# Preface

This document is for VA procurement personnel assigned the user category of Personal Property Management Accountable Officers in the Integrated Funds Distribution, Control Point Monitoring, Accounting and Procurement (IFCAP) system.

In IFCAP, VA employees request goods and services by creating electronic requests. Those requests are funded by an operating budget called a Control Point. In IFCAP the user creates a request to purchase items. The Accountable Officer determines how the order will be filled. If the items requested are to come from a government source the order will be done as a Requisition. Orders from commercial sources will be sent to Purchasing and Contracting for processing. This manual explains how to use IFCAP as a tool to perform some of the Accountable Officer functions.

# Chapter 1. Introduction

## 1.1 The Role of the PPM Accountable Officer in IFCAP

The Personal Property Management Accountable Officer uses IFCAP to review 2237 transactions to make sure they are complete and approved by the Control Point Official for a valid control point. PPM AOs also use IFCAP to check that the vendor information is complete, and determine whether items are available from posted stock, are unposted, are services, or are non-expendable items (accountable equipment). The role of the AO encompasses many more areas than are discussed in this manual; e.g., using Consolidated Memorandum Receipt (CMRs) to take inventory of equipment for each Service, narcotics inspection, reports of survey, adjustments to inventory, etc. This manual is not an attempt to define the role of the Accountable Officer; rather, it explains how to use IFCAP to perform the simpler functions of that role.

## 1.2 How to Use This Manual

This manual explains how to perform the role of the Personal Property Management Accountable Officer in IFCAP by dividing that role into small, manageable tasks. The authors of this manual have listed these tasks in successive order so that each instruction builds on the functionality and information from the previous instructions. This will allow new IFCAP users to use this manual as a tutorial by following the instructions from beginning to end.

## 1.3 Reference Numbering System

This manual uses a special paragraph numbering system to allow users to understand how the sections of the manual relate to each other. For example, this paragraph is section 1.3. This means that this paragraph is the main paragraph for the third section of Chapter 1. If there were two subsections to this section, they would be numbered sections 1.3.1 and 1.3.2. A paragraph numbered 1.3.5.4.7 would be the seventh subsection of the fourth subsection of the fifth subsection of the third subsection of Chapter 1. All clear? Actually, this means that users that want to divide their reading into manageable lessons can concentrate on one section and all of its subsections.

## 1.4 Package Management and Security Measures

To use IFCAP to approve transactions, Information Resources Management Service gives Accountable Officers a set of IFCAP menu options designed for their use. Some of these menu options are additionally controlled by the use of access “keys”. The Information Resources Management Service at their facility administers these access keys to individual Accountable Officers. Also, each Accountable Officer uses a “signature code” that functions legally as their signature. Accountable Officers must enter this signature to review or process any request sent to them. A signature code is used to approve forms in IFCAP that would require an authorizing signature if the form was created manually.

## 1.5 Package Operation

This document explains how to use IFCAP to approve transactions. Novice users will be unfamiliar with the information that some of the IFCAP prompts require. IFCAP provides three levels of explanations for the prompts. Enter a question mark at the prompt to read a description of the prompt, two question marks to read a more detailed explanation of the prompt, and three question marks to read a complete description of the prompt and a list of acceptable responses to the prompt.

The Accountable Officer function in IFCAP requires a significant amount of knowledge and experience. The laws and policy regarding this function include, but are not limited to: VA Directives and Handbooks, Federal Property Management Regulations (FPMR), the personal property management policies of the VA Acquisition and Material Management Service, the Automated Engineering Management System/Medical Equipment Reporting System (AEMS/MERS) equipment package, and the Integrated Supply Management System (ISMS).

## 1.6 Vendor Updates

If the user chooses to add the vendor to the Vendor file, IFCAP will prompt the user for vendor information, including the FMS vendor code (which the user will leave blank) and the vendor name. IFCAP will add the vendor to the IFCAP Vendor file and transmit a "Vendor Request Query " (VRQ) transaction to FMS. FMS adds the vendor to the FMS Vendor file and transmits a “Vendor Update (VUP) confirmation to IFCAP, which updates the IFCAP vendor record of that vendor with the FMS vendor code. This helps ensure that the vendor files are consistent in both systems.

### 1.6.1 Amendment Processing

Amendments will automatically adjust Fund Control Point balances. The Classification of Request Report and Sort Group Report reflects these amendments.

# Chapter 2. How to Evaluate and Approve 2237 Transactions and Issue Book Requests

## 2.1 Introduction

This chapter explains how to evaluate and approve 2237s and issue book requests by listing steps that explain how to inspect each major section of these forms.

## 2.2 Sort the Forms by Priority

The priority of the transaction is at the top center of the first page of the 2237. If you have too many 2237s to inspect and approve in one session, sort them by their assigned priority. The priority is listed at the top of the 2237.

## 2.3 Is the Request Justified?

Read the Items and the Justification of Need or Turn-in field. Is the justification appropriate? If not, return the 2237 to the service and tell them to enter an appropriate justification.

## 2.4 Is the Date Required Reasonable?

Compare the date prepared to the date required. Is this a reasonable time frame? If not, contact the person in the Signature of Initiator field or the Signature of Approving Official field and ask them why they need it so quickly. If the date required is unreasonable, return the 2237 to the service. Read Chapter 3 on how to return 2237s.

## 2.5 Services

Fiscal Service has restrictions on which Control Points may obligate funds for certain services. Contact the Budget Section in Fiscal Service and ask them to provide you a list of legitimate services for each Control Point.

If the warehouse is one of the vendors, this transaction should be an issue book transaction. If it is not an Issue Book, but should be, return the transaction to the service and use the Comments: field to

## Chapter 6. The Logistics Data Query Tool

The Logistics Data Query Tool is designed to assist Chief Logistics Officers;; Materiel Managers; Purchasing Agents; and members of the Facility Logistics Staff (including Inventory Managers; Supply, Processing, and Distribution (SPD) Technicians; Management Analysts; Warehouse Clerks; or Supply System Analysts). The Query Tool can be used to quickly access, analyze and verify IFCAP and Prosthetics procurement data and display it using a graphical user interface to the VistA data. You can sign-on to VistA, find data, view the data, or easily move the data into a Microsoft® Excel® spreadsheet.

The Query Tool is a Windows software application that acts as a “front-end” to enable you to more easily find, display, and export VistA data. The Query Tool is an alternative to the VA FileMan utility program which has traditionally been used to look directly at the MUMPS globals (files) which store VistA data. The Query Tool enables you to...

- Search for data and display data by a range of dates
- Sort and rearrange the view of the data; display the data in a custom view
- Export the data into a Microsoft Excel spreadsheet file

Information on what the Query Tool can do for you can be found in the Logistics Data Query Tool User Manual.

The Logistics Data Query Tool User Manual is available online: at...
