim transmissions, rather than printing and mailing claims from each facility.

1.2. Critical EDI Process Terms

- **835 Health Care Claim Payment/Advice** - The HIPAA adopted standard for electronic remittance advice to report the processing of all claim types (including retail pharmacy). The term “835” represents the data set that is sent from health plans to health care providers and contains detailed information about the processing of the claim. This includes payment information and reduction or rejection reasons. All health plans are required to use the same explanation of benefit codes (adjustment reason codes) and adhere to very specific reporting requirements. The term “835” is used interchangeably with electronic remittance advice (ERA) and Medicare remittance advice (MRA).
- **837 Health Care Claim** - The HIPAA adopted standard for electronic submission of hospital, outpatient and dental claims. The term “837” represents the data set that is sent from health care providers to insurance companies (payers). The 837 standard includes the data required for coordination of benefits and is used for primary and secondary payer claims submission. The term “837” is used interchangeably with electronic claim.
- **277 Claim Status Messages** – Electronic messages returned to the VAMC providing status information on a claim from the Financial Service Center (FSC) in Austin, Texas. These messages can originate at FSC, at the payer or at the clearinghouse.
- **Clearinghouse** - A company that provides batch and real-time transaction processing services and connectivity to payers or providers. Transactions include insurance eligibility verification, claims submission processing, electronic remittance processing and payment posting for electronic claims.
- **eClaim** - A claim that is transmitted electronically to FSC from the VHA.
- **EDI – Electronic Data Interchange (EDI)** is the process of transacting business by exchanging data electronically. It includes submitting claims electronically (paperless claims processing), as well as electronic funds transfer and electronic inquiry for claim status and patient eligibility.
- **EOB – An Explanation of Benefits (EOB)** reports the disposition of an individual claim. Many EOBs may be contained within a single 835 Electronic Remittance Advice (ERA) file.
- **ePayer** - Payer that accepts electronic claims from the clearinghouse.
- **Fiscal Intermediary** – A fiscal intermediary performs services on behalf of health care payers. These services include claim adjudication, reimbursement and collections. Trailblazer Health Enterprises is an example of a fiscal intermediary that acts on behalf of Medicare. Trailblazer receives claims from the VA in the form of an 837 file and then adjudicates the claims to create a MRA 835 file.
- **FSC – The Financial Service Center (Austin, Texas)** receives 837 Health Care Claim transmissions from VistA and transmits this data to the clearinghouse. FSC also receives error/informational messages and 835 Health Care Claim Payment/Advice transmissions from the clearinghouse and transmits this data to VistA.

- **HIPAA** – In 1996 Congress passed into law the Health Insurance Portability and Accountability Act (HIPAA). This Act is comprised of two major legislative actions: Health Insurance Reform and Administrative Simplification. The Administrative Simplification provisions of HIPAA direct the federal government to adopt national electronic standards for automated transfer of certain health care data between health care payers, plans, and providers. This will enable the entire health care industry to communicate electronic data using a single set of standards thus eliminating all non-standard formats currently in use. Once these standards are in place, a health care provider will be able to submit a standard transaction for eligibility, authorization, referrals, claims, or attachments containing the same standard data content to any health plan. This will "simplify" many clinical, billing, and other financial applications and reduce costs.
- **ASC X12 (also known as ANSI ASC X12)** – This is the official designation of the U.S. national standards body for the development and maintenance of Electronic Data Interchange (EDI) standards. The HIPAA transactions are based upon these standards.

1.3. EDI Process Flow

The above flowchart (EDI Process Flow) represents the path electronic claims follow. The objective of electronic billing is to submit completely correct claims. Claims sent electronically reach the payer faster, are processed faster, and are paid faster than claims submitted to the payer on paper via the mail.

From the user's desktop, the claim goes to the FSC in Austin, TX as a VistA Mailman message. The FSC translates the claim into the HIPAA 837 Health Care Claim format and forwards it to the clearinghouse.

From the clearinghouse, the arrow pointing upwards represents the path claims travel if they can be submitted electronically to the payer. If the clearinghouse does not have an electronic connection with a payer or if specific claims must be submitted on paper, the claim is printed at Express Bill and mailed to the payers.

Electronic claims status messages from ePayers return to the VAMCs along the same path. Payers receiving printed claims do not return electronic messages. However, the clearinghouse will return a message indicating that the claim was printed and mailed.

Different electronic edits are in place at each transmission point that may initiate the sending of a claims status message. Claim status messages returned by the clearinghouse and/or payer will provide information on a specific claim. There is no standard content for messages. The information contained within a claim status message varies from payer to payer.

2. INSURANCE COMPANY SET-UP

The most common cause of claims rejection is the improper setup of the insurance company and/or provider IDs within VistA. With EDI Billing, there are fields in an 837 claim transmission that are auto-populated with the data defined in VistA. This information must be accurate to generate a clean electronic claim.

2.1. Insurance Company Setup

2.1.1 Activate New Payer To Transmit eClaims

The typical business process for setting up new payers is:

1. The Insurance Verification Office initially enters a new payer into VistA.
2. Lists of new payers are printed and provided to the medical center's billing office on a regular basis (daily/weekly). Some individuals become members of the IB New Insurance mail group so they receive e-mail bulletins whenever a new insurance policy is added to VistA.
3. Billing staff use The Insurance Company Editor to define Provider IDs: Type of Coverage; Electronic Insurance Type and Electronic Transmit? by Insurance Company. The Profession/Institutional Payer Primary and Secondary IDs are also defined using the Insurance Company Editor.
4. Billing staff use The Insurance Company Editor to specify the correct Electronic Plan Type for each Insurance Plan.

Selecting the correct electronic plan type is important. This field may determine which provider IDs are transmitted and/or printed. Choosing the wrong electronic plan type for an Insurance Plan could result in claims being rejected by the clearinghouse or by the payer.

2.1.1.1 Define EDI settings for a Blue Cross/Blue (BC/BS) Shield Insurance Company.

Step	Procedure
1	At the Billing Parameters screen in the Insurance Company Editor, enter BP – Billing/EDI Param.

```

```

Step	Procedure
	<i>Patch IB*2.0*320 added a new security key, IB EDI INSURANCE EDIT. A user must hold this key to edit the EDI-Transmit, EDI Prof Payer ID; EDI Inst Payer ID and EDI-Insurance Type fields.</i>
2	At the EDI - Transmit? : prompt, enter 1 to change the field to YES-LIVE .
3	At the EDI - Inst Payer Primary ID : prompt, enter the Payer Primary ID

	provided by the clearinghouse.
	<i>When editing the Payer Primary ID fields for a commercial payer, (not BC/BS) these fields may be left blank. The clearinghouse will try to match the Vista payer name and address to an entry in its Payer Lookup Table and auto-populate these fields. Payer ID numbers are available at https://access.emdeon.com/PayerLists/.</i>
4	At the EDI - 1ST Inst Payer Sec. ID Qualifier : prompt, press ENTER to leave field blank.
	<i>Patch IB*2*371 added the ability to define Payer Secondary IDs. They are unusual and should only be populated if the clearing house or CBO provides you with a secondary ID number.</i>
5	At the EDI - Prof Payer Primary ID : prompt, enter the Payer Primary ID provided by the clearinghouse.
6	At the EDI - 1ST Prof Payer Sec. ID Qualifier : prompt, press ENTER to leave field blank.
7	At the EDI - Insurance Type : prompt, enter ?? to see the choices available. For this example, select Group Policy . This will result in a checkmark in the GROUP insurance box of the CMS-1500/BOX 1.
8	Press the ENTER key until the Billing Parameters screen reappears.
	<i>When Patch IB*2*371 is loaded, the patch will automatically define a Professional Payer Secondary for Medicare WNR that will have a Qualifier = Payer ID Number and an ID = VA plus the site's ID.</i>

```

EDI - Transmit?: YES-LIVE//
EDI - Inst Payer Primary ID: 12M61//
EDI - 1ST Inst Payer Sec. ID Qualifier:
EDI - Prof Payer Primary ID: SMTX1//
EDI - 1ST Prof Payer Sec. ID Qualifier: PAYER ID #//
EDI - 1ST Prof Payer Sec. ID: VA442//

```

	<i>Patch IB*2*432 added the ability to define whether or not the payer will accept MRA secondary claims electronically when the primary claim was never sent to Medicare and no MRA was ever received. When the patch is loaded, this field will be set to '0' which means that the claims will be transmitted electronically unless this field is changed by the site. This only pertains to claims that cannot be submitted thru MRA due to the service being on the Payer Excluded Service list.</i>
	<i>Patch IB*2*432 added the ability to define whether or not the payer will accept MRA secondary claims electronically when the primary claim was never sent to Medicare and no MRA was ever received. When the patch is loaded, this field will be set to '0' which means that the claims will be transmitted electronically unless this field is changed by the site.</i>

```

Step	Procedure
4	For this scenario NO is typed in for the Do you wish to change this plan to an Individual Plan? field.
5	Continue to press the ENTER key until Electronic Plan Type field is displayed.
6	Type in the appropriate code and press the ENTER key. The chosen plan will be displayed. In this example BL has been selected.
	<i>Selecting the correct electronic plan type is critical. The electronic plan type for BC/BS payers should usually be set to BL - not commercial. Choosing the wrong electronic plan type for a Group Insurance Plan could result in claims being rejected by the clearinghouse or by the payer.</i>
	<i>Note: Patch IB*2*432 added the ability to define two additional types of Electronic Plan Type: 17 – Dental and FI – Federal Employee Plan.</i>
	<i>Note: Patch IB*2*436 added the ability to define an additional plan type for MediGap F and G plans . MEDIGAP (SUPPL - COINS, DED, PART B EXC)</i>

```

This plan is currently defined as a Group Plan.
Do you wish to change this plan to an Individual Plan? NO
No change was made.

2.1.2 Activate Existing Commercial Payer To Transmit eClaims

To activate an existing payer to receive electronic claims, use the Billing Parameters screen in the Insurance Company Editor. The **EDI - Transmit?** field on this screen must be set to **YES-LIVE**. In the Live mode, bills are automatically sent electronically and cannot be printed until the confirmation of a receipt message has been received from the FSC.

Follow these steps to change the **EDI - Transmit?** Field:

Step	Procedure
1	On the Billing Parameters screen in the Insurance Company Editor, type BP and press the ENTER key.

```

2.1.3 Activate Existing Payer To Test Primary Blue Cross/Blue Shield eClaims

Blue Cross and Blue Shield payers require the submission of test claims before accepting live claims. A member of the eBilling Team will contact someone at the facility to coordinate this testing.

When testing the electronic submission of secondary claims using the RCB – View/Resubmit Claims-Live or Test, it is not necessary to change Electronic Transmit? to YES-TEST nor is it necessary to print and mail claims sent using RCB.

If an eBilling Team member, request claims submitted electronically as a Live test enable the BC/BS payer to receive primary claims electronically but in a testing mode, use the Billing Parameters screen in the Insurance Company Editor. The **EDI - Transmit?** field on this screen must be set to **YES-TEST**. In testing mode, bills are automatically sent electronically and cannot be printed until the confirmation of receipt message has been received from the FSC.

The following steps show you how to change the **Electronic Transmit?** field:

Step	Procedure
1	On the Billing Parameters screen in the Insurance Company Editor type BP and press the ENTER key.

3. PAY-TO PROVIDER(S) SET-UP

Each VA database can have one or more Pay-to Providers. Each VA database must have at least one Pay-to Provider. A Pay-to Provider is the entity which is seeking payment for a claim (who will receive the payment). The Pay-to Provider does not have to have a physical location. It can have a street address or a Post Office Box number.

3.1. Define Default Pay-to Provider

Step	Procedure
1	Access the option SITE→MCCR Site Parameter Display/Edit.
2	From the MCCR Site Parameters screen, enter the action, IB Site Parameters.
3	Press ENTER for Next Screen until Page 2 is displayed.
4	From the IB Site Parameters screen, enter the action, EP Edit Set.
5	Enter the number 10.
6	From the Pay-to Providers screen, enter the action, AP Add Provider.
7	From the Enter Pay-to Provider: prompt, enter CHEYENNE VAMC for this example.
	<i>Note: A Pay-to Provider should be a VAMC level facility with a valid NPI. The Pay-to Provider can be an institution outside your own database. Example: VAMC A could process payments for services provided by VAMC B.</i>
8	At the Are you adding 'CHEYENNE VAMC' as a new PAY-TO PROVIDERS (the 1ST for this IB SITE PARAMETERS)? No// prompt, enter YES for this example.
9	At the Pay-to Provider Name prompt, press ENTER to accept the default name from the Institution file.
10	At the Pay-to Provider Address Line 1 prompt; press ENTER to accept the default address from the Institution file.
11	At the Pay-to Provider Address Line 2 prompt; press ENTER to accept the default address from the Institution file.
12	At the Pay-to Provider City prompt; press ENTER to accept the default City from the Institution file.
13	At the Pay-to Provider State prompt; press ENTER to accept the default State from the Institution file.
14	At the Pay-to Provider Zip Code prompt; press ENTER to accept the default ZIP from the Institution file.
15	At the Pay-to Provider Phone Number prompt; enter the Phone Number that a payer should use to contact the site.
16	At the Pay-to Provider Federal Tax ID Number prompt; press ENTER to accept the default Tax ID.
	<i>Note: There will be a default Tax ID only when the institution selected as the Pay-to Provider is the same as the main division in the site's database. This is taken from the IB Site Parameters.</i>

Do not add your site's Tax ID if the Pay-to Provider is another VAMC. Make sure to get and enter the other site's Tax ID.

Note: A Pay-to Provider does not have to have an actual street address. You may enter a P.O. Box as an address.

```

4. PROVIDER ID SET-UP

Payers require the use of a variety of provider identifiers on claims submitted for adjudication. Printed claim forms have boxes where these IDs can be printed.

The general term, Provider ID, can refer to an ID that belongs to a human being such as an Attending physician or it can refer to an ID that belongs to an organization that provides healthcare services to a veteran such as a VAMC or an outside laboratory. Both VA and non-VA people and organizations have IDs.

IDs have qualifiers that identify what type of ID is being transmitted. An Attending physician's primary ID is his/her Social Security Number (SSN). This SSN is transmitted with a qualifier (34) which indicates that this number is an SSN. A Blue Cross ID is transmitted with a qualifier (1A) which indicates that this number is a Blue Cross number. Appendix C has a list of qualifiers and which ones can be transmitted in which 837 records.

The NPI (National Provider Identifier) is a Health Insurance Portability and Accountability Act of 1996 (HIPAA) requirement with a usage requirement date beginning May 23, 2007. It is transmitted on 837 records along with treating specialty taxonomies from the National Uniform Claims Committee (NUCC) published code list.

Patch IB*2.0*343 added the ability to define the National Provider Identifier (NPI) and Taxonomy Codes for the VAMC, Non-VA facilities and both VA and Non-VA human providers.

Patches IB*2.0*348 and 349 added the ability to print the NPI on the new UB-04 and CMS-1500 claim forms.

After Patch IB*2*436, old claims can be reprinted locally for legal purposes and sent to Regional Counsel even though the original claim was created prior to the requirement for providers to have an assigned NPI. A legal claim is defined as having a Billing Rate Type of "NO FAULT INS", "WORKERS' COMP", or "TORT FEASOR".

When Patch IB*2.0*432 is loaded, the Social Security Number (SSN) will no longer be transmitted in the 837 records as a human providers Primary ID. The NPI will be transmitted in the 837 Health Care Claim transmission as the Primary ID for both human providers and organizational providers such as the Billing Provider.

The HIPAA 837 transaction set includes a number of segments in which to transmit multiple IDs and qualifiers for a single claim. The list below indicates the VistA record name, the type of information being transmitted, the maximum number of IDs that can go in that record for one claim and if the IDs will print on a paper claim (P), transmit electronically (T), or do both (B).

Segment	Type of ID	Max # of IDs	(P)rint (T)ransmit
---------	------------	--------------	-----------------------

			(B)oth
PRV:9	Billing Provider Primary ID	1	B
PRV1:6	Pay-to Provider Primary ID	1	T
CI1A:2-17	Billing Provider Secondary IDs	8	B
OPR1	Attending, Other Operating or Operating Physician Primary ID	1/Physician	B

4.2. Pay-to Provider IDs

4.2.1 Define the Pay-to Provider Primary ID/NPI

The Pay-to Provider NPI will not be entered or maintained by Billing personnel. The Pay-to Provider NPI is retrieved from the Institution file (#4).

Beginning with Patch IB*2*432, the Pay-to Provider Primary ID is the NPI number of the site defined as the Pay-to Provider. The Federal Tax Number is defined when the Pay-to Provider is defined but will no longer be used as the Primary ID. Refer to **Section 3.1**.

4.2.2 Define the Pay-to Provider Secondary IDs

With Patch IB*2*400, the CI1B segment was added to the outbound 837 claim transmission map to transmit Pay-to Provider Secondary IDs if the need should arise in the future. The CI1B segment was removed with Patch IB*2*432.

4.3. Billing Provider IDs

The Billing Provider Primary ID and the Billing Provider Secondary IDs are IDs which identify the facility at which the patient service was provided. This is a facility with a physical location (street address). The Billing Provider on a claim must be one of the following Facility Types which have been assigned NPI numbers:

- CBOC – Community Based Outpatient Clinic
- HCS – Health Care System
- M&ROC – Medical and Regional Office Center
- OC – Outpatient Clinic (Independent)
- OPC – Out Patient Clinic
- PHARM – Pharmacy
- VAMC – VA Medical Center
- RO-OC – Regional Office – Outpatient Clinic

When care is provided at any other facility type (i.e. a mobile unit), the Billing Provider will be the Parent facility as defined in the Institution file (#4) and the mobile unit will become the Service Facility.

With Patch IB*2*432, the name for the Billing Provider on a claim will be extracted from the new Billing Facility Name field (#200) of the Institution file (#4). If this field is not populated, the IB software will continue to extract the name from the .01 field of the Institution file.

4.3.1 Define the Billing Provider Primary ID/NPI

For all claims generated by the VA, the Billing Provider Secondary ID is the Federal Tax Number of the site. Once defined, the IB software will automatically assign this ID to a claim.

The Billing Provider NPI is the Billing Provider Primary ID. The Billing Provider NPI is defined in the Institution file. Once defined, the IB software will automatically assign this ID to a claim

The VA Billing Provider NPI and Taxonomy Code will not be entered or maintained by Billing personnel. Users may change the default Billing Provider taxonomy code for a claim but users may not change the Billing Provider NPI.

Step	Procedure
1	Access the option SITE→MCCR Site Parameter Display/Edit.
2	From the MCCR Site Parameters screen, enter the action, IB Site Parameters.
3	Press ENTER for Next Screen until Page 2 is displayed.
4	From the IB Site Parameters screen , enter the action, EP Edit Set.
5	Enter the number 9.
6	At the Federal Tax Number prompt, enter the site's Federal Tax Number.

```

4.3.2 Define the Billing Provider Secondary IDs

The Billing Provider Secondary IDs are IDs and Qualifiers that are provided to a site by the insurance company. There can be a total of eight Billing Provider Secondary IDs per claim. The first ID is calculated by the system and used by the clearinghouse to sort claims. The second ID is always the site's Federal Tax ID and the remaining six IDs must be defined by the IB staff if required.

Users may define one Billing Provider Secondary ID for a CMS-1500 and another for a UB-04 for the main division. If no other Billing Provider Secondary IDs are defined, these two IDs will be the default IDs for all claims.

Billing Provider Secondary IDs can be defined by Division, Form Type and Care Unit.

4.3.2.1 Define Default Billing Provider Secondary IDs by Form Type

Step	Procedure
1	Access the option MCCR SYSTEM DEFINITION MENU→Insurance Company Entry/Edit.
2	At the Select Insurance Company Name: prompt, enter Blue Cross of California for this example.
3	From the Insurance Company Editor screen, enter the action, ID Prov IDs/ID Param.
4	From the Billing Provider IDs screen , enter the action Add an ID.
5	At the Define Billing Provider Secondary IDs by Care Units? No// prompt, press ENTER to accept the default of No .
6	At the Division prompt, accept the default for the main Division.
7	At the ID Qualifier: Electronic Plan Type// prompt, enter Blue Shield to override the default value for this example.
	<i>Note: The default value for the Billing Provider Secondary ID Qualifier is still based upon the Electronic Plan Type of the patient's insurance plan. Users now have the ability to override this default.</i>
8	At the Form Type prompt, enter CMS-1500 for this example.
9	At the Billing Provider Secondary ID prompt, enter the ID XXXXXXXX1B for this example.
10	Repeat these steps for the Form Type = UB-04 , Qualifier = Blue Cross and ID = XXXXXXXX1A .
	<i>Note: Beginning with Patch IB*2*432, if no Billing Provider Secondary IDs are defined, the Federal Tax ID will no longer be used as a default value.</i>

```

4.3.2.2 Define Billing Provider Secondary IDs by Division and Form Type

If an insurance company requires different Billing Provider Secondary IDs for each division, then users must define more than just the default IDs.

Step	Procedure
1	Access the option MCCR SYSTEM DEFINITION MENU→Insurance Company Entry/Edit.
2	At the Select Insurance Company Name: prompt, enter Blue Cross of California for this example.
3	From the Insurance Company Editor screen, enter the action, ID Prov IDs/ID Param.
4	From the Billing Provider IDs screen, enter the action Add an ID.
5	At the Define Billing Provider Secondary IDs by Care Units? No// prompt, press ENTER to accept the default of No.
6	At the Division prompt, override the default for the main division by entering the name of another division, Remote Clinic for this example.
7	At the ID Qualifier: Electronic Plan Type// prompt, enter Blue Shield to override the default value for this example.
8	At the Form Type prompt, enter CMS-1500 for this example.
9	At the Billing Provider Secondary ID prompt, enter the ID 1XXXXX1B for this example.
10	Repeat these steps for the Form Type = UB-04 , Qualifier = Blue Cross and ID = 1XXXXX1A.
	<i>Note: Users may repeat these steps to define different Billing Provider Secondary IDs for each division if required by the insurance company.</i>

```

If users want a default Billing Provider Secondary ID to populate Billing Screen 3, define a default ID for the division and define IDs for the division and specific care units. Users will have the ability to either accept the default ID or override it with one of the Care Unit IDs during the creation of a claim.

4.3.2.4 Define Additional Billing Provider Secondary IDs by Division and Form Type

In addition to the Billing Provider Secondary ID that appears on Billing Screen 3 for each insurance company on the bill, there can be five additional Billing Provider Secondary IDs that will be transmitted with claims for an insurance company.

Prior to Patch IB*2.0*320, the IDs defined in IB Site Parameters, Section 14 and Provider ID Maintenance, Number 3, were transmitted with all claims to all payers. These options for defining IDs were removed with Patch IB*2.0*320.

If an insurance company requires additional Billing Provider Secondary IDs, users can define them in Insurance Company Entry/Edit.

Step	Procedure
1	Access the option MCCR SYSTEM DEFINITION MENU→Insurance Company Entry/Edit.
2	At the Select Insurance Company Name: prompt, enter Blue Cross of California for this example.
3	From the Insurance Company Editor screen, enter the action, ID Prov IDs/ID Param.
4	From the Billing Provider IDs screen, enter the action Additional IDs.
5	From the Billing Provider IDs – Additional Billing Provider Sec. IDs screen,

	enter the action Add an ID .
6	At the ID Qualifier : prompt, enter Medicare for this example.
	<i>Note: There cannot be two Billing Provider Secondary IDs on a claim with the same Qualifier. If you enter an ID with the same Qualifier here as one defined under Billing Provider Secondary IDs for the Division on a claim, the Additional Billing Provider Secondary ID with the same Qualifier will not be transmitted on the claim.</i>
7	At the Form Type prompt, enter CMS-1500 for this example.
9	At the Billing Provider Secondary ID prompt, enter the ID 14XXXX1C for this example.
10	Repeat these steps for the Form Type = UB-04 , Qualifier = Medicare , ID = 14XXXX1C .
	<i>Note: Users may repeat these steps to define multiple additional Billing Provider Secondary IDs if required by the insurance company.</i>

```

```

4.4. Service Facility IDs (Laboratory or Facility IDs)

The 837 claims transmission has records that contain Service Facility data like the name and address of a facility and primary and secondary IDs for that facility. Often this is an outside, non-VA facility. These IDs are called the Laboratory or Facility Primary ID and the Laboratory or Facility Secondary IDs.

If there is a non-VA facility on a claim because a veteran received care at an outside laboratory or a private hospital or clinic, an insurance company may require the claim to contain primary and secondary Laboratory or Facility IDs for the organization that provided the care.

If there is not an outside facility on a claim, but the care was provided by the VA at a facility such as a Mobile clinic, an insurance company may require the claim to contain primary and secondary Laboratory or Facility IDs for the clinic.

Patch IB*2.0*320 provided enhancements to allow users to more easily define Laboratory or Facility IDs for the VA or non-VA.

Beginning with Patches IB*2.0*348 and 349, the Service Facility NPI will be printed on locally printed CMS-1500 claims.

Beginning with Patch IB*2.0*400, the Service Facility loop will not be populated if the care was provided at a VA location that has an NPI such as a CBOC, VAMC or Pharmacy.

The non-VA Service Facility NPI and Taxonomy Code will be entered and maintained by Billing personnel.

4.4.1 Define Non-VA Laboratory or Facility Primary IDs/NPI

For outside, non-VA facilities such as an independent laboratory, the Laboratory or Facility Primary ID should be the entity's NPI.

In addition to the Federal Tax ID, an NPI and one or more Taxonomy Codes can be defined for outside, non-VA facilities.

Step	Procedure
1	Access the option MCCR SYSTEM DEFINITION MENU→Provider ID Maintenance.
2	At the Select Provider ID Maintenance Option: prompt, enter NF for Non-VA Facility .
3	At the Select a NON/Other VA Provider: prompt, enter IB Outside Facility for this example.
4	From the Non-VA Lab or Facility Info screen , enter the action FI for Lab/Facility Info.
5	At the Street Address: prompt, enter 123 Westbend Street for this example.

6	At the Street Address Line 2: prompt, press ENTER to leave blank.
7	At the City prompt, enter Long Beach for this example.
8	At the State: prompt, enter California for this example.
9	At the Zip Code prompt, enter 92060 for this example.
10	At the Contact Name: prompt, enter IB,CONTACT O for this example.
11	At the Contact Phone Number: prompt, enter 703-333-3333 for this example.
12	At the Contact Phone Extension: prompt, enter 123478 .
13	At the ID Qualifier: prompt, press ENTER to accept the default.
14	At the Lab or Facility Primary ID: prompt, enter 11111112 .
15	At the X12 Type of Facility: prompt, enter FA - Facility for this example.
	<i>With Patch IB*2*371, FA will be sent as the Type of Facility on all institutional claims regardless of what is defined. HIPAA only allows FA on institutional claims.</i>
16	At the Mammography Certification Number: prompt, press ENTER to leave it blank. If you know the Mammography number you can enter it here.
17	At the NPI: prompt, enter XXXXXXXXXX for this example.
18	At the Select Taxonomy Code: prompt, enter 954 for this example.
19	At the OK? Prompt, press ENTER to accept the default.
20	At the Are you adding 'General Acute Care Hospital' as a new TAXONOMY CODE (the 1ST for this IB NON/OTHER VA BILLING PROVIDER)? No// prompt, enter Yes .
21	At the Primary Code: prompt, enter Yes for this example.
22	At the Status: prompt, enter Active .
23	At the Select Taxonomy Code: prompt, press ENTER .
	<i>Note: With Patch IB*2*432, the ability to define the name of a contact person at the outside facility and the telephone number for that person will be available to users.</i>

Select Action: Quit//					

4.4.3 Define VA Laboratory or Facility Primary IDs/NPI

The VA Service Facility NPI and Taxonomy Code will not be entered or maintained by Billing personnel. Beginning with Patch IB*2.0*400, only those VA locations for which no NPI numbers were obtained, (i.e. MORC, CMOP) will populate the Service Facility. Because of this, there will usually be no VA Laboratory or Facility NPI in the 837 claim transmission.

4.4.4 Define VA Laboratory or Facility Secondary IDs

For each insurance company, users can define multiple Laboratory or Facility Secondary IDs for the VA by division and form type.

Step	Procedure
1	Access the option Patient Insurance Menu ... → Insurance Company Entry/Edit.
2	At the Select Insurance Company Name: prompt, enter Blue Cross of California for this example.
3	From the Insurance Company Editor screen, enter the action, ID Prov IDs/ID Parameters.
4	From the Billing Provider IDs screen, enter the action VA-Lab/Facility IDs.
5	From the VA-Lab/Facility IDs screen, enter the action Add an ID.
6	At the Division prompt, accept the default for the main Division.
7	At the ID Qualifier: prompt, enter Blue Shield for this example.
8	At the Form Type prompt, enter CMS-1500 for this example.
9	At the VA Lab or Facility Secondary ID prompt, enter the ID 1212XX1B for this example.
10	Repeat these steps for the Form Type = UB-04 , Qualifier = Blue Cross and ID = 1212XX1A.
11	Repeat these steps for the Form Type = UB-04 , Qualifier = Commercial and ID = 1313XXG2.
	<i>Note: Users may repeat these steps to define more Laboratory or Facility Secondary IDs. A maximum of 5 Laboratory or Facility Secondary IDs can be defined per division, form and insurance company.</i>

4.5. Attending, Operating and Other Physicians and Rendering, Referring and Supervising Providers

A physician can appear on a UB-04 claim form as an Attending, Operating or Other Operating Physician. Beginning with Patch IB*2*432, Rendering and Referring Providers can also be added to an Institutional claim. A health care provider (physician, nurse, physical therapist, etc.) can appear on a 1500 claim form as a Rendering, Referring or Supervising Provider.

All of these health care providers have a primary ID. Their primary ID is their NPI. These physicians/providers can also have multiple secondary IDs that are either their own IDs or IDs provided by an insurance company.

The VA Physician's or Provider's NPI is stored in the New Person file. This file is not maintained by Billing personnel. The Non-VA Physician's or Provider's NPI is defined in Provider ID Maintenance.

A human provider's NPI is transmitted in the 837 Health Care Claim transmission and since Patches IB*2.0*348 and 349, it is printed on locally printed claim forms.

All of these types of health care providers can be either VA or non-VA employees.

4.5.1 Define a VA Physician/Provider's Primary ID/NPI

The VA Physician's or Provider's SSN and NPI are stored in the New Person file (#200). These IDs should be entered when the user is originally added to the system. The provider's Taxonomy code is entered along with the Person Class.

*Note: Beginning with Patch IB*2*432, SSNs will continue to be defined in the New Person file for VA Providers and users may continue to define SSNs as secondary IDs for non-VA providers but VistA will no longer transmit SSNs as human providers' Primary IDs. There will no longer be a edit check in Enter/Edit Billing Information to insure a provider's SSN is available.*

4.5.2 Define a VA Physician/Provider's Secondary IDs

Physicians and Providers can have both their own ID, such as a state medical license, or an ID provided by an insurance company.

4.5.2.1 Define a VA Physician/Provider's Own Secondary IDs

Physicians and other health care providers are assigned IDs that identify them. These IDs include an NPI which serves as their primary ID. In addition to their NPI, they may also have one or more of the following types of secondary IDs:

- OB - State License Number
- EI – EIN
- SY - SSN (VA SSNs are defined in the New Person file)
- X5 – State Industrial Accident Provider Number
- 1G – UPIN Number

Step	Procedure
1	Access the option MCCR SYSTEM DEFINITION MENU→Provider ID Maintenance .
2	At the Select Provider ID Maintenance Option: prompt, enter PO for Provider Own IDs.
3	At the (V)A or (N)on-VA provider: V//: prompt, press ENTER to accept the default.
4	At the Select V.A. PROVIDER NAME: prompt, enter IB,DOCTOR 1 .
	<i>This screen can be accessed through the MCCR System Definition Menu. Users must hold the IB PROVIDER EDIT security key to access this option.</i>

4.5.2.2 Define a VA Physician/Provider's Insurance Company Secondary IDs

Physicians and other health care providers can be assigned secondary IDs by insurance companies. Some insurance companies assign one ID to be used by every physician/provider at a site. Other insurance companies assign each physician/provider his or her own ID. In addition to their NPI, they may also have one or more of the following types of secondary IDs:

- 1A - Blue Cross
- 1B - Blue Shield
- 1C - Medicare
- 1H - CHAMPUS
- G2 - Commercial
- LU - Location #
- N5 - Provider Plan Network
- 1G - UPIN

Step	Procedure
1	Access the option MCCR SYSTEM DEFINITION MENU→Provider ID Maintenance.
2	At the Select Provider ID Maintenance Option: prompt, enter PI for Provider Insurance IDs.
3	At the (V)A or (N)on-VA provider: V//: prompt, press ENTER to accept the default.
4	At the Select V.A. PROVIDER NAME: prompt, enter IB,DOCTOR 1.
5	At the Select Insurance Co.: prompt, enter Blue Cross of California for this example.

4.5.3 Define non-VA Physician and Provider Primary IDs/NPI

Non-VA physicians and other health care providers are not VistA users so they are not normally in the New Person file unless they are also current/previous VA employees. Even if a physician/provider functions in both a VA and non-VA role, the SSN, NPI and Taxonomy Code of a non-VA Physician/Provider must be entered by Billing personnel using Provider ID Maintenance. Non-VA physician/provider primary and secondary legacy IDs are both defined the same way and the system knows to look for and use the SSN as the primary ID. Refer to the following **Section 3.4.4.1**.

	<i>Note: Non-VA Physician/Provider IDs can be defined through Provider ID Maintenance through PO > Provider Own IDS or through NP > Non- VA PROVIDER.</i>
---	---

4.5.3.1 Define a non-VA Physician/Provider's NPI

The NPI and Taxonomy Code for a non-VA Physician or Provider can be entered by Billing personnel using Provider ID Maintenance.

Step	Procedure
1	Access the option MCCR SYSTEM DEFINITION MENU→Provider ID Maintenance .
2	At the Select Provider ID Maintenance Option: prompt, enter NP for Non-VA Provider.
3	At the Select a Non-VA Provider: prompt, enter IB,OUTSIDEPROV for this example.
	<i>When accessing an existing entry, press ENTER to continue or, if necessary, the spelling of the provider's name can be corrected at the NAME prompt. Names should be entered in the following format: LAST NAME,FIRST NAME MIDDLE INITIAL.</i>
	<i>Note: Beginning with Patch IB*2*436, it will be possible to enter a provider into the VA New Person file as a VA provider and then enter that same provider in Provider Maintenance as a non-VA provider using the same name. It will no longer be necessary to manipulate the name by adding a middle initial (for example).</i>
	<i>Users must hold the IB PROVIDER EDIT security key to access this option.</i>

4.5.4 Define a non-VA Physician/Provider's Secondary IDs

4.5.4.1 Define a non-VA Physician/Provider's Own IDs

Non-VA Physicians and other health care providers are assigned IDs that identify them. Beginning with Patch IB*2*432 it will no longer be necessary to define the outside provider's SSN. The SSN will no longer serve as the Primary ID. The Primary ID will be the provider's NPI. In addition to their SSN, they may also have one or more of the following types of secondary IDs:

- OB - State License Number
- EI - EIN
- TJ – Federal Taxpayer's Number
- X5 – State Industrial Accident Provider Number
- 1G – UPIN
- SY - SSN

Step	Procedure
1	Access the option MCCR SYSTEM DEFINITION MENU→Provider ID Maintenance.
2	At the Select Provider ID Maintenance Option: prompt, enter PO for Provider Own IDs.
3	At the (V)A or (N)on-VA provider: V//: prompt, enter N for Non-VA provider.
4	At the Select Non V.A. PROVIDER NAME: prompt, enter IB,OUTSIDEDOC for this example.

4.5.5 Define Insurance Company IDs

Both individual Physician/Provider secondary IDs and insurance company default Physician/Provider secondary IDs provided by an insurance company can be entered and copied from within Insurance Company IDs.

There are 3 options:

- I – Individual IDs
- A – Individual and Default IDs
- D – Default IDs

Option A is the basically the same as I and D combined so users can add Physician/Provider secondary IDs and/or default secondary IDs.

4.5.5.1 Define Default Physician/Provider Insurance Company Secondary IDs

Users can use the Provider ID Maintenance option, Insurance Company IDs, to enter numbers that are assigned by an insurance company to be used as default Attending, Operating, Other, Rendering, Referring and Supervising Secondary IDs for all physicians and health care providers. These IDs will be automatically sent with all 837 claims to the insurance company for which the default IDs are defined.

Step	Procedure
1	Access the option MCCR SYSTEM DEFINITION MENU→Provider ID Maintenance .
2	At the Select Provider ID Maintenance Option: prompt, enter II for Insurance Co IDs.
3	At the Select Insurance Company Name: prompt, enter Blue Cross of California for this example.
4	At the Select Display Content: prompt, enter D .

4.6. Care Units

Some insurance companies assign the same IDs to multiple Physician/Providers, based upon Care Units, to be used as *Physician/Provider Secondary IDs* on claims. This allows more than one person to have the same ID without everyone having the same ID.

Example: Insurance Company A assigns the number XXXXXX1 to a care unit called Care Unit A and assigns this number and care unit to Dr. A, Dr. B, Dr. C and Dr. E. as their Physician/Provider Secondary ID. The same insurance company assigns the number XXXXXX2 to a care unit called Care Unit B and assigns this number and care unit to Dr. F, Dr. G, Dr. H and Dr. I. as their Physician/Provider Secondary IDs.

Some insurance companies assign IDs to be used as *Billing Provider Secondary IDs* on claims for services performed for specific types of care.

Example: Insurance Company A assigns the number XXXXHH to be used as the Billing Provider Secondary ID (Billing Screen 3) when Home Health services are provided. The same insurance company assigns the number XXXXER as the Billing Provider Secondary ID (Billing Screen 3) when Emergency services are provided.

The names of the “care unit” used by insurance companies are specified by the insurance companies and do not relate directly to the medical services or departments of the medical center. For this reason, users must define these Care Units in Provider ID Maintenance.

4.6.1 Define Care Units for Physician/Provider Secondary IDs

Step	Procedure
1	Access the option MCCR SYSTEM DEFINITION MENU→Provider ID Maintenance .
2	At the Select Provider ID Maintenance Option: prompt, enter CP for Care Units for Providers.
3	At the Select INSURANCE CO: prompt, enter Blue Cross of California for this example.

4.7. ID Parameters by Insurance Company

In addition to defining Care Units and Physician/Provider IDs in Provider ID Maintenance, there are also ID parameters that can be set for an insurance company that effect which IDs get sent on 837 claims transmissions to an insurance company.

Users need to be aware of these parameters so they can be set *if needed*. They do not need to be set unless there is a specific need for a particular insurance company.

Step	Procedure
1	Access the option Insurance Company Entry/Edit .
2	At the Select INSURANCE COMPANY NAME : prompt, enter BLUE CROSS OF CALIFORNIA for this example.
3	From the Insurance Company Editor , enter the Prov IDs/ID Param action.

```

//
Use Att/Rend ID as Billing Provider Sec. ID (UB)?: NO
//

Billing Provider/Service Facility
Always use main VAMC as Billing Provider (1500)?: NO
//
Always use main VAMC as Billing Provider (UB-04)?: NO
//
```

4.7.1 Define Attending/Rendering Provider Secondary ID Parameters

Users can define the type of ID that will be the default secondary ID for the Rendering Provider or Attending Physician during the creation of a claim.

A type of default secondary ID can be defined for a CMS-1500 claim and/or a UB-04 claim.

Users can also set a parameter which will make these IDs required on a claim. If they are required and the physician/provider on the claim does not have a secondary ID of the type required, the claim cannot be authorized.

Attending/Rendering Provider Secondary ID Default ID (1500): BLUE SHIELD ID Default ID (UB04): BLUE CROSS ID Require ID on Claim: BOTH

4.7.2 Define Referring Provider Secondary ID Parameters

Users can define the type of ID that will be the default secondary ID for the Referring Provider during the creation of a CMS-1500 claim.

A type of default secondary ID can be defined for a CMS-1500 claim.

Users can also set a parameter which will make this ID required on a claim. If it is required and the referring provider on the claim does not have a secondary ID of the type required, the claim can not be authorized.

The default type of ID for a Referring Provider is a UPIN but users may override this default.

Referring Provider Secondary ID Default ID (1500): UPIN// BLUE SHIELD ID Require ID on Claim: CMS-1500 REQUIRED

4.7.3 Define Billing Provider Secondary ID Parameters

If an insurance company wants the Billing Provider Secondary ID (Billing Screen 3) to be the same as the Attending Physician's or the Rendering Provider's ID, users can set the Send Attending/Rendering ID as Billing Provider Sec. ID?: parameter to Yes. The default value is No.

Billing Provider Secondary IDs Send Attending/Rendering ID as Billing Provider Sec. ID?: No// Yes
--

If the payer requires the Attending/Rendering Physician/Provider's Secondary ID as the Billing Provider Secondary ID, this parameter can be set and a default Attending/Rendering ID type can be set and then users can just accept the default ID on Billing Screen 8 and it will be transmitted as the Physician/Provider's Secondary ID and the Billing Provider Secondary ID.

4.7.4 Define Billing Provider/Service Facility Parameters

For those payers who are unable to accept claims where the Billing Provider is the lowest enumerated entity such as a CBOC or Pharmacy, users can set one of the following parameters, by payer and form type, which will force the Billing Provider to always be the main division in the database (VAMC).

Billing Provider/Service Facility Always use main VAMC as Billing Provider (1500)?: NO// YES Always use main VAMC as Billing Provider (UB-04)?: NO
--

Once one or both of these parameters has been set to YES, then the following parameters will become available.

Send VA Lab/Facility IDs or Facility Data for VAMC?: YES// Use the Billing Provider (VAMC) Name and Street Address?: NO//
--

When set to NO, first parameter will suppress the transmission of the Service Facility loop data when the service is provided at the VAMC. When set to YES, the second parameter will cause the VAMC's street address from the Institution file to be transmitted as the Billing Provider's address instead of the Pay-to Provider's address.

*This group of parameters was designed to allow a site to return, as much as possible, to a pre-Patch IB*2*400 state where the Billing Provider was always the VAMC and the Service Facility was where the care was provided.*

4.7.5 Define VA Service Facility Parameters

This parameter was changed with Patch IB*2*400. The parameter will only exist as part of the Billing Provider/Service Facility parameters in Section 4.7.4. The VA Billing Provider information will no longer be repeated in the Service Facility loops for non-Fee Basis claims. The Service Facility will be blank for *most* VA claims.

VA-Laboratory or Facility IDs Send VA Lab/Facility IDs or Facility Data?: No//

4.7.6 Define No Billing Provider Secondary IDs by Plan Type

Some insurance companies do not want any Billing Provider Secondary IDs to be transmitted in the 837 claim transmission for claims to specific plan types.

To define which plan types require no Billing Provider Secondary IDs, users must enter the plan types.

Step	Procedure
1	From the ID Parameter Maint. screen, enter the Edit Billing Prov Params action.
	The first Billing Provider Secondary ID will still be sent with the claim regardless of this parameter. The first ID is a calculated value used by the clearinghouse for sorting purposes.
2	At the Select Action: prompt, enter Add Plan .
3	At the Enter Electronic Plan Type: prompt, enter PPO for this example.

```
Billing Provider Parameters    May 27, 2005@12:48:29          Page:    1 of    1

4.8. Associated Insurance Companies and Copying Physician/Provider Secondary IDs and Additional Billing Provider Secondary IDs.

Patch IB*2.0*320 provides the ability for users to associate multiple Insurance Company entries with each other. If, for example, there are 45 Blue Cross/Blue Shield entries in

the Insurance Company file, users can make one of these entries the Parent company and make 1 to 44 of the other entries a Child company.

Making these associations will cause the software to automatically make the Physician/Provider Secondary IDs and the Additional Billing Provider Secondary IDs the same for all associated companies.

Once these associations are made and the IDs synchronized for all the associated companies, users will be able to Add, Edit and/or Delete IDs for the associated companies from the Parent company. Changes to the IDs from a Child company will be prohibited.

If a situation changes and it becomes necessary for a Child company to have IDs that differ from those of the Parent company, users may disassociate the Child company from the Parent company.

4.8.1 Designate a Parent Insurance Company

Step	Procedure
1	Access the Insurance Company Editor .
2	At the Select INSURANCE COMPANY NAME: prompt, enter Blue Cross of California for this example.
3	At the Define Insurance Company as Parent or Child: prompt, enter Parent .

4.8.3 Copy Physician/Provider Secondary IDs

Individual Physician/Provider Secondary IDs can be entered, edited or deleted one time from the Parent insurance company and these changes will be copied to all associated insurance companies (Child).

This can be done using the following Provider ID Maintenance options:

- Provider ID Maint→PI Provider Insurance IDs;
- Provider ID Maint→II Insurance Co IDs; and
- Provider ID Maint→BI Batch ID Entry

4.8.4 Copy Additional Billing Provider Secondary IDs

When users are done adding, editing or deleting Additional IDs from the Parent insurance company, the changes will be copied to all associated insurance companies.

4.8.5 Synchronizing Associated Insurance Company IDs

There is an IRM option for synchronizing the IDs of a Parent insurance company with all of the associated Child companies. This option is intended as a backup option if the IDs of a Parent have become out of synch with the Child companies due to a system problem.

5. SUBSCRIBER AND PATIENT ID SET-UP

Insurance Companies issue identification numbers to the people that they insure. The person who pays for the insurance policy or whose employer pays for the insurance policy or who receives Medicare is referred to as the subscriber. A veteran can be the subscriber or a veteran can be insured through an insurance policy that belongs to some other subscriber such as the veteran's spouse or parent.

5.1. Subscriber and Patient Insurance Provided IDs

Some insurance companies issue identification numbers only to the subscriber. Some others issue unique identification numbers to each person covered by the subscriber's policy.

Insurance companies can issue both Subscriber Primary and Secondary ID numbers and Patient Primary and Secondary ID numbers.

These ID numbers can be entered when a policy is initially added in VistA through Add a policy. Sometimes the primary IDs will be added during the initial Patient Registration process and placed in the insurance company buffer.

Both Patient and Subscriber, Primary and Secondary IDs can be added or edited at any time using the option Patient Insurance Info View/Edit.

5.1.1 Define Subscriber Primary ID

When the patient is the subscriber, users will be prompted for the Subscriber's Primary ID.

Step	Procedure
1	Access the option Patient Insurance Info View/Edit .
2	At the Select Patient Name: prompt, enter IB,PATIENT TWO .
3	At the Select Items: prompt, enter Policy Edit/View .
4	At the Select Policy(s): prompt, enter 1 for this example.

Do you want to enter/update Patient Secondary IDs? No// y YES

PATIENT'S SEC QUALIFIER(1): IG Insurance Policy Number
PATIENT'S SECONDARY ID(1): ID2XXXX
PATIENT'S SEC QUALIFIER(2):

```

Step	Procedure
1	Access Subscriber Update again.
2	At the Do you want to enter/update Subscriber Secondary IDs? No//: prompt, enter Yes .
3	At the Subscriber's Sec Qualifier (1):: prompt, enter IG for this example.
	<i>23 Client Number is used for claims to the Indian Health Service/Contract Health Services (HIS/CHS).</i>
	<i>VistA will not allow users to enter SY for SNN if the payer is Medicare. Medicare will not accept the SSN as a subscriber's secondary ID.</i>
4	At the Subscriber's Sec ID (1): prompt, enter XXXXID2 for this example.
5	At the Subscriber's Sec Qualifier (2):: prompt, press ENTER if you do not want to add another ID.
6	At the Patient Primary ID (1): prompt, press ENTER to accept the default.
7	At the Do you want to enter/update Patient Secondary IDs? No//: prompt, enter Yes .
8	At the Patient's Sec Qualifier (1):: prompt, enter IG for this example.
9	At the Patient's Sec ID (1): prompt, enter ID2XXXX for this example.
10	At the Patient's Sec Qualifier (2):: prompt, press ENTER if you do not want to add another ID.

6. ENTERING ELECTRONIC CLAIMS

This section briefly identifies the screens used in the billing process that contain fields critical to EDI billing. It is important that all the data transmitted in an electronic claim be accurate and appropriate. This section is just meant to highlight some specific fields that pertain to electronic processing.

6.1. Summary of Enter/Edit Billing Information to Support ASC X12N/5010

There have been numerous changes with Patch IB*2*432 to the Enter/Edit Billing Information option to support changes in the Health Care Claim (837) Technical Reports (ASC X12N/ 5010) for both Institutional and Professional claims.

Screen	Section	Change
3	2	No default (Tax ID or Medicare Number) Billing Provider Secondary ID
4/5	4	Addition of Line Level Rendering/Referring/Operating/Other Operating providers – UB04 Addition of Line Level Rendering/Referring/Supervising providers – CMS 1500
4/5	4	Addition of Line Level Paperwork Attachment Information
5	4	Addition of Line Level Obstetric Anesthesia Additional Units – CMS 1500
5	5	Addition of Prescription Date (date ordered) – View Only
6/7	1	Removal of Covered Days/non-Covered Days/Co-insurance Days
6/7	5	Increased allowable dollar amounts – 9999999.99 (7 and 2 decimals)
8	1-7	NEW Screen 8 <i>Claim</i> Level Data (previous Screen 8 is now Screen 10): 1 – Non-covered Charge Amount (MRA Secondary Claims) 2 – Property/Casualty Information 3 – Ambulance Information – CMS 1500 only 4 – Surgical Codes for Anesthesia Claims – CMS 1500 only 5 - Paperwork Attachment Information 6 – Disability Start and/or End Dates – CMS 1500 only 7 – Assumed and/or Relinquished Care Dates – CMS 1500 only
10	1/2	Addition of Referral Numbers
10	3	Addition and changes to allowable claim level providers: Rendering/Referring/Operating/Other Operating providers – UB04
10	5/7	Changes to the Billing Provider name – Institution file #4, Field 200
10	6	Addition of a pick list of codes for Special Program Indicators – CMS 1500

*Note: After Patch IB*2*432 is installed, users will no longer receive Warnings when there is more than one division or non-matching providers on a claim. It will be possible to have multi-divisional claims with line level and claim level providers, of the same type, who do not match.*

*Note: After Patch IB*2*432 is installed, users will no longer receive an Error when a human provider does not have an SSN or EIN defined.*

6.1.1 Claim Versus Line Level Data

With the introduction of additional Line Level data, including Line Level providers, users need to become familiar with the concept of Claim Level data applying to all the line items on a claim. Example: If all the procedures on a claim were performed by the same Rendering provider, the claim should only have a Claim Level Rendering provider. If all but one procedure is done by the same Rendering provider and one procedure is

done by a second Rendering provider, the claim should have a Claim Level Rendering provider and one different Line Level Rendering provider. Line Level providers will be transmitted in 837 Health Care Claim transmissions.

Claim Level data applies to all the line items on a claim. Line Level data should be used to provide *exceptions* to the Claim Level data.

In addition, Institutional claims can now have both Line Level and/or Claim Level Rendering, Referring and Other Operating Providers. The Attending Provider is still the only provider required on an institutional claim and there is no longer a generic Other Provider.

Professional claims continue to allow Rendering, Referring and Supervising Providers on a claim. The Rendering Provider is still the only provider required on a professional claim.

6.2. Screen 3 – Payer Information

6.2.1 EDI Fields

Section 1 – Transmit	When a payer has been set up to transmit claims electronically, this field will say “Yes”. If the field says “No” the claim will be printed locally.
Section 2 – Primary, Secondary and Tertiary Payer	These fields display the Billing Provider Secondary IDs for the payers on the bill. These IDs are defined in the Insurance Company Editor. <i>Note: If users set the ID Parameter: Send Attending/Rendering ID as Billing Provider Sec. ID? to Yes for a payer on the claim, the Attending/Rendering ID will be sent.</i>
Section 3 – Mailing Address	This field should contain a valid mailing address for the current payer. In order to avoid EDI errors, there should be no periods or dashes such as P.O. Box, Winston-Salem, St. Paul, etc. <i>Exception: Medicare does not have a valid address.</i>
Section 3 – Electronic ID	This field contains the Inst Payer Primary ID or Prof Payer Primary ID defined in the Insurance Company Editor. Payer Primary IDs are provided by the clearinghouse and can be found at www.emdeon.com .

```

```

The 3-line mailing address displayed here is used also used by the clearinghouse to look up the Electronic ID for the payer when a claim is sent without a defined Electronic Bill ID.

*Note: Patch IB*2*432 made changes so that the Federal Tax ID Number will no longer be used as a default value when no other Billing Provider Secondary ID is defined for a payer – Section 2.*

6.2.2 Using Care Units for Billing Provider Secondary IDs

Section 2 of Billing Screen 3 contains fields for the Billing Provider Secondary IDs for the primary, secondary and tertiary payers on a claim. Normally the default values for the site or the defined values for the division on the claim populate these fields. If any insurance company on the claim requires different Billing Provider Secondary IDs based upon Care Units, users can change the default values to the value defined for the Care Unit where the services were provided.

Step	Procedure
1	At the <RET> to CONTINUE, 1-3 to EDIT, '^N' for screen N, or '^' to QUIT: prompt, enter 2 .
2	At the Current Bill Payer Sequence: prompt, press ENTER to accept the default.
3	At the Define Primary Payer ID by Care Unit?: prompt, press ENTER to accept the default.
4	At the Primary Payer ID: prompt, press ENTER to accept the default.
5	At the Define Secondary Payer ID by Care Unit?: prompt, enter Yes for this example.

6.3. Screen 10 – Physician/Provider and Print Information

6.3.1 EDI Fields UB-04/CMS-1500

Section 3/3 – Providers

When a Physician/Provider is entered here, the system finds the appropriate IDs and Taxonomy Codes for him/her. The Primary IDs are the providers' NPIs and their secondary IDs are those IDs that users have defined as the provider's own or as those provided by an insurance company. Claim Level providers may not be required if each Line Item has a provider associated with it.

Section 4 – Other Facility, CLIA#, Mammography Certification Number

These are the sections through which outside facilities are entered. The primary and secondary Laboratory or Facility IDs and Taxonomy Codes are then transmitted with the

	claim.
	The CLIA# and Mammography Certification Number can also be sent with a professional laboratory claim or mammography claim.
Section 5/7 – Billing Provider	These sections display the calculated Billing Provider and the Billing Provider's Taxonomy Code. Only the taxonomy code can be edited
Section 6/8 – Force to Print	Users can set this field to force a claim to print either locally or at the clearinghouse.
Section 7/9 – Provider ID Maint	This is a link to the Provider ID Maintenance function.

    - ATTENDING (MD)       : UNSPECIFIED          Taxonomy: UNSPECIFIED
[4] Other Facility (VA/non): UNSPECIFIED [NOT REQUIRED]
[5] Billing Provider       : CHEYENNE VAMC
    Taxonomy Code          : 282N00000X
[6] Force To Print?       : NO FORCED PRINT
[7] Provider ID Maint     : (Edit Provider ID information)

<RET> to CONTINUE, 1-7 to EDIT, '^N' for screen N, or '^' to QUIT:
```

	<i>The Primary ID (NPI) for the Attending, Operating or Other Operating Physician is always transmitted with a claim.</i>
	<i>The Secondary IDs for the Attending, Operating or Other Operating Physician are determined from what the user enters and from entries in Provider ID Maintenance.</i>
	<i>If users have set a default ID type and made it required for the current or other payers, the claim cannot be authorized if the physician does not have an ID of that type defined.</i>

When a provider is first added to Screen 10, the user will be shown a screen that contains a list of all the provider's IDs, the ID type and, optionally, the care unit on file for the provider's IDs. This will include the provider's own IDs, the provider's IDs assigned by the insurance company, the insurance company defaults, if any, and all IDs assigned to the provider by care unit.

The first 2 entries in this list will always be:

- 1 - NO SECONDARY ID NEEDED
- 2 - ADD AN ID FOR THIS CLAIM ONLY

Any ID entered on Screen 10 will automatically override any default provider secondary ID that exists for the same ID Qualifier for this claim ONLY.

```

**** SECONDARY PERFORMING PROVIDER IDs ****

PRIMARY INSURANCE CO: BLUE CROSS CA (WY)
PROVIDER: IB,PHYSICIAN4 (ATTENDING)

INS. COMPANY'S DEFAULT SECONDARY ID TYPE IS: BLUE CROSS ID

SELECT A SECONDARY ID OR ACTION FROM THE LIST BELOW:

1 - NO SECONDARY ID NEEDED
2 - ADD AN ID FOR THIS CLAIM ONLY
3 - <DEFAULT> XXXXBCROSS          BLUE CROSS ID
4 - WYXXXX                      ST LIC (WY)

Selection: 3//

```

If there is a default secondary ID found, based on the insurance company parameters and the Provider ID is defined in the Provider ID Maintenance, this will be the 3rd entry in the list and will be preceded with the text **<DEFAULT>**. If this ID exists, the default for the Selection prompt will be **3**.

If no default ID exists, the default for the selection prompt will be **1** – No Secondary ID needed.

Any care units assigned to an ID using Provider ID Maintenance are displayed at the far right of the ID line. You no longer have to enter a care unit on the bill.

You can make a selection from the list by choosing the number preceding the ID you want to assign to the provider for the bill. This will add both the ID Qualifier and the ID number to the claim.

	<i>Note: If the Provider has multiple IDs defined, the one you select or the new one time only ID that you enter, will appear on Screen 10 and will be the first ID sent but the system will still transmit the remaining IDs. The one you select will just be the first one transmitted. The maximum number that will be transmitted is five.</i>
	<i>Note: With Patch IB*2*432, IDs for Line Level providers are determined in the same manner as Claim Level Providers.</i>

If none of the IDs are valid for the provider for the claim, you can add a new ID *for this claim only*.

Step	Procedure
6	At the Selection prompt, type 2 to add an ID for this claim only.
7	At the PRIM INS PERF PROV SECONDARY ID TYPE: prompt, enter the ID Qualifier that the primary payer requires as a secondary ID type. Type two question marks (??) to see the list of possible choices. (For this example, type Location Number as the secondary ID Qualifier).
8	At the PRIM INS PERF PROV SECONDARY ID: prompt, enter the ID number provided by the payer. In this example, type XXXXA .

```

Selection: 3// 2
PRIM INS PERF PROV SECONDARY ID TYPE: ??
Choose from:
BLUE CROSS ID
BLUE SHIELD ID
COMMERCIAL ID
LOCATION NUMBER
MEDICARE PART A
MEDICARE PART B

PRIM INS PERF PROV SECONDARY ID TYPE: LOCATION NUMBER
PRIM INS PERF PROV SECONDARY ID: XXXXA

```

After an ID and ID Qualifier are added to the claim for a provider, the provider's name and the selected ID are displayed on Screen 10. These fields can be edited/deleted.

If a physician/provider is deleted, the next time the provider entry is accessed, the list of valid IDs will be displayed again.

Valid Secondary ID Types for Current Payer	
Attending/Referring/Operating/Other Operating (UB-04)	State License; Blue Cross; Blue Shield; Medicare Part A; UPIN; TRICARE; Commercial ID; Location Number; Network ID; SSN; State Industrial and Accident Provider
Rendering/Referring/Supervising (1500)	State License; Blue Shield; Medicare Part

	B; UPIN; TRICARE; Commercial ID; Location Number; Network ID; SSN; State Industrial and Accident Provider
--	---

Valid Secondary ID Types for Other Payer (Not Current)	
Attending/Operating/Other (UB-04)	Blue Cross; Blue Shield; Medicare; Commercial ID; Location Number
Rendering (1500)	Blue Shield; Medicare Part A and Part B; Commercial ID; Location Number; Network ID
Referring (1500)	Blue Shield; Medicare Part A and Part B; Commercial ID; Location Number; Network ID
Supervising (1500)	Blue Shield; Medicare Part A and Part B; Commercial ID; Network ID

Step**Procedure**

9

At the **<RET> to Continue:** prompt (any screen), enter **?PRV** to see summary information about a particular provider.

[8] Force To Print?     : NO FORCED PRINT
[9] Provider ID Maint   : (Edit Provider ID information)

<RET> to CONTINUE, 1-6 to EDIT, '^N' for screen N, or '^' to QUIT:

```

The Primary ID (NPI) for the Attending, Operating or Other Physician is always transmitted with a claim.

The Secondary IDs for the Attending, Operating or Other Physician are determined from what the user enters and from entries in Provider ID Maintenance.

If users have set a default ID type and made it required for the current or other payer, the claim cannot be authorized if the physician does not have an ID of that type defined.

When a provider is first added to screen 10, the user will be shown a screen that contains a list of all the provider's IDs, the ID type and, optionally, the care unit on file for the provider's IDs. This will include the provider's own IDs, the provider's IDs assigned by the insurance company, the insurance company defaults, if any, and all IDs assigned to the provider by care unit.

The first 2 entries in this list will always be:

- 1 - NO SECONDARY ID NEEDED
- 2 - ADD AN ID FOR THIS CLAIM ONLY

Any ID entered on screen 10 will automatically override any default provider secondary ID that exists for the same ID Qualifier for this claim ONLY.

```

**** SECONDARY PERFORMING PROVIDER IDs ****

PRIMARY INSURANCE CO: BLUE CROSS CA (WY)
PROVIDER: IB,PHYSICIAN4 (ATTENDING)

INS. COMPANY'S DEFAULT SECONDARY ID TYPE IS: BLUE SHIELD ID

SELECT A SECONDARY ID OR ACTION FROM THE LIST BELOW:

1 - NO SECONDARY ID NEEDED
2 - ADD AN ID FOR THIS CLAIM ONLY
3 - <DEFAULT> XXXXBSHIELD BLUE SHIELD ID
4 - WYXXXX ST LIC (WY)

Selection: 3//

```

If there is a default secondary ID found, based on the insurance company parameters and the Provider ID is defined in the Provider ID Maintenance, this will be the 3rd entry in the list and will be preceded with the text **<DEFAULT>**. If this ID exists, the default for the Selection prompt will be **3**.

If no default ID exists, the default for the selection prompt will be **1 – No Secondary ID needed**.

Any care units assigned to an ID using Provider ID Maintenance are displayed at the far right of the ID line. You no longer have to enter a care unit on the bill.

You can make a selection from the list by choosing the number preceding the ID you want to assign to the provider for the bill. This will add both the ID Qualifier and the ID number to the claim.

Note: If the Provider has multiple IDs defined, the one you select or the new one time only ID that you enter, will appear on Screen 10 and will be the first ID sent but the system will still transmit the remaining IDs. The one you select will just be the first one transmitted. The maximum number that will be transmitted is five.

If none of the IDs are valid for the provider for the claim, you can add a new ID *for this claim only*.

Step	Procedure
6	At the Selection prompt, type 2 to add an ID for this claim only.
7	At the PRIM INS PERF PROV SECONDARY ID TYPE: prompt, enter the ID Qualifier that the primary payer requires as a secondary ID type. Type two question marks (??) to see the list of possible choices. (For this example, type Location Number as the secondary ID Qualifier).
8	At the PRIM INS PERF PROV SECONDARY ID: prompt, enter the ID number provided by the payer. In this example, type XXXXA .

```

Selection: 3// 2
PRIM INS PERF PROV SECONDARY ID TYPE: ??
Choose from:
BLUE CROSS ID
BLUE SHIELD ID
COMMERCIAL ID
LOCATION NUMBER
MEDICARE PART A
MEDICARE PART B

PRIM INS PERF PROV SECONDARY ID TYPE: LOCATION NUMBER
PRIM INS PERF PROV SECONDARY ID: XXXXA

```

After an ID and ID Qualifier are added to the claim for a provider, the provider's name and the selected ID are displayed on Screen 8. These fields can be edited/deleted.

If a physician/provider is deleted, the next time the provider entry is accessed, the list of valid IDs will be displayed again.

Valid Secondary ID Types for Current Payer	
Attending/Operating/Other (UB-04)	State License; Blue Cross; Blue Shield; Medicare Part A; UPIN; TRICARE; Commercial ID; Location Number; Network ID; SSN; State Industrial and Accident Provider
Rendering/Referring/Supervising (1500)	State License; Blue Shield; Medicare Part B; UPIN; TRICARE; Commercial ID; Location Number; Network ID; SSN; State Industrial and Accident Provider

Valid Secondary ID Types for Other Payer (Not Current)	
Attending/Operating/Other (UB-04)	Blue Cross; Blue Shield; Medicare Part A and Part B; UPIN; TRICARE; Commercial ID; Location Number
Rendering (1500)	Blue Shield; Medicare Part A and Part B; Commercial ID; Location Number; Network ID
Referring (1500)	Blue Shield; Medicare Part A and Part B; Commercial ID; Location Number; Network ID
Supervising (1500)	Blue Shield; Medicare Part A and Part B; Commercial ID; Network ID

Step**Procedure**

- 9 At the **<RET> to Continue:** prompt (any screen), enter **?PRV** to see summary information about a particular provider.

6.6. Lab Claims

EDI Enhanced HIPAA format allows users to enter a CLIA# when billing for certain laboratory procedures. The VA's CLIA # must be entered on Screen 8 when billing a Medicare secondary payer for laboratory and pathology procedures that are not reimbursed in full by Medicare.

The following screens provide a simplified example of a lab claim:

Step	Procedure
1	When processing a Laboratory claim, information on Screens 1 and 2 should be reviewed for correctness. Press the ENTER key to move from one screen to the next.
2	On Screen 3, the payer information is reviewed for correctness. The patient may have more than one insurance policy. If the correct information is not displayed, select a section (1, 2, or 3) and edit the necessary fields. Press ENTER to continue to Screen 5.

```

6.7. Pharmacy Claims

1500 pharmacy claims can be submitted electronically to the clearinghouse where they will be printed and mailed. If a pharmacy claim is entered on a UB04, it must be printed locally.

The following screens give a simplified example of a pharmacy claim.

Step	Procedure
1	When processing a Pharmacy claim, information on Screens 1 and 2 should be reviewed for correctness. Press the ENTER key to move from one screen to the next.
2	On Screen 3, the payer information should be reviewed for correctness. The patient may have more than one insurance policy. If the correct information is not displayed, select a section (1, 2, or 3) and edit the necessary fields. Press ENTER to continue to Screen 5. <i>For Pharmacy claims, change the form type to a CMS-1500.</i>

Step	Procedure
3	The highlighted fields are auto-populated. Remember that this is a professional bill that is being transmitting as a CMS-1500, so each HCPCS code will have to be associated with a diagnosis code. To begin this process, type 4 to edit the Cod. Method field and press the ENTER key.  <i>Note: With Patch IB*2*432, when adding a refill to a claim, users will be able to view the date a prescription was order along with the other data.</i>

This claim is now ready for authorization.

6.8. Correct Rejected or Denied Claims

A claim can be rejected at some stage during either the electronic or manual process. A claim can be denied by the payer during the adjudication process. When a claim is either rejected or denied, it may be for a reason that can be corrected. Once the claim is corrected, it can be retransmitted or resent through the mail to the payer.

With Patch IB*2*433, a new option has been added to the IB Module that allows users to correct a claim while maintaining the original claim number on the resubmitted claim.

This new option cannot be used on claims with the following Billing Rate Types:

- INTERAGENCY
- SHARING AGREEMENT
- TRICARE or TRICARE REIMB.
- WORKMAN'S COMP. – Varies with which AR Fund the Workman's Compensation claim is associated

Step	Procedure
1	Access the option Third Party Billing Menu .
2	At the Select Third Party Billing Menu Option: prompt, enter CRD for Correct Rejected/Denied Bill.
3	At the Enter BILL NUMBER or Patient NAME: prompt, enter the claim number of the claim that requires correction.
4	At the ARE YOU SURE YOU WANT TO CANCEL THIS BILL? No// prompt, enter Yes to override the default.
5	At the CANCEL BILL?: prompt, enter YES .
6	At the REASON CANCELLED: prompt, enter a free text comment .
	<i>Note: This new option was designed to replace the existing option CLON Copy and Cancel under the majority of circumstances. The existing CLON Copy and Cancel option will now be locked with a new Security Key named IB CLON.</i>
	<i>Note: The existing CLON Copy and Cancel option should only be used to correct denied claims against which a payment has been posted or to correct a claim with one of the Bill Rate Types that are excluded from the new processes..</i>

The following screen will display.

IB, PATIENT4	(XX-XX-XXXX)	DOB: XXX XX, XXXX
=====		
Rate Type	: REIMBURSABLE INS.	
Event Date	: XXX XX XXXX	
Sensitive	: NO	
Responsible	: INSURANCE CARRIER (Specify CARRIER on SCREEN 3)	
Loc of Care	: HOSPITAL (INCLUDES CLINIC) - INPT. OR OPT.	
Event Source	: Outpatient	

Timeframe	: ADMIT THRU DISCHARGE (Specify actual bill type fields on SCREENs 6/7)
Bill From	: XXX XX,XXXX
Bill To	: XXX XX,XXXX
Initial Bill#	: K701XXX-01
Copied Bill#	: K701XXX-01

Please verify the above information for the bill you just entered. Once this information is accepted it will no longer be editable and you will be required to CANCEL THE BILL if changes to this information are necessary.

IS THE ABOVE INFORMATION CORRECT AS SHOWN? Yes//

Step	Procedure
7	Return through the claim screens correcting whatever data requires correction.
8	Complete and authorize the claim.
	<i>Note: The number of the original claim has been incremented and now displays with a -01 after the claim number. The original claim number has been assigned to the new claim. Each time a claim is corrected, the previous cancelled version will be incremented -01, -02, -03, etc..</i>

When users attempt to use the **CRD Correct Rejected/Denied Bill** option to correct a claim against which a payment has been posted, they will be warned that they must use the existing **CLON Copy and Cancel** option.

Select Third Party Billing Menu Option: CRD Correct Rejected/Denied Bill			
Enter BILL NUMBER or Patient NAME:	K600XXX	IB, PATIENT1	XX-XX-XX
Outpatient	REIMBURSABLE INS.	PRNT/TX	

Please note a PAYMENT of **\$45** has been POSTED to this bill. Copy and cancel (CLON) must be used to correct this bill.

When users attempt to use the **CRD Correct Rejected/Denied Bill** option to correct a denied claim which has received only one of its associated split Explanation of Benefits (EOB), they will be warned that they must wait for the arrival of the second EOB before they can use this new option.

Select Third Party Billing Menu Option: CRD Correct Rejected/Denied Bill			
Enter BILL NUMBER or Patient NAME:	K600XXX	IB, PATIENT1	XX-XX-XX
Outpatient	REIMBURSABLE INS.	PRNT/TX	

There is a split EOB associated with this claim. You cannot use this option to Correct this claim until the second EOB has been received.

When users attempt to use the the **CRD Correct Rejected/Denied Bill** option to correct a rejected or denied claim which has an excluded Billing Rate Type, they will be warned that they must use the existing **CLON Copy and Cancel** option.

Select Third Party Billing Menu Option: **CRD** Correct Rejected/Denied Bill

Enter BILL NUMBER or Patient NAME: K600XXX IB,PATIENT1 XX-XX-XX
Outpatient REIMBURSABLE INS. PRNT/TX

This option cannot be used to correct some Billing Rate Types (Example: TRICARE).
Use Copy and Cancel (CLON) to correct this bill.

*Note: The new **CRD Correct Rejected/Denied Bill** option has been added to the **CSA Claims Status Awaiting Resolution** option and the **MRW MRA Worklist** option as **Correct Bill**.*

The history of corrected claims will be available from the following locations:

- BILL - Enter/Edit Billing Information
- INQ – Patient Billing Inquiry

6.9. Printed Claims

Some claims should not be transmitted electronically and should be printed locally.

These include:

- Claims requiring clinical attachments such as progress notes;
- Professional claims containing more than the maximum number of 8 diagnosis codes;
- Professional claims containing more than the maximum number of diagnosis pointers (4);
- Institutional claims containing more than the maximum number of procedure codes (999);
- Professional claims containing more than the maximum number of procedure codes/line items (50);
- Institutional pharmacy claims; and
- Secondary claims to Medicare WNR (When Medicare WNR is NOT the primary insurance).

6.10. View/Resubmit Claims – Live or Test – Synonym: RCB

A new option View/Resubmit Claims – Live or Test has been added to the EDI menu. This option replaces: Resubmit a Bill; Resubmit a Batch of Bills and View/Resubmit Claims as Test. This option will provide the ability to resubmit claims as test claims for testing or production claims for payment.

Step	Procedure
1	At the Select EDI Menu For Electronic Bills Option , type RCB and press the Return key.
2	At the SELECT BY: (C)LAIM, (B)ATCH OR SEE A (L)IST TO PICK FROM: prompt, press the Enter key to accept the default of List .
3	At the Run for (A)ll payers or (S)electd Payers? prompt, type A for All Payers.
	<i>If you choose Selected payers, after you enter Blue Cross of CA, for example, you will be prompted to included all insurance companies with the same Electronic Billing ID. This will prevent you from having to enter every BC/BS company defined in your Insurance file.</i>
4	At the Run for (U)B-04, (C)MS-1500 or (B)OTH: prompt, press the Enter key to accept the default of Both.
	<i>The Date Range for the search for claims has been restricted to a maximum of 90 days to minimize the impact of the search on the system.</i>
5	At the Start with Date Last Transmitted: prompt, type T-200 for this example.
6	At the Go to Date Last Transmitted: prompt, press the Return key to accept the default of 12/1/04. This will return results for 90 days.
7	At the Select Additional Limiting Criteria (optional): prompt, press the Return key without selecting anything additional.

```

Resubmission in process ...
```

7. PROCESSING OF SECONDARY/TERTIARY CLAIMS

With Patch IB*2*432 installed, the procedures for the processing of secondary and tertiary non-MRA claims have changed.

When electronic Explanation of Benefits (EOBs) are received for claims that are NOT Medicare (WNR) claims and the payments are processed in AR, the EOBs will be evaluated and if the data in the EOBs meets certain criteria, the secondary or tertiary claims will either be processed automatically or sent to the new COB Management Worklist for manual processing.

When a claim is processed in AR and its status becomes Collected/Closed, no mailman message will be generated. Either the subsequent claim will be automatically processed or the claim will appear on the new worklist.

The option, Copy for Secondary/Tertiary Bill [IB COPY SECOND/THIRD], has not been removed from the Third Party Billing menu but it should only be used for those claims that remain from before Patch*2*432 was installed. Use the new COB Management Worklist (CBW) whenever possible.

A new, non-human user, IB,AUTHORIZER REG, will be the clerk responsible for the automatic processing of non-MRA secondary and tertiary claims.

In order to be able to either create a subsequent claim or send a claim to the new COB Management Worklist for manual processing, the following conditions must be met:

- All Explanation of Benefit (EOBs), 835 Health Care Claim Payment Advice, have been received ; and
- Payment from the previous payer has been posted by AR; and
- The bill status for the previous payer is Collected/Closed.

Electronic Secondary and Tertiary claim will contain the Coordination of Benefits data from the EOBs in the 837 Health Care Claim transmission to FSC.

	<i>Note: Secondary and Tertiary claims will be created with a new claim number.</i>
	<i>Remember: Whether or not a Secondary or Tertiary claim to an electronic payer is transmitted or printed, is determined by the new parameter in the Insurance Company Editor. Refer to Section 2.1.1.1.</i>

7.1. Criteria for the Automatic Processing of Secondary or Tertiary Claims

When a non-MRA claim has received all associated EOBs and they meet the following criteria, the subsequent claim will be automatically created and either transmitted electronically to the next payer or printed, along with the associated MRAs/EOBs and mailed to the next payer:

- EOB contains only Adjustment Group Codes = Contractual Obligation (CO) associated with one of the following Reason Codes: A2; B6; 45; 102; 104; 118; 131; 23; 232; 44; 59; 94; 97; or 10; and
- EOB contains only Adjustment Group Codes = Patient Responsibility (PR) associated with one of the following Reason Codes; 1; 2; or 66; and
- The sum of the deductible, coinsurance and co-payment amounts is greater than \$0.00; and
- The EOB status is Processed (The Claim Status Code is either 1, 2, or 3).

7.2. COB Management Worklist

Any non-MRA claim that does not meet the criteria for the automatic creation of a Secondary or Tertiary claim, will be placed on the COB Management Worklist.

Step	Procedure
1	Access the EDI Menu For Electronic Bills menu.
2	At the Select EDI Menu For Electronic Bills Option: prompt, enter CBW for COB Management Worklist.
3	At the Select BILLER: ALL// prompt, press ENTER to accept the default.
4	At the Sort By: BILLER// prompt, press ENTER to accept the default.
5	At the Do you want to include Denied EOBs for Duplicate Claim/Service? No// prompt, press ENTER to accept the default.
	<i>Note: A non-MRA claim which receives a DENIED EOB and which is Collected/Closed by AR and which has a subsequent payer, will also be placed on the CBW.</i>

The following screen will display.

The following data is displayed on the COB Management Worklist:

- List number
- Claim number
- Asterisk – when claim is under review
- Claim date
- Patient name
- Last 4 numbers of patient's SSN
- Patient Responsibility monetary amount
- Monetary amount on the claim
- Patient status, Inpatient/Outpatient
- Claim form type
- Status of EOB
- Insurance company(s)
- Clerk name – depends on Sort criteria
- Days since last transmission – depends on Sort criteria
- Date of EOB - depends on Sort criteria

7.2.2 Available COB Management Worklist Actions

The following actions are available to users to help them managed those claims which failed to meet the automatic processing criteria:

- PC Process COB – Process a claim on the list to the next payer on the bill
- VE View an EOB – View the EOB(s) associated with a claim on the list
- EC Enter/View Comments – Enter new comments for a claim on the list or view previously entered comments
- RS Review Status – Change the review status for a claim on the list
- CB Cancel Bill – Cancel a bill that does not need to be resubmitted
- CR Correct Bill – Correct a bill that needs to be resubmitted
- CC Cancel/Clone A Bill – Clon a bill that needs to be resubmitted (locked with IB CLON)
- VB View Bill – View the billing screens
- RM Remove from Worklist – Remove claim from worklist if no need to resubmit
- PE Print EOB/MRA - Print associated MRAs or EOB
- TP Third Party Joint Inq. – Select a claim and go directly to it in TPJI
- EX Exit – Exit the worklist and return to the EDI Menu

	<i>Note: Remove from Worklist was added so that claims that have been Collected/Closed and place on the worklist can be removed if there is no reason to process it to the next payer (i.e. no Patient Responsibility). These claims should not be cancelled as they have been Collected/Closed in AR.</i>
	<i>Remember: It is possible that a tertiary claim on the COB Management Worklist began as an MRA claim. The Print EOB/MRA action will provide users with the option to print both EOBs and MRAs.</i>

8. IB SITE PARAMETERS

8.1. Define Printers for Automatically Processed Secondary/Tertiary Claims

New fields were added to the MCCR Site Parameter Display/Edit option so that users can define printers to which to print automatically processed secondary or tertiary claims and their associated EOB/MRAs to payers which cannot support electronic claim transmissions.

Step	Procedure
1	Access the MCCR System Definition Menu menu.
2	At the Select MCCR System Definition Menu Option: prompt, enter Site for MCCR Site Parameter Display/Edit.
3	At the Select Action: prompt, Enter IB to access the IB Site Parameters.

```

9. REPORTS

There are a number of reports available to monitor and manage electronic claims. The EDI menu option can be accessed from the Billing Clerk's Menu.

9.1. EDI Reports – Overview

TR reports provide the end-user with information to monitor and manage EDI claims still within the VA, that is, between the VAMC and the FSC in Austin, TX. The MM reports provide the end-user with information and feedback from parties external to the VA such as the clearinghouse and the various electronic payers.

TR- EDI Transmission Status

BAR	Bills Needing Resubmission Action
ECS	EDI Claim Status Report
MP	EDI Messages Not Yet Filed
PBT	Pending Batch Transmission Status Report
PND	EDI Batches Pending Receipt
REX	Ready for Extract Status Report
VPE	View/Print EDI Bill Extract Data

MM-EDI Return Message Management

EDI	Return Message Management Option Menu
CSA	Claim Status Awaiting Resolution
MCS	Multiple CSA Message Management
TCS	Test Claim EDI Transmission Report
	EDI Message Text to Screen Maint
	EDI Message Not Reviewed Report
	Electronic Error Report
	Electronic Report Disposition
	Return Message Filing Exceptions
	Status Message Management

9.2. Most Frequently Used Menus/Reports

9.2.1 Claims Status Awaiting Resolution – Synonym CSA

What is the purpose of this report?

Billing and Accounts Receivable (or Accounts Management) staff use CSA to review the most current status messages and to perform follow-up actions on the bills. Electronic status messages, which include information and rejection messages from the clearinghouse or the payers, are accessed using this option.

When is this option used?

This is an option that must be checked **Daily** to determine which claims have rejection or warning messages that were returned from the clearinghouse or from payers. The cause for rejections must be resolved. This option should be used in conjunction with supporting reports (e.g. R022, R0SS, R0SC).

The CSA report contains a Primary, Secondary and Tertiary sort capability and can be sorted by:

- A Authorizing Biller
- B Bill Number
- C Current Balance
- S Date of Service
- D Division
- E Error Code Text
- N Number of Days Pending
- M Patient Name
- P Payer
- R Review in Process
- L SSN Last 4

Once the CSA screen list is displayed, users can select new sort criteria and **re-sort** the list without exiting the option.

Reports can be run showing rejections only (R) or both informational and rejection messages (B). Users most often run the CSA report to show rejections only so they can focus on those claims that require corrective action.

These messages are automatically assigned a status of **Not Reviewed** and require users to review them and make corrections to update this status in IB. Users select a bill from the list to view the details and the entire message text. Messages are marked as **reviewed** or **review in process**. Users may document comments.

*With Patch IB*2.0*320, changes were made to suppress the display of 2Q Claim Status Messages and duplicate claim status messages.*

As messages are reviewed they can be marked as follows:

- Not Reviewed – No action has been taken on a bill that has been returned from the clearinghouse/payer
- Review in Process – While a claim is being reworked, the status can be changed to “Review in Process”
- Review Complete – The error has been resolved and the message from this report will be cleared

Actions such as Cancel Bill, Copy/Cancel Bill, TPJI and Print Bill are available to the user via this option and the user can make needed corrections and re-submit claims from within this option.

Other options available on the CSA include:

- CSA-EDI History Display - The EDI History display option shows all the status messages under the selected bill/message. This information is similar to information that can be viewed under the TPJI menu options.
- CSA-Enter/Edit Comments - The enter/edit comments option gives the user the ability to add a comment onto a bill (status message) in order to inform AR and billing why the issue hasn't been resolved or why the claim was printed to paper.
- CSA-Resubmit by Print - The Resubmit by Print action is used when the user reviews the status message or bill and determines the only way to correct the problem is to submit the claim on hard copy as it cannot pass the electronic edits. The user may “resubmit by print” to the payer instead of retransmitting electronically. If printed from this option, users will be asked if they wish to “review complete” the status message, which will automatically clear it from the report.
- CSA-Retransmit a Bill - Similar to the Resubmit by Print action, the Retransmit Bill is used when the user reviews the status message or bill and determines the reason for the rejection has been corrected elsewhere in the system and the claim just needs to be resent. The user may then retransmit to the payer.
- CSA-Review Status - A bill will continue to show up on the report until it is cancel/cloned, canceled or the status is changed to Review Complete.

Users also have access to the option Multiple CSA Message Management from within the CSA list if they hold the IB Message Management security key.

9.2.2 Multiple CSA Message Management – Synonym: MCS

What is the purpose of this option?

This option is designed to allow users to take action on CSA messages when a problem arises during the processing of electronic claims that causes a large volume of erroneous status messages to be sent to the site. This option performs tasks similar to the CSA option.

*This option is locked by the **IB Message Management** security key.*

When is this option used?

This option is used when there are pages of erroneous messages in CSA that were caused by a processing problem. Use this option to take a similar action (such as retransmission of the associated claims) on multiple claims at the same time.

The initial search for claims and claims status messages is done automatically when the option is selected. The initial search results in the display of all claims that are **Not Cancelled** and for which the review status is **Not Reviewed** or **Review in Process**.

*If someone else is working on a claim in CSA, it will not display in MCS. Only one user can be in MCS at a time. The following message will be displayed: **Sorry, another user is currently using the MCS option. Please try again later.***

Once the initial list has been built, users may further refine their search or work from the default list.

The purpose of MCS is to select multiple claims and then apply the same action to all the selected claims. For example, users can enter a comment once and then apply the comment to 1-n claims.

Other actions available on the MCS include:

- Message Search – Allows the user to change the criteria upon which the list of claims will be built
- Change Review Status – Same as CSA
- Cancel Claims – Same as CSA
- Enter Comment – Same as CSA
- Resubmit by Print – Same as CSA
- Retransmit Bill – Same as CSA
- Select/Deselect Claims – Allows users to select the claims to which they want to apply an action

When using the Resubmit by Print action, the claims selected will not be removed from the list of claims until the claims have actually been printed.

9.2.3 Electronic Report Disposition

What is the purpose of this option?

This option allows the site to determine which clearinghouse generated electronic messages/reports are to be sent to the EDI mail group and which should be ignored.

When is this option used?

The default setting on this report will contain a disposition of “Mail Report to Mail Group”. It is up to the individual site’s supervisory staff to determine what reports should be ignored.

Further explanations of these reports are available in documents provided by the clearinghouse. They are entitled Claim Submitter Reports – Providers Reference Guide. The guides are available at <http://www.emdeon.com/VendorPartners/vendorpartners.php>

The following reports should be reviewed when they are received. They contain information that cannot be translated into claim status messages therefore, this information is not available in CSA.

R000 NETWORK NEWS

Provides news on system problems, updates and other pertinent information.

RPT-02 FILE STATUS REPORT

Provides an initial analysis of the file by displaying file status of accepted or rejected and a description of the status. It also indicates the total number of claims and the dollar value if the file contains valid claims.

RPT-03 FILE SUMMARY REPORT

Provides summarized information on the quantity of accepted, rejected, and pending claims, as well as the total number of claims received by the clearinghouse for each submitted file.

RPT-08 PROVIDER MONTHLY SUMMARY

Displays the number and dollar value of claims accepted and forwarded by the clearinghouse for the month. Monthly and Y-T-D Totals for both accepted and rejected claims are included as well as the provider’s top 25 errors for the month.

The following reports contain information that is also translated into status messages and displayed on CSA.

RPT-04 FILE DETAIL SUMMARY REPORT

Contains a detail summary of the file submitted for processing. It provides a file roll-up listing of all accepted, rejected, and pending claims contained in each file submitted to the clearinghouse. It also contains payer name/id and status of claim.

RPT-04A AMENDED FILE DETAIL SUMMARY REPORT

Contains a detailed listing of all claims for which the status was amended during the previous processing day. Claims statuses are amended when a pending claim is processed and/or a claim is reprocessed at the clearinghouse.

RPT-05 BATCH & CLAIM LEVEL REJECTION REPORT

Contains rejected batches and claims listed with detailed error explanations. In order to prevent “lost” claims, the RPT-05 report must be reviewed and worked after each file transmission.

RPT-05A AMENDED BATCH & CLAIM LEVEL REJECTION REPORT

Contains rejected batches and claims listed with detailed error explanations. In order to prevent “lost” claims, the RPT-05A report must be reviewed and worked after each file transmission.

RPT-10 PROVIDER CLAIM STATUS

This report contains information provided from payers who are receiving claims for adjudication from the clearinghouse. Not all payers who process claims through the clearinghouse system provide information for this Provider Claim Status Report and the amount/frequency of information produced will vary from payer to payer.

RPT-11 SPECIAL HANDLING/UNPROCESSED CLAIMS REPORT

This report contains information provided from payers who are receiving claims for adjudication from the clearinghouse. Not all payers who process claims through the clearinghouse system provide information for this Provider Claim Status Report and the amount/frequency of information produced will vary from payer to payer. The RPT-11 returns Unprocessed, Request for Additional Information, and Rejected statuses only.

9.2.4 EDI Claim Status Report- Synonym: ECS

What is the purpose of this report?

View electronic transmission status to assure claims move through the system in a timely fashion.

When is this option used?

It is recommended that initially this report be viewed daily as it provides transmission status of all claims that were transmitted to FSC Austin. Once a comfort zone is established and everything is flowing correctly, this report may only need to be run monthly.

Reports can be created based on:

- Specific Claim or Search Criteria
- Division
- Payer
- Transmission Date range
- EDI Status

Reports can be sorted by:

- Transmission Date
- Payer
- EDI Status
- Current Balance
- Division
- Claim Number
- AR Status
- Age

Possible EDI claim statuses include:

- Ready for Extract
- Pending Austin Receipt
- Accepted by Non-Payer
- Accepted Payer
- Error Condition
- Cancelled
- Corrected/Retransmitted
- Closed

9.3. Additional Reports and Options

9.3.1 Ready for Extract Status Report - Synonym: REX

What is the purpose of this report?

This report provides a list of claims held in a Ready for Extract status. These claims are held in a queue until batching occurs.

When is this option used?

Initially this option is used to assure claims are being transmitted at the times set in the MCCR Site Parameters. This option should be reviewed daily until there is a comfort level with the transmission timeframes and then less frequently based on local experience.

Claims that are trapped due to the EDI parameters being turned off can also be viewed. It is rare that EDI is turned off during processing. If this occurs, use EXT Extract Status Management to Cancel or Cancel/Clone/Auth the trapped claims.

Choices to view are:

- 1 All bills in Ready for Extract status
- 2 Bills trapped due to EDI parameter being turned off
(If EDI is on, no bills will be trapped in extract)

9.3.2 Transmit EDI Bills – Manual - Synonym: SEND**What is the purpose of this option?**

This option is used to by-pass the normal daily/nightly transmissions queues if the need arises to get the claim to the payer quickly.

When is this option used?

There are occasions when there is a need to transmit a claim(s) immediately instead of waiting for the batching frequency as scheduled in the MCCR Site Parameter. This option will allow sending individual claim(s) or all claims in a ready for extract status.

Select one of the following:

- A Transmit (A)LL bills in READY FOR EXTRACT status
- S Transmit only (S)ELECTED bills

9.3.3 EDI Return Message Management Menu – Synonym: MM

This menu contains the options needed to define the types of electronic reports from the clearinghouse that the site needs to see and defines the text that should/should not allow automatic review and filing for informational status messages. It also contains an option to purge old status messages, reports for maintaining the integrity of the return message subsystem and the option for reviewing electronically returned messages.

9.3.4 EDI Message Text to Screen Maintenance**What is the purpose of this option?**

This option controls what status and/or error messages users may wish to review using special text words and/or phrases. This will either require the message to be reviewed or it will auto-file the message and flag it as not needing a review.

This option allows for the display of a list of words or phrases that, if found in the text of an informational status message, will either always require the message to be reviewed or will auto-file the message and flag it as not needing a review.

When is this option used?

Depending on what types of status messages users wish to review for follow-up on rejected claims and/or monitoring claims status, users may want to add or edit additional text as needed.

The words and phrases for “Requiring Review” and “Not Requiring Review” will initially populate as shown in the screen print below. This option is used to edit or add more words or phrases, as required, to manage and control the status messages.

9.3.5 EDI Messages Not Reviewed Report**What is the purpose of this report?**

This option allows for the display of all EDI return messages that were filed without needing a review based on the text entries in the message screen text file.

When is this option used?

The report can be run for a user-selected date range, based on the date the message was received at the site, and may be sorted by the message text that caused the message to not need a review or by the bill number. Users may want to use this option for analysis or review of all EDI messages that they were not able to view initially.

9.3.6 Electronic Error Report**What is the purpose of this report?**

This report provides a tool for billing supervisors and staff to identify the “who, what, and where” of errors in the electronic billing process. This is a report that will allow the supervisory staff to review “frequently received” errors. This is an informational management tool requiring no actions on the part of the billing staff.

When is this option used?

This option can be used at any time by a supervisor or other management staff when they want to determine the reason for various errors (i.e., the same error being made by one or more of the billing staff). The report can be sorted by:

- A AUTHORIZING BILLER
- B BILLED AMOUNT
- E EPISODE OF CARE
- P PATIENT NAME
- S PATIENT SSN
- Y PAYER NAME
- C ERROR CODE

9.3.7 Return Messages Filing Exceptions

What is the purpose of this option?

After users have transmitted claims and they have been received for EDI processing, a message will be sent to the mail groups shown in the set-up section of this manual.

When is this option used?

When a message is sent, it is temporarily stored in the "EDI MESSAGES" file.

Normally, these messages are in and out of this file in a matter of seconds. If, however, a problem is detected and a message cannot be filed in the appropriate file (s) for its message type, the message will remain in this temporary file.

There are two (2) **statuses** for messages in this file.

- **Pending:** The task to force a message to update the IB files has either not yet been created or has been created, but has not yet begun to run.
- **Updating:** The task to force a message to update the IB files has started. It may or may not still be running. If you try to file a message with this status, a check is made to see if it is currently running. If it is, the message will not be re-tasked.

Any message may be viewed or printed. This does not affect the message in any way, but looking at the message may help to indicate the next course of action needed.

There are two (2) **actions** available to get these messages out of the file.

- **File Message:** This action re-executes the tasked job to update the database with the contents of the message.
- **Delete Message:** This is a drastic action that should only be taken when it has been determined there is no other possible way to process a message. When a message is deleted using this action, a bulletin is sent to the IB EDI Mail Group with the text of the message and the name of the user who deleted the message. Users must hold the IB SUPERVISOR security key to perform this action.

9.3.8 Status Message Management

What is the purpose of this option?

This option allows users to print/purge electronically returned status messages that have been in a final review status for a user-selected number of days.

When is this option used?

There will be an accumulation of status messages in a final review status. This option will delete or purge status messages in one of the Final Review statuses prior to a selected date. Auto purging of messages can also be set in the IB Site Parameters.

This report can be sorted by:

- A ALL STATUS MESSAGES
- S SELECTED STATUS MESSAGES

Selected status message reports can be run showing:

- A Auto Filed/No Review Only
- B Bill Number
- S Message Severity
- T Specific Message Text

9.3.9 Bills Awaiting Resubmission – Synonym: BAR

What is the purpose of this report?

This report lists all batches that have been resubmitted but which did not include all of the bills from the original batch. These are batches that have at least one bill still not resubmitted or canceled.

When is this option used?

When a batch is identified to have a claim in error, the batch may be re-submitted with the claim in error removed. This option will track and report specific bills in this category. The report can sort data by:

- B BILL NUMBER
- L LAST SENT DATE
- A BILLED AMOUNT
- N BATCH NUMBER (LAST SENT IN)

The report will also indicate the “Bill Transmission Status”.

9.3.10 EDI Messages Not Yet Filed –Synonym: MP

What is the purpose of this report?

This report allows you to select receipt, rejection or both message types and a minimum number of days these messages have been in a PENDING or UPDATING status before they will be included on the report. The report will then list all messages in the file that meet these criteria.

When is this option used?

This is a status report that allows for review of messages not yet filed.

9.3.11 Pending Batch Transmission Status Report – Synonym: PBT

What is the purpose of this report?

This report shows the current transmission status of a batch's mail message. It also includes the mail message number; the first and last date/time it was sent. Only batches in a pending transmission status will be on this report.

When is this option used?

This is another option to track the batch(s) of claims after authorizing and transmission to be sure all batches transmitted have been received in Austin. Users can omit both the station number prefix at the front of the batch number and the following zeroes and use only the final digits of the batch number for lookup.

9.3.12 EDI Batches Pending Receipt– Synonym: PND

What is the purpose of this report?

This report lists all batches by batch number that have been in a PENDING status and have not yet received confirmation of receipt from Austin for more than one (1) day. The report includes individual claims if the users choose to include them.

The report includes:

- Batch Number
- Transmission Date
- Mail Message #

Claims display the following:

- Claim Number
- Payer Sequence
- Balance Due
- EDI Status
- IB Status
- AR Status

Members of the G.IB EDI mail group will receive an email message when there are batches of claims that have not received a confirmation message from Austin after 1 day.

```
Subj: EDI BATCHES WAITING AUSTIN RECEIPT FOR OVER 1 DAY  [#21387]
06/19/04@19:02  6 lines
From: XXXXXXXXXXXX,XXXX X  In 'IN' basket.  Page 1  *New*
-----
There are 30 EDI batch(es) still pending Austin receipt
for more than 1 day.  Please investigate why they have not yet been confirmed
as being received by Austin.

Since there were more than 10 batches found, please run the
EDI BATCHES WAITING FOR AUSTIN RECEIPT OVER 1-DAY report to get a list of the
se batches.

Enter message action (in IN basket): Delete//
```

When is this option used?

Users may use this option to obtain Batch or Messages numbers when a problem arises or to monitor the status of batches recently transmitted. Batches should not be in a “Pending Austin Receipt” status for more than a day.

Contact IRM for assistance in finding out why a confirmation message has not been received from Austin.

Before contacting IRM, note the **Message Numbers** for the batches that you need investigated. These numbers can be found in the **PND** option.

If IRM needs assistance, log a **REMEDY ticket** or call the **National Help Desk at 1-888-596-4357**.

9.3.13 View/Print EDI Bill Extract Data – Synonym: VPE

What is the purpose of this option?

This option will display the EDI extract data for a bill.

When is this option used?

This option is used only if there is a need to determine what data was transmitted for a specific bill. The detailed extract data will contain all the elements in the flat file that is transmitted to FSC Austin. FSC Austin, in turn, translates the data to a HIPAA-compliant format for transmission to the clearinghouse.

9.3.14 Insurance Company EDI Parameter Report – Synonym: EPR

What is the purpose of this option?

This option will display the EDI Parameters of the Active Insurance Companies defined in Vista.

The contents of the following parameters will be included in this report:

- Insurance Company Name
- Street Address and City of Insurance Company
- Electronic Transmit?
- Institutional Electronic Bill ID

- Professional Electronic Bill ID
- Electronic Type
- Type of Coverage
- Always Use main VAMC as Billing Provider

All Companies Insurance Company EDI Parameter Report							Page: 1
Sorted By Ins Company Name							
Mar 21, 2005@14:03:32							
Only Blank or 'PRNT' Bill ID's = NO							VAMC
Insurance Company Name	Street Address	City	Electron Transmit	Inst ID	Prof Electronic ID Type	Type of...	Bill Prov
=====							
AETNA LIFE INSURANCE	741.. STREET	...,CA	YES-LIVE	XXXXX	Commercial	Health...	BOTH

When is this option used?

This option can be used whenever there is a need to confirm that the Insurance Company parameters are correctly defined to support the electronic transmission of claims. This option will be of value when the eClaims Plus patches are loaded and sites gain the ability to transmit secondary claims to the payers (electronic, end-to-end processing). For example, sites can use this option to make sure the payers' Electronic Bill IDs are defined.

9.3.15 Test Claim EDI Transmission Report - TCS

What is the purpose of this option?

The Claim Status Messages for claim(s) and batch(es) submitted via the RCB option as Test claims will not appear in CSA. No action will be required in response to these messages. For informational purposes, these messages will be available through the Test Claim EDI Transmission Report. This option can be used to investigate the status of test claims to see, for example, whether the transmission was accepted/rejected by FSC or accepted/rejected by the clearinghouse.

The messages in this option will be automatically purged after 60 days.

When is this option used?

This option can be used whenever a user needs to investigate the current status of a claim or batch of claims. The messages in this report will be like the messages in TPJI.

Test Claim EDI Transmission Report				Page: 1

03/17/2005@11:11:25 Bch#11719 IB,Clerk2 CIGNA HEALTHCARE (S)				

9.3.16 Third Party Joint Inquiry – Synonym: TPJI

What is the purpose of this option?

This option provides a convenient location for both claim, AR, Insurance and EDI data related to a claim.

When is this option used?

This option is used by both Integrated Billing and Accounts Receivable personnel who require information about a claim. Both AR and IB users can also add comments to an MRA Request or non-MRA Request claim using this option.

The following actions are available from TPJI

BC	Bill Charges
DX	Bill Diagnosis
PR	Bill Procedures
CB	Change Bill
ED	EDI Status
AR	Account Profile
CM	Comment History
IR	Insurance Reviews
HS	Health Summary
AL	Active List
VI	Insurance Company
VP	Policy
AB	Annual Benefits
EL	Patient Eligibility

*Patch IB*2*377 included changes to allow the addition of and the viewing of MRA Request claim comments using TPJI. Comment History now pertains to MRA Request claims as well as regular claims. MRA Request claim comments are not stored as AR comments though.*

9.3.17 Patient Billing Inquiry – Synonym: INQU**What is the purpose of this option?**

This option provides some basic information about a particular claim. It is a simple inquiry option.

When is this option used?

This option can be used to view the following type of information related to a bill:

- Bill Status
- Rate Type
- Form Type
- Visit Date(s)
- Charges
- AR Status
- Statement Dates
- Dates related to actions such as Entered, Cancelled or Printed

- Bill Number copied from or to
- Patient, Mailing and Insurance Company address

The data available varies based upon when the inquiry is made and what actions have been carried out regarding the claim.

10. APPENDIX A – BATCH PROCESSING SETUP

This page is intentionally blank for double-sided printing.

BATCH PROCESSING SETUP

The following example shows you how to define batch processing for a payer:

Step	Procedure
1	Under the IB Site Parameters, go to field [15] EDI/MRA Activated .
2	Edit fields as necessary (fields are highlighted in yellow for this example). <i>Details on each field follow the screen example.</i>
	<i>When the MRA software was loaded (Patch IB*2.0*155), the EDI/MRA Activated field was removed from this screen. Only IRM is able to access this field via Fileman. The reason for this is to prevent MRA from being activated before the FSC is ready to accept MRA transmissions from a particular site.</i>
	

```

IB Site Parameters          Aug 13, 2003@10:22:46          Page:    5 of 6
Only authorized persons may edit this data.

    Enable Automatic MRA Processing?: YES

+          Enter ?? for more actions
EP  Edit Set                      EX  Exit Action
```

EDI Contact Phone: The phone number of the person at the site contact to whom EDI inquiries will be directed. The Pay-to Provider telephone number that is defined in Section 10 for each Pay-to Provider, will be printed on the UB04 and CMS-1500 form starting with Patch IB*2.0*400.

EDI 837 Live Transmit Queue: The name of the Austin data queue that will receive claims to be processed via a live connection to the clearinghouse. These data are populated at the time of installation and would not normally be edited by the site.

EDI 837 Test Transmit Queue: The name of the Austin data queue that will receive test claims. These data are populated at the time of installation and would not normally be edited by the site.

Auto Transmit Bill Frequency: The desired number of days between each execution of the automated bill transmitter. For example, if the automated bill transmitter should run only once a week, this number would be 7. If the automated bill transmitter should run every night, then the number should be 1. If this is left blank or zero then the automated bill transmitter background job will never run.

Hours To Transmit Bills: Contains the times of the day when EDI transmission of bills should occur. A maximum of 4 daily times daily may be entered and the times must be separated by a semi-colon. Times must be entered in 4-digit military format, without punctuation (HHMM;HHMM;HHMM;HHMM). If no times are entered, EDI transmission will take place as a normal part of the nightly job.

Max # Of Bills In A Batch: The maximum number of bills allowed in a single batch. With a new payer, it is suggested that you begin with fairly small batches (10-20 claims).

Only Allow 1 Ins Co/Claim Batch: Indicates whether or not the site wishes to limit batches to claims for a single insurance company.

Last Auto-Txmt Run Date: The last date the auto transmit of bills was run at the site. These data are display only and cannot be edited.

Days To Wait To Purge Msgs: This is the number of days after an electronic status message has been marked reviewed, that the purge message option can delete it from the system.

11. APPENDIX B – GLOSSARY

This page is intentionally blank for double-sided printing.

GLOSSARY OF TERMS

835	The HIPAA adopted standard for electronic remittance advice to report the processing of all claim types (including retail pharmacy). The 835 is sent from health plans to health care providers and contains detailed information about the processing of the claim. This includes payment information and reduction or rejection reasons. The 835 transactions generally contain information about multiple claims. All health plans are required to use the same explanation of benefit codes (adjustment reason codes) and adhere to very specific reporting requirements. The term “835” is used interchangeably with electronic remittance advice.
837	The HIPAA adopted standard for electronic submission of hospital, professional and dental claims or encounters. The 837 is sent from health care providers to health plans (payers). The 837 transactions are generally multiple claims (batches). The 837 standard includes the information for coordination of benefits and is also used for secondary payer claims submission. The term “837” is used interchangeably with electronic claim.
Billing Provider Secondary ID Number	This is either the facility tax ID # (default) or an ID assigned to the facility by the insurance company.
Care Unit	Specific data related to patient care (pre-defined by an insurance company) that provides the insurance company with a finer breakdown of the care being billed. The data that comprises the breakdown are insurance company specific and are not required by all payers. (For example, Orthopedics, Dermatology, Urology, etc.)
Claim Status Message	Electronic messages returned to the VAMC providing status an information on a claim from the Financial Service Center (FSC), Clearinghouse or a payer.
Clearinghouse	A company that provides batch and real-time transaction processing services. Transactions include insurance eligibility verification, claims submission process and electronic remittance information and payment posting for electronic claims.
CSA	Claims Status Awaiting Resolution Used to reference the option used by billing staff to review the most current status messages received for a bill(s) and do follow-up on the bills. Users will be able to select a bill from the list to view the details and the entire message text as well as to

	mark the message as reviewed or under review and document user comments.
eClaim	A claim that is submitted electronically from the VA.
EDI	Electronic Data Interchange. Electronic Data Interchange (EDI) is the process of transacting business electronically. It includes submitting claims electronically (paperless claims processing), as well as electronic funds transfer and electronic inquiry for claim status and patient eligibility.
Electronic Payer	A payer that has an electronic connection with the clearinghouse.
ePayer	Payer that accepts electronic claim from the clearinghouse pays electronically. See Payer.
Facility Fed Tax ID #	This is the number that will be the default for all providers for the ID type at the facility if the payer does not have specific requirements.
Fiscal Intermediary	A fiscal intermediary performs services on behalf of health care payers. These services include claim adjudication, reimbursement and collections. Trailblazer is an example of a fiscal intermediary that acts on behalf of Medicare. Trailblazer receives claims from the VA in the form of an 837 file and then adjudicates the claims to create a MRA/EOB 835 file.
Form Types	The UB-04 or CMS-1500 billing form on which services will be billed.
FSC	The VA Financial Services Center in Austin. The Financial Service Center translates claims into an industry-standard format (HIPAA 837) and forwards claims to the clearinghouse. The FSC is the single point for the exchange of data between VistA and the clearinghouse .
Healthcare Company	See Payer.
HIPAA	Health Insurance Portability and Accountability Act. Health Insurance Portability and Accountability Act. In 1996 Congress passed into law the Health Insurance Portability and Accountability Act (HIPAA). This Act is comprised of two major legislative actions: Health Insurance Reform and Administrative Simplification. The Administrative Simplification provisions of HIPAA direct the federal government to adopt national electronic standards for automated transfer of certain health care data between health care payers, plans, and providers. This will enable the entire health care industry to communicate electronic data using a single set of standards thus eliminating all non-standard formats currently in use. Once these standards are in place, a health care provider will be able to submit a

	standard transaction for eligibility, authorization, referrals, claims, or attachments containing the same standard data content to any health plan. This will "simplify" many clinical, billing, and other financial applications and reduce costs.
Insurance Company	See Payer.
Legacy IDs	This term refers to those payer-provided or users own IDs (individual and organizational) which will eventually be made obsolete by the use of National Provider Identifiers.
LPS (formerly EPS)	Legacy Product Support
Non-VA Facility	Any facility that provides services to a VA patient and subsequently bills the VA for those services.
Non-VA Provider	Any individual provider who provides services to a VA patient and subsequently bills the VA for these services
National Provider Identifier	A standard, unique health identifier for health care providers, both individuals and organizations
Parent	The top facility in a hierarchical domain.
Payer	The insured's insurance company. Other terms that are used to denote Payer include, ePayer, insurance company, healthcare company, etc.
Payer Code	A code used for enrollment that uniquely identifies the payer.
Payer List	List of payers that consist of the payer category, claim type, payer code, and payer name.
Provider	Provider of health care services.
Provider ID	A provider ID can represent a facility or an individual physician/provider.
Taxonomy Code	<p>The Health Care Provider Taxonomy code set is a collection of unique alphanumeric codes, ten characters in length. The code set is structured into three distinct "Levels" including Provider Type, Classification, and Area of Specialization.</p> <p>The Health Care Provider Taxonomy code set allows a single provider (individual, group, or institution) to identify their specialty category.</p>
UPIN	Unique Provider Identification Number.
URL	Uniform Resource Locator.
VAMC	Veterans Affairs Medical Center.
VISN	Veterans Integrated Service Network.
