

OUTPATIENT PHARMACY (PSO)

PHARMACIST'S USER MANUAL

Version 7.0 December 2007

(Revised October 2011)

Revision History

Each time this manual is updated, the Title Page lists the new revised date and this page describes the changes. If the Revised Pages column lists "All," replace the existing manual with the reissued manual. If the Revised Pages column lists individual entries (e.g., 25, 32), either update the existing manual with the Change Pages Document or print the entire new manual.

Date	Revised Pages	Patch Number	Description
10/11	i-ii, v-viii, 4, 7- 10, 36, 56-58, 64, 66, 95, 118, 120-124, 126- 127, 128-128b, 135-137, 139- 145, 146-146b, 148, 149-149b, 150-153, 154- 154b, 155-156, 165, 175-178	PSO*7*359	Added new action View Additional Reject Info (ARI) Expanded ECME Numbers to twelve digits Updated screen shots related to patch changes Added TRICARE to Glossary Corrected typos Corrected formatting errors from 11/10 reissue (S. Spence, PM; C. Smith, Tech Writer)
09/11	i,vi-vii, 30a-30f	PSO*7*382	Added information regarding the new [PSO HRC PROFILE/REFILL] option. (N. Goyal, PM; J. Owczarzak, Tech Writer)
04/11	i, viii, 8, 170a- 170d, 177-179	PSO*7*343	To add functionality to Outpatient Pharmacy for the On-Demand Displaying of FDA Medication Guides. Display FDA Medication Guide [MG] added to Other OP Actions [OTH] Updates to Index (T. Leggett, PM; B. Thomas, Tech Writer)

i

Date	Revised Pages	Patch Number	Description
04/11	i, vi, vii, viii, 5, 8, 10, 27-27b, 28, 30, 39- 39nnn, 40, 54- 54t, 58, 59, 60- 60l, 78, 82, 159, 163, 167-180	PSO*7*251	The following changes are included in this patch: -Outpatient List Manager Screen Views -Added HP and H to Hold Status -Removed DC code; Added DF,DE,DP,DD and DA -Added to Hidden Action List: IN - Removed DC code; Added DF,DE,DP,DD and DA, and - Added HP and H to Hold Status -Replaced Medication Short Profile -Inserted enhanced Order checks, Outpatient Pharmacy generated order checks -Added IN to Screen Scrape -Modified New Order Screen Scrape -Inserted Drug Allergy Screens -Updated Glossary and Index to start on odd pages (G. Tucker, PM; G. Scorca, Tech Writer)
11/10	All	PSO*7*358	Added information regarding TRICARE Active Duty Bypass/Override details (S. Spence, PM; G. Johnson, Tech Writer)

Preface

This user manual describes the functional characteristics of Outpatient Pharmacy V. 7.0. It is intended for pharmacists and technicians who are familiar with the functioning of Outpatient Pharmacy in a Veterans Affairs Medical Center (VAMC).

(This page included for two-sided copying.)

Chapter 1: Introduction

The Outpatient Pharmacy (OP) software provides a way to manage the medication regimen of veterans seen in the outpatient clinics and to monitor and manage the workload and costs in the Outpatient Pharmacy. The Pharmacy Ordering Enhancements (POE) project (patch PSO*7*46 for Outpatient Pharmacy) improves the flow of orders between Inpatient and Outpatient Pharmacy as well as between Computerized Patient Record System (CPRS) and backdoor pharmacy.

The primary benefits to the veteran are the assurance that he or she is receiving the proper medication and the convenience of obtaining refills easily. The clinicians and pharmacists responsible for patient care benefit from a complete, accurate, and current medication profile available at any time to permit professional evaluation of treatment plans. Utilization, cost, and workload reports provide management cost controlling tools while maintaining the highest level of patient care.

Documentation Conventions

This Outpatient Pharmacy V. 7.0 Manager's User Manual includes documentation conventions, also known as notations, which are used consistently throughout this manual. Each convention is outlined below.

Convention	Example		
Menu option text is italicized.	There are eight options on the <i>Archiving</i> menu.		
Screen prompts are denoted with quotation marks around them.	The "Dosage:" prompt displays next.		
Responses in bold face indicate user input.	Select Orders by number: (1-6): 5		
<enter></enter> indicates that the Enter key (or Return key on some keyboards) must be pressed.	Type Y for Yes or N for No and press <enter></enter> .		
< Tab> indicates that the Tab key must be pressed.	Press <tab></tab> to move the cursor to the next field.		
Indicates especially important or helpful information.	Up to four of the last LAB results can be displayed in the message.		
Indicates that options are locked with a particular security key. The user must hold the particular security key to be able to perform the menu option.	This option requires the security key PSOLOCKCLOZ.		

Getting Help

?, ??? One, two or three question marks can be entered at any of the prompts for online help. One question mark elicits a brief statement of what information is appropriate for the prompt. Two question marks provide more help, plus the hidden actions, and three question marks will provide more detailed help, including a list of possible answers, if appropriate.

Related Manuals

The following manuals are located on the VistA Documentation Library (VDL) at: http://www.va.gov/vdl.

Main Package Documentation:

- Outpatient Pharmacy V. 7.0 Release Notes
- Outpatient Pharmacy V. 7.0 Manager's User Manual
- Outpatient Pharmacy V. 7.0 Pharmacist's User Manual
- Outpatient Pharmacy V. 7.0 Technician's User Manual
- Outpatient Pharmacy V. 7.0 User Manual Supplemental
- Outpatient Pharmacy V. 7.0 Technical Manual/Security Guide

Additional Documentation:

2

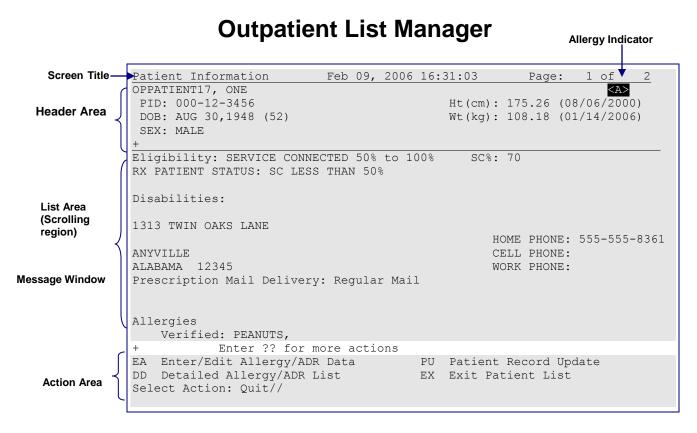

Additional documentation related to specific projects is also located on the VDL. For example, there may be several different Release Notes documents, which apply to specific projects. Also, there may be several sets of "Change Page" documents, which apply to changes made only for a specific package patch.

Chapter 2: List Manager

The screen displayed when processing an order has changed dramatically from the previous version of Outpatient Pharmacy (e.g., v. 6.0). The new screen was designed using List Manager.

This new screen gives more information and easier accessibility to vital reports and areas of a patient's chart.

Please take the time to read over the explanation of the screen and the actions that can now be executed at the touch of a key. This type of preparation before attempting to use List Manager will reduce the time and effort needed to become skilled in order processing with this new version of List Manager.

Screen title: The screen title changes according to what type of information List Manager is

displaying (e.g., Patient Information, Medication Profile, New OP Order

(ROUTINE), etc.).

Allergy indicator: This indicator displays when there has been information entered into the ALLERGY

field for the patient. The indicator displays "NO ALLERGY ASSESSMENT" if there

is no allergy assessment for the patient.

Header area: The header area is a "fixed" (non-scrollable) area that displays patient information.

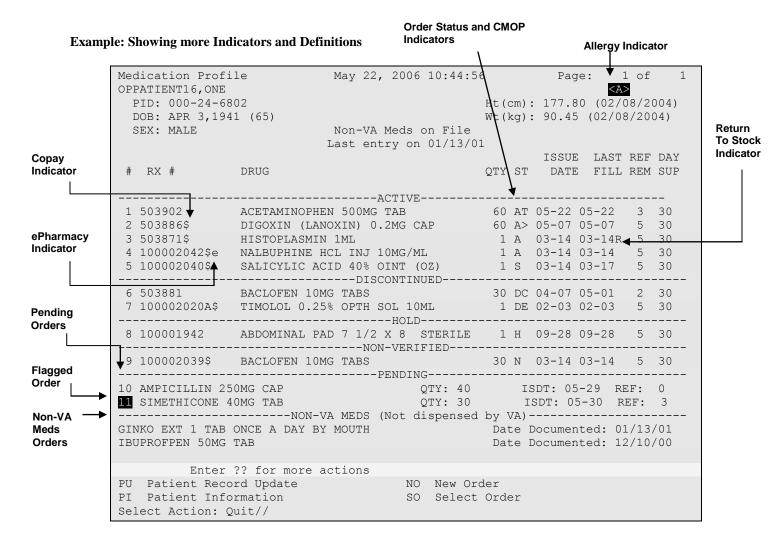

List area: (scrolling region) This area scrolls (like the previous version) and displays the

information on which action can be taken.

Message window: This section displays a plus (+) sign, minus (-) sign, or informational text (i.e., Enter ?? for more actions). If a plus sign is entered at the action prompt, List Manager will "jump" forward a page. If a minus sign is displayed and entered at the action prompt, List Manager will "jump" back a screen. The plus and minus signs are only valid actions if they are displayed in the message window.

Action area:

A list of actions display in this area of the screen. If a double question mark (??) is entered at the "Select Item(s)" prompt, a "hidden" list of additional actions that are available will be displayed.

All orders are sub-grouped by like statuses and then listed alphabetically within the sub-group.

Order Status: The current status of the order. These statuses include:

A Active S Suspended

N Non-Verified or Drug Interactions

HP Placed on hold by provider through CPRSH Placed on hold via backdoor Pharmacy

E Expired

DA Auto discontinued due to admission
DP Discontinued by provider through CPRS

The Status column may also reflect the type of Discontinue action performed on the order:

DF Discontinued due to edit by a provider through CPRS DE Discontinued due to edit via backdoor Pharmacy

DC Discontinued via backdoor Pharmacy

DD Discontinued due to death

A "B" will be appended to the above statuses if the Bad Address Indicator was set and there was no active temporary address at the time of the last label activity.

CMOP Indicators: There are two separate indicators when the drug in an order is marked for

Consolidated Mail Outpatient Pharmacy (CMOP) processing. This indicator is

displayed after the Order Status if applicable.

> Drug for the prescription is marked for CMOP

T Displayed when the last fill is either in a Transmitted or Retransmitted

CMOP state. (This indicator can overwrite the ">" indicator.

Copay Indicator: A "\$" displayed to the right of the prescription number indicates the prescription

is copay eligible.

ePharmacy Indicator An 'e' displayed to the right of the prescription number indicates that

the prescription is electronic third-party billable.

Return to Stock Indicator:

An "R" displayed to the right of the Last Fill Date indicates the last fill

was returned to stock.

Pending Orders: Any orders entered through CPRS, or another outside source, that have not been

finished by Outpatient Pharmacy.

Non-VA Meds Orders: Any over the counter (OTC) medications, herbal supplements, medications prescribed by providers outside the VA, and medications prescribed by the VA, but purchased by the patient at an outside pharmacy are displayed here. Non-VA

but purchased by the patient at an outside pharmacy are displayed here. Non-VA Meds orders cannot be placed or updated in Outpatient Pharmacy. The user can input information about a patient's use of Non-VA Meds only through CPRS. However, the user can use either CPRS or Outpatient Pharmacy menu options to

view Non-VA Meds data in a patient's medical records.

Third Party Rejects

Any prescriptions that are rejected by third-party payers because of Refill Too Soon (code 79) or Drug Utilization Review (DUR - code 88) are displayed in this section.

Example: Showing Rejected Prescriptions

Using List Manager with Outpatient Pharmacy

List Manager is a tool designed so that a list of items can be presented to the user for an action.

For Outpatient Pharmacy, the List Manager does the following:

- Allows the pharmacist or technician to browse through a list of actions
- Allows the pharmacist or technician to take action against those items
- Allows the user to select an action that displays an action or informational profile
- Allows the user to select a different action without leaving an option.

Entering Actions

Actions are entered by typing the name(s), or synonym(s) at the "Select Item(s)" prompt. In addition to the various actions that may be available specific to a particular option, List Manager provides generic actions applicable to any List Manager screen. A double question mark (??) may be entered at the "Select Action" prompt for a list of all actions available. The following is a list of generic List Manager actions with a brief description. The synonym for each action is shown in brackets following the action name. Entering the synonym is the quickest way to select an action.

Action Next Screen [+]	Description Move to the next screen (may be shown as a default).
Previous Screen [-]	Move to the previous screen.
Up a Line [UP]	Move up one line.
Down a Line [DN]	Move down one line.
Shift View to Right [>] characters.	Move the screen to the right if the screen width is more than 80
Shift View to Left [<]	Move the screen to the left if the screen width is more than 80 characters.
First Screen [FS]	Move to the first screen.
Last Screen [LS]	Move to the last screen.

Action Description

Go to Page [GO] Move to any selected page in the list.

Re Display Screen [RD] Redisplay the current.

Print Screen [PS] Prints the header and the portion of the list currently displayed.

Print List [PL] Prints the list of entries currently displayed.

Search List [SL] Finds selected text in list of entries.

Auto Display (On/Off) [ADPL]

automatically.

Toggles the menu of actions to be displayed/not displayed

Quit [QU] Exits the screen (may be shown as a default).

Outpatient Pharmacy Hidden Actions

The Outpatient Pharmacy hidden actions will display with the previous hidden actions once a completed or finished order is selected and a double question mark (??) is entered at the "Select Action" prompt.

The following hidden actions appear on the Medication Profile screen and can only be applied to one order at a time.

Action Description

Activity Logs [AL] Displays the Activity Logs.

Copy [CO] Allows the user to copy and edit an order.

DIN Displays available drug restriction/guideline information for the

Dispense Drug and Orderable Item associated with the selected

medication order.

IN Intervention Menu

Hold [HD] Places an order on a hold status.

Other OP Actions [OTH] Allows the user to choose from the following sub-actions:

Progress Note [PN], Action Profile [AP],

Print Medication Instructions [MI], Display Orders' Statuses [DO], Non-VA Meds Report [NV], or Display FDA Medication Guide [MG]. **Action Description**

Patient Information [PI] Shows patient information, allergies, adverse reactions, and

pending clinic appointments.

Pull Rx [PP] Action taken to pull prescription(s) early from suspense.

Reprint [RP] Reprints the label.

View Reject [REJ] Allows the user to view and resolve the Refill Too Soon or Drug

Utilization Review returned by the third party payer for a

specific prescription/fill claim.

Unhold [UH] Removes an order from a hold status.

Verify [VF] Allows the pharmacist to verify an order a pharmacy technician

has entered.

Speed Actions

These Outpatient Pharmacy actions are referred to as "speed actions" and appear on the Medication Profile screen. These actions can be applied to one or more orders at a time.

ActionDescriptionReprint [RP]Reprints the label.

Renew [RN] A continuation of a medication authorized by the provider.

Refill [RF] A second or subsequent filling authorized by the provider.

Reprint Signature [RS] Reprints the signature log.

Discontinue [DC] Status used when an order was made inactive either by a new

order or by the request of a physician.

Release [RL] Action taken at the time the order is filled and ready to be given

to the patient.

Pull Rx [PP] Action taken to pull prescription(s) early from suspense.

Inpat. Profile [IP] Action taken to view an Inpatient Profile.

CM Action taken to manually queue to CMOP.

Fill/Rel Date Disply [RDD] Switch between displaying the FILL DATE column and the

LAST RELD column.

Display Remote [DR] Action taken to display a patient's remote prescriptions.

Other Outpatient Pharmacy ListMan Actions

Action Description

Exit [EX] Exit processing pending orders.

AC Accept.

BY Bypass.

ED Edit.

FN Finish.

Other Screen Actions

Action Description

Edit/Enter Allergy/ADR Data [EA] Provides access to the Adverse Reaction Tracking package to

allow entry and/or edit of allergy adverse reaction data for the

patient. See the Adverse Reaction Tracking package

documentation for more information on allergy/ADR processing.

Detailed Allergy Display [DA] Displays a detailed listing of the selected item from the patient's

allergy/ADR list. Entry to the Edit Allergy/ADR Data action is

provided with this list also.

Patient Record Update [PU] Allows editing of patient data such as SSN, birth date, address,

phone, and outpatient narrative. Patient data can also be updated using the *Update Patient Record* menu option. If implementing Other Language Modifications, either can be used to set a

patient's other language preference.

New Order [NO] Allows new orders to be entered for the patient.

Exit Patient List [EX] Exit patient's Patient Information screen so that a new patient

can be selected.

View Addtnl Rej Info [ARI] Displays additional reject information from the payer, if

available. This hidden action is available from the Reject

Information screen.

Chapter 3: Using the Pharmacist Menu

The options on the *Pharmacist Menu* are intended for use by pharmacists.

Example: Accessing the Pharmacist Menu

```
Select OPTION NAME: PSO USER1 Pharmacist Menu
Outpatient Pharmacy software - Version 7.0
```

The following options are available on the *Pharmacist Menu*:

- Bingo Board User ...
- Change Label Printer
- Change Suspense Date
- DUE Supervisor ...
- Enter/Edit Clinic Sort Groups
- External Interface Menu ...
- Medication Profile
- Pharmacy Intervention Menu ...
- Print from Suspense File
- Process Drug/Drug Interactions
- Pull Early from Suspense
- Queue CMOP Prescription
- Release Medication
- Return Medication to Stock
- Rx (Prescriptions) ...
- Update Patient Record
- Verification ...

Patient Lookup

The ability to look up a patient by prescription number or wand a barcode with the prescription has been added to the patient lookup prompt on the following options.

- Bingo Board User ... [PSO BINGO USER]
- *Medication Profile* [PSO P]
- Rx (Prescriptions) ... [PSO RX]
- *Update Patient Record* [PSO PAT]

The help text for patient lookup reads as follows.

```
Enter the prescription number prefixed by a # (ex. #XXXXXXX) or Wand the barcode of the prescription. The format of the barcode is NNN-NNNNNN where the first 3 digits are your station number.

OR -

Answer with PATIENT NAME, or SOCIAL SECURITY NUMBER, or last 4 digits of SOCIAL SECURITY NUMBER, or first initial of last name with last 4 digits of SOCIAL SECURITY NUMBER

Do you want the entire NNNNNNNN-Entry PATIENT List?
```

Chapter 4: Using the Bingo Board

This chapter describes the options available on the Bingo Board User menu.

Bingo Board User

[PSO BINGO USER]

The *Bingo Board User* menu enables use of the bingo board display. The options on this menu allow a patient's name or a number to be displayed, entered, or removed from the bingo board display located in the pharmacy area.

When the routing for an order is set to "Window", the entering of prescription orders stores information in the bingo board PATIENT NOTIFICATION (Rx READY) file. For new, renew, pull early from suspense, refill orders, barcode refill/renew, and finish process for orders entered via CPRS, the date and time is captured when the order is stored in this file. The same occurs for partials, except the time is captured when a prescription number is entered.

Releasing the prescription places the name or ticket number of the patient on the bingo board monitor if a display group exists and stores data in the WAITING TIME file. The options on this menu are used to manually enter, display, or remove a patients name or number from the monitor.

The following options are available on the *Bingo Board User* menu:

- Enter New Patient
- Display Patient's Name on Monitor
- Remove Patient's Name from Monitor
- Status of Patient's Order

Enter New Patient

[PSO BINGO NEW PATIENT]

Use this option to manually enter the name of a new patient on the bingo board. Each prescription number for the patient's order must also be entered.

A "Ticket #" prompt displays if ticket number was chosen as the method of display in the *Enter/Edit Display* option on the *Bingo Board Manager* menu. Enter the ticket number and at the next prompt enter each of the prescription numbers for that patient.

Display Patient's Name on Monitor

[PSO BINGO DISPLAY PATIENT]

Use this option to begin displaying the name or number of a patient whose prescription is ready. The message, "PRESCRIPTIONS ARE READY FOR:" has been added as fixed text to the display screen. Remove Patient's Name from Monitor

[PSO BINGO DELETE PATIENT]

After the patient picks up the prescription, remove the name or ticket number from the display either manually or through the barcode reader.

It is recommended that a patient's name be removed from the monitor as soon as the prescription is picked up.

Status of Patient's Order

[PSO BINGO STATUS]

This option enables checking of the number of prescriptions a patient has ready, the division, time in/time out, and the prescription number(s). There are four possible statuses:

Status	Description
Pending	Active order input via CPRS that is in the PENDING OUTPATIENT ORDERS file.
Being Processed	Order that is in the PATIENT NOTIFICATION (Rx READY) file, but not displayed.
Ready For Pickup	Order that is in the PATIENT NOTIFICATION (Rx READY) file and is being displayed.
Picked Up	Order that has been picked up.

Example: Status of Patient's Order

```
Select Bingo Board User Option: Status of Patient's Order
Enter Patient Name: OPPATIENT17, ONE
                                          08-30-48 000123456 NO
                                                                        NSC
VETERAN
        OPPATIENT17, ONE has the following orders for 10/31/06
Being Processed: ***Entered on OCT 31, 2006***
     Division: GENERAL HOSPITAL Time In: 10:27 Time Out:
    Rx #: 500416,
Pending:
    Orderable Item: ACETAMINOPHEN Provider: OPPROVIDER24, TWO Entered By: OPCLERK28, FOUR Time In: 10/31/06@06:46
    Drug: ACETAMINOPHEN 325MG TAB UD
                                               Routing: MAIL
Ready For Pickup:
     Division: GENERAL HOSPITAL Time In: 10:36
                                                    Time Out: 10:46
     Rx #: 1022731,
Enter Patient Name: <Enter>
```

Chapter 5: Changing the Label Printer

This chapter describes the Change Label Printer option.

Change Label Printer

[PSO CHANGE PRINTER]

This option allows the user to change the printer to which labels are printed.

```
Select Outpatient Pharmacy Manager Option: Change Label Printer
Select LABEL PRINTER: LABELPRT2// <Enter> LABELPRT2

OK to assume label alignment is correct? YES//<Enter>
```

(This page included for two-sided copying.)

Chapter 6: Changing the Suspense Date

This chapter describes the Change Suspense Date option.

Change Suspense Date

[PSO PNDCHG]

This option allows the suspense date to be changed for a specific prescription or all prescriptions for a patient. The new suspense date will become the fill/refill date automatically. The opportunity is also given to delete a specific prescription, or all prescriptions for a patient, from suspense while in this option. If a refill is deleted from suspense that has not yet been printed, the refill information will be deleted from the prescription, and the various fill dates will be adjusted accordingly. This option does not produce a label.

When processing a drug/drug interaction, the profile will list the status of the interacting drugs as pending (P).

(This page included for two-sided copying.)

Chapter 7: Evaluating Drug Usage

This chapter describes the options on the *DUE Supervisor* menu.

DUE Supervisor

[PSOD SUPERVISOR]

This menu provides options to create a questionnaire based on the criteria of a Drug Usage Evaluation. An answer sheet can also be printed for the provider's use in answering the questionnaire. The answer sheet can be distributed to the clinic so that the provider may complete it when ordering a medication being evaluated. An answer sheet can also be generated (optional) when a patient's Action Profile prints, if the profile contains a medication being evaluated. The provider's responses can be entered into the DUE ANSWER SHEET file.

The following options are available on the *DUE Supervisor* menu:

- 1 Enter a New Answer sheet
- 2 Edit an Existing Answer Sheet
- 3 Create/Edit a Questionnaire
- 4 Batch Print Questionnaires
- 5 DUE Report

Enter a New Answer Sheet

[PSOD CREATE ANSWER SHEET]

In this option the user enters answers to a DUE Questionnaire. This creates an answer sheet entry in the DUE ANSWER SHEET file. These answer sheets can be kept online for statistical and/or compliance studies. Answer sheets are stored in the file using a sequence number. This number is automatically generated by the computer and should be written on the hard copy of the answer sheet immediately so that it can be used later in editing or deleting the entry.

Edit an Existing Answer Sheet[PSOD EDIT ANSWER SHEET]

Edit a DUE Answer Sheet entry using this option. Ordinarily, the sequence number is available when editing the Answer Sheet; however, the file can be searched if the provider, drug, or questionnaire is known by typing 'S at the "SEQUENCE NUMBER" prompt. The search displays all of the entries containing the combination of provider, drug, or questionnaire used in the search.

Create/Edit a Questionnaire[PSOD DUE BUILD QUESTIONNAIRE]

To create a questionnaire, first select one or more drugs being evaluated. After selecting the drugs, create a set of questions to be used on the questionnaire. These questions do not have to be added to the DUE QUESTION file since they are being added through this option. The questionnaire must be marked as "Active" and "Active for Profiles" for the Answer Sheet to automatically print with the Action Profiles. A summary can be printed for the questionnaire using the *DUE Report* option. For this reason, when creating a questionnaire, the user should strive to make each question a yes, no, or unknown type question. Questions having a free text or numeric type answer are ignored in the summary.

The PRINT DUE QUESTIONNAIRE site parameter needs to be set to "YES" for the questionnaire to print with the Action Profile.

Batch Print Questionnaires[PSOD BATCH PRINT QUESTIONNAIRE]

To print a blank for of a selected questionnaire, enter the number of copies and a printer device. These questionnaire answer sheets can be distributed to providers to complete when ordering medications being evaluated.

DUE Report[PSOD DUE SORT AND PRINT]

This report displays entries from the DUE ANSWER SHEET file. A summary of this report, showing the number of answer sheets, number of questionnaires, and a breakdown of all yes/no/unknown type questions is available. This breakdown shows each question number and the number of times it was answered yes/no/unknown, or unanswered. For this reason, when creating a questionnaire, the user should strive to make each question a yes, no, or unknown type question. Questions having a free text or numeric type answer are ignored in the summary.

Chapter 8: Enter/Edit Clinic Sort Groups

This chapter describes the Enter/Edit Clinic Sort Groups option.

Enter/Edit Clinic Sort Groups

[PSO SETUP CLINIC GROUPS]

This option enables a group of clinics to be identified that will print together for the action/informational profiles.

Example: Enter/Edit Clinic Sort Groups

```
Select Pharmacist Menu Option: ENTer/Edit Clinic Sort Groups
Select Clinic Sort Group: ?
Answer with OUTPATIENT CLINIC SORT GROUP NAME
Choose from:
  CLINIC 1
  Clinic 2
    You may enter a new OUTPATIENT CLINIC SORT GROUP, if you wish
    Answer must be 3-30 characters in length.
Select Clinic Sort Group: CLINIC 3
 Are you adding 'CLINIC 3' as
   a new OUTPATIENT CLINIC SORT GROUP (the 6TH)? Y < Enter> (Yes)
NAME: CLINIC 3// <Enter>
Select SORT GROUPS: ?
Answer with SORT GROUP SORT GROUPS
    You may enter a new SORT GROUP, if you wish
    Enter name of clinic to be included in the sort group.
Answer with HOSPITAL LOCATION NAME, or ABBREVIATION
Do you want the entire 122-Entry HOSPITAL LOCATION List? N
Select SORT GROUPS: 2 EAST
 Are you adding '2 EAST' as a new SORT GROUP (the 1ST for this OUTPATIENT
CLINIC SORT GROUP) ? Y (Yes)
Select SORT GROUPS: < Enter>
```

(This page included for two-sided copying.)

Chapter 9: Using the Interface Menu

This chapter describes the options on the External Interface Menu.

This menu is locked with the PSOINTERFACE lock. The PSOINTERFACE key should be assigned to all persons responsible for performing these functions.

External Interface Menu

[PSO EXTERNAL INTERFACE]

This menu contains the following options for using an external interface device.

- Purge External Batches
- Reprint External Batches
- View External Batches

Purge External Batches

[PSO INTERFACE PURGE]

This option purges entries from the PHARMACY EXTERNAL INTERFACE file.

Example: Purge External Batches

```
Select External Interface Menu Option: Purge External Batches
Enter cutoff date for purge of External Interface file: 022807 (FEB 28, 2007)

Purge entries that were not successfully processed? NO// <Enter>

Purge queued to run in background.

Select External Interface Menu Option:
```

Reprint External Batches

[PSO INTERFACE REPRINT]

This option enables the reprinting of labels for batches of prescriptions that have been sent to the external interface.

Example: Reprint External Batches

```
Select External Interface Menu Option: Reprint External Batches
Enter a date/time range to see all batches sent to the External Interface.
Start date/time: 022807 (FEB 28, 2007)
End date/time: 030707 (MAR 07, 2007)
Gathering batches, please wait...
 BATCH QUEUED TO PRINT ON: PATIENT: ALBANY
 1 FEB 28,2007@08:06:14 OPPATIENT12,ONE
2 FEB 28,2007@08:10:56 OPPATIENT12,ONE
3 FEB 28,2007@08:19:20 OPPATIENT22,ONE
4 FEB 28,2007@08:38:17 OPPATIENT28,ONE
5 FEB 28,2007@08:50:32 OPPATIENT9,ONE
6 FEB 28,2007@09:15:35 OPPATIENT9,ONE
7 FEB 28,2007@09:33:48 OPPATIENT18,ONE
8 FEB 28,2007@09:39:31 OPPATIENT1,ONE
9 FEB 28,2007@10:36:51 OPPATIENT1,ONE
10 FEB 28,2007@13:37:24 OPPATIENT4,ONE
11 FEB 28,2007@13:46:07 OPPATIENT8,ONE
Select Batch(s) to reprint: (1-11): 5,6
Batches selected for Reprint are:
Batch 5 Queued for FEB 28,2007@08:50:32 by OPPHARMACIST4, THREE
Batch 6 Queued for FEB 28,2007@09:15:35 by OPPHARMACIST4, THREE
Before Reprinting, would you like a list of these prescriptions? N// < Enter> 0
Are you sure you want to Reprint labels? Y// <Enter> YES..
Select LABEL DEVICE: [Select Print Device]
LABEL(S) QUEUED TO PRINT!
Select External Interface Menu Option:
```

View External Batches

[PSO INTERFACE VIEW]

With this option, batches of prescriptions that have printed from the external interface can be viewed.

Example: View External Batches

```
Select External Interface Menu Option: View External Batches

Enter a date/time range to see all batches sent to the External Interface.

Start date/time: 022807 (FEB 28, 2007)

End date/time: 030707 (MAR 07, 2007)

Gathering batches, please wait...
```

Chapter 10: Using the Medication Profile

This chapter describes the Medication Profile, its different formats, and how it can be used in patient care.

Medication Profile

[PSO P]

The Medication Profile displays a profile of all prescriptions on file for a particular patient. The prescription display includes all Non-VA Med orders also. The user may view this information directly on the screen or request it to be printed. The medication profile is available in two formats: short or long.

Medication Profile: Short Format

The short format displays the following information:

•	patient name	•	DOB
•	eligibility	•	narrative
•	reactions	•	prescriptions
•	prescription number	•	drug name
•	Sig	•	status
•	quantity	•	issue date

C4-4--/D--------

last fill date

• refills remaining.

address

The short report format of the fields for Non-VA Med orders include the drug name or orderable item name, dosage, schedule and date documented.

The short format displays the status in an abbreviated form. The following is an explanation of the codes:

Code	Status/Description
A	Active
В	Bad Address Indicated
DF	Discontinued due to edit by a provider through CPRS
DE	Discontinued due to edit via backdoor Pharmacy
DP	Discontinued by provider through CPRS
DC	Discontinued
DD	Discontinued due to death
DA	Auto discontinued due to admission
E	Expired
HP	Placed on hold by provider through CPRS
Н	Placed on hold via backdoor Pharmacy
N	Non Verified
P	Pending due to drug interactions
S	Suspended
\$	Copay eligible
E	third-party electronically billable

Returned to stock prescription (next to last fill date)

R

For the *Patient Prescription Processing, Complete Orders from OERR*, and *Action Profile (132 COLUMN PRINTOUT)* options, if a temporary address has no end date, the following text is displayed in the Status column: "(Temp address from XXX 99,9999 till (no end date))".

(This page included for two-sided copying.)

Medication Profile: Long Format

The long format displays all information contained on the short format as well as the following additional fields:

- physician's name
- fill date
- dates of refills/partial fills
- whether the prescription was filled at the pharmacy window or by mail
- clerk code
- total allowable refills
- which division filled it

The long report format of the fields for Non-VA Med orders include the start date, CPRS order #, status, documented by, order check(s), override reason, override provider, and statement of explanation.

The Intervention menu hidden action has been included in the Patient Information, the Medication Profile and Detailed Order ListMan screens when utilizing the following options:

- Patient Prescription Processing [PSO LM BACKDOOR ORDERS]
- Complete Orders from OERR [PSO LMOE FINISH]
- Edit Prescriptions [PSO RXEDIT]

See "Using The Pharmacy Intervention Menu" for more details.

Medication Profile and Refill

[PSO HRC PROFILE/REFILL]

This option was originally requested by the Health Resource Center (HRC) to provide a new standalone option similar to that of the ePharmacy Medication Profile (View Only) [PSO PMP] option for the Compensation and Pension Record Interchange (CAPRI) system. It allows users to view a medication profile as well as refill prescriptions for a specific patient.

Example 1: Medication Profile with default view

This response must be a list or range, e.g., 1,3,5 or 2-4,8.

Select Orders by number: (1-16): 2

FILL DATE: (5/2/2011 - 11/2/2011): TODAY// (JUL 12, 2011)

MAIL/WINDOW: MAIL// MAIL

Now refilling Rx# 100004113 Drug: AMITRIPTYLINE 10MG TAB

Qty: 120 Sig: TAKE ONE TABLET BY MOUTH FOUR TIMES A DAY

RX# 100004113 has been suspended until 07-12-11.
```

NOTE: The system has the flexibility to sort the Medication Profile by different columns (RX, drug name, date, etc). When selecting a range of prescriptions from the Medication Profile to be refilled, selection is not limited to active prescriptions. If discontinued or expired prescriptions are included in a range, the system will display a message stating the status of each prescription as they are processed within the range. For example:

Cannot refill Rx # 100002897, Rx is in DISCONTINUED status.

(This page included for two-sided copying.)

Chapter 11: Using the Medication Reconciliation Tools

This chapter describes the tools available to perform Medication Reconciliation functions via the CPRS Reports tab and CPRS Notes tab.

Medication Reconciliation

The Medication Reconciliation functions may be performed via the use of four tools. The tools utilize Health Summary components and Text Integrated Utility (TUI) data objects to create a list of current medications. These Medication Reconciliation tools also leverage the Remote Data Interoperability (RDI) software to include medication data from other sites.

Tool 1 is a Medication Reconciliation Profile health summary component. This report creates an alphabetical list of outpatient prescriptions, unit dose medications, documented non-VA medications, and remote VA medications. This summary can be used at transition points in a patient's care, (admission, discharge, etc.) to identify medications that need to be continued, new items to be ordered, old items to be discontinued, or orders that need to be changed.

Tool 2 is a Medication Worksheet component. This report provides a grid-formatted list of active and pending medications suitable for giving to a patient at a clinic visit or upon discharge from the hospital.

Tool 3 is a TIU data object provided as an alternative to the Medication Chart health summary process. The unique aspect of this object is that the list, generated for the patient, includes recently expired medications but not recently discontinued medications.

Tool 4 is a series of TIU data objects and health summary components that retrieve remote active medications and remote allergy/ADR data.

For a complete list of functionality, please refer to Medication Reconciliation Tools Implementation Guide. Upon completion of the steps listed in the Implementation Guide, users will be able to retrieve reports useful for Medication Reconciliation by selecting the newly created Health Summaries on the CPRS Reports tab or by using the newly created TIU templates and objects from the CPRS Notes Tab's Templates Drawer and/or any progress note titles in which they have been embedded.

(This page included for two-sided copying.)

Chapter 12: Using the Pharmacy Intervention Menu

This chapter describes the options in the *Pharmacy Intervention Menu*.

This menu is locked with the PSORPH key.

Pharmacy Intervention Menu

[PSO INTERVENTION MENU]

The *Pharmacy Intervention Menu* enables the user to enter, edit, print, delete, or view interventions in the APSP INTERVENTION file.

The following options are available on this menu:

- Enter Pharmacy Intervention
- Edit Pharmacy Intervention
- Print Pharmacy Intervention
- Delete Intervention
- View Intervention

Enter Pharmacy Intervention

[PSO INTERVENTION NEW ENTRY]

When it is necessary to interrupt the filling of a prescription to contact the provider in order to change, clarify, or cancel the prescription, use this option to add a new intervention entry into the APSP INTERVENTION file.

Edit Pharmacy Intervention[PSO INTERVENTION EDIT]

Using this option, an already existing entry in the APSP INTERVENTION file can be edited.

Print Pharmacy Intervention [PSO INTERVENTION PRINTOUT]

Print a captioned printout of pharmacy interventions for a certain date range with this option. The report prints out on normal width paper and can be queued to print at a later time.

The subtotal on this report represents the number of interventions for a specific type of intervention where the recommendation for the intervention was accepted. The total is the sum of all interventions in which the recommendation was accepted.

The sub count on this report is the number of interventions for a specific type of intervention over the specific date range. The count is the total number of all interventions over the specific date range.

Delete Intervention

[PSO INTERVENTION DELETE]

This option can be used to delete an intervention from the APSP INTERVENTION file. An intervention can be deleted only on the same day that it was entered.

View Intervention

[PSO INTERVENTION VIEW]

This option displays pharmacy interventions in a captioned format on the screen. More than one intervention can be viewed at a time.

Chapter 13: Print from Suspense File

This chapter describes the *Print from Suspense File* option used for printing suspended prescriptions.

Print from Suspense File

[PSO PNDLBL]

This option allows the user to print labels from the RX SUSPENSE file. First, enter the "Print Through" date. Any prescriptions with a suspense date on or before the date entered will print. Additionally, if a patient has at least one prescription on or before the date entered, any other prescriptions for that patient that are in suspense will be printed for the site parameter specified number of days to be pulled from suspense.

For example, if today's date is entered and Patient A has a prescription to be printed through the that date, all of Patient A's prescriptions between the date entered plus the number of days set in the local site parameter will be printed. If there are no prescriptions for Patient A through the date entered, no labels will print.

Labels can be sorted by the patient name, the SSN, or the DEA Special Handling code. If sorted by DEA, the labels must then sort by patient name or SSN. Sorting by DEA will send the labels to the printer in three groups:

- **First group** will contain all the prescriptions with drugs that contain an "A" (narcotics and alcoholics) or a "C" (controlled substances-non narcotic) in the DEA Special Handling field.
- **Second group** will contain all the prescriptions with drugs containing an "S" (supply) in the DEA Special Handling field.
- **Third group** will contain all others. If a patient has prescriptions in suspense that fall in all three categories, that patient's labels will be printed three times, once in each group.

Only one job is tasked for all of the prescriptions in the batch; therefore, if the job is queued by mistake, only one tasked job must be undone. Any prescription that is put in suspense for the "Print Through Date" between the times the job was queued until the time it actually runs will be included in the job.

Labels for each job printed from suspense will be part of a batch. Each batch is identified by the Division, the user who queued the batch, and the date/time that the job was queued to begin.

Prescriptions pulled early from suspense will not be part of a batch, so they will not be able to be reprinted through the *Reprint Batches from Suspense* option.

A short profile for every patient for whom a label for a new prescription is being printed will also be printed if the local Profile with New Prescriptions site parameter is set to Yes.

If a patient has partial prescriptions with regular fills, only one set of trailing documents will print for that patient. (In V. 6.0 trailer documents were printed after each partial.)

If a prescription is determined to be an ePharmacy prescription (e.g., third party electronically billable), an electronic claim will be sent by the Electronic Claims Management Engine (ECME) to the third party payer. The communication events between Outpatient Pharmacy and ECME are recorded in the ECME Log section of each prescription. The ECME log can be viewed in the patient Medication Profile screen (Activity Log option - AL) and also from the View Prescriptions option. If the claim submission returns a Refill Too Soon (79) or Drug Utilization Review (88) reject, the label is not printed for the prescription and it is moved to the Refill Too Soon/DUR section of the patient Medication Profile screen until the user resolves the reject. The prescription will also display on the Third Party Payer Reject worklist.

3/4 Days Supply Hold

Sites were seeing a great number of refill-too-soon third party claim rejections due to prescriptions being filled too early. To help prevent this for ePharmacy prescriptions, the system will now verify that ¾ of the days supply has elapsed on the previous fill before the prescription may be refilled. The following list describes the changes.

- ePharmacy prescriptions are delayed from being sent to CMOP and printed for local mail until ¾ of the days supply has elapsed.
- An activity log entry will state the date/time that the Rx will be allowed to be removed from suspense. The activity log will be defined on the initial evaluation. The following is an example of the log entry:

```
4 06/18/08 SUSPENSE REFILL 2 OPHARM, ONE Comments: 3/4 of Days Supply SUSPENSE HOLD until 6/20/08.
```

• The Pull Early from Suspense function is not impacted by this added functionality. Users may pull these type prescriptions early from suspense.

Host Errors

Prescriptions (ePharmacy only) will be prevented from being filled/sent to CMOP when a host processing error occurs as a claim is submitted through ECME. Host processing errors are identified by reject codes M6, M8, NN, and 99 which are returned by the third party payer. The following conditions apply when this scenario occurs.

- The transmission of the prescription fill will be delayed 1 day in hopes that the host processing issues will be resolved by the third party payer.
- An activity log entry will state the date/time along with a comment stating that the Rx/fill was left in suspense hold due to a host processing error. The following is an example of the log entry:

```
2 06/25/08 SUSPENSE ORIGINAL OPPHARM, TWO
Comments: SUSPENSE HOLD until 6/26/08 due to host reject error.
```

• The Pull Early from Suspense function is not impacted by this added functionality. Users may pull these type prescriptions early from suspense.

There is no user interaction for this function. It initiates when the Print from Suspense [PSO PNDLBL] option is initiated for CMOP prescriptions.

(This page included for two-sided copying.)

Chapter 14: Processing Interactions

This chapter describes the option used for processing drug interactions.

Process Drug/Drug Interactions

[PSO INTERACTION VERIFY]

Using this option, information for medications that have been marked as a drug/drug interaction can be processed. This allows prescriptions with drug/drug interactions to be processed, deleted, or bypassed. To complete any of these actions, an assigned signature code, which will not appear on the screen, must be entered. It will then be verified or non-verified. The *Electronic Signature code Edit* option can be found under the *User's Toolbox* menu in Kernel V. 8.0.

When processing a drug/drug interaction the profile will list the status of the interacting drug orders as pending (P).

This section describes the Drug/Drug Interaction enhancements made to the Outpatient Pharmacy application included in PSO*7*251.

Legacy VistA Drug/Drug Interactions have been enhanced to utilize First DataBank's (FDB) Drug Information Framework (DIF) business rules, APIs and database to provide more clinically relevant Drug Interaction information. No changes have been made to the existing user actions for critical or significant Drug Interactions. The pharmacist will have to log an intervention for local, pending and remote critical interactions and have the option of logging an intervention for local and remote significant interactions. No action is required for Non-VA medications orders.

FDB custom Drug Interaction tables will be used to store custom changes to FDB standard reference Drug Interaction tables. FDB Drug Interactions that are designated as critical in VistA will have their severity level modified to '1'. All FDB Drug Interactions that are designated as significant in VistA will have their severity level modified to '2'. Any Drug Interaction in VistA that is not in FDB will be added to the FDB custom tables. For these interactions a custom monograph will be created with a clinical effects section.

The following Outpatient Pharmacy order entry processes have been enhanced:

- Entering a new order via backdoor pharmacy options
- Finishing a pending order
- Renewing an order
- Editing an order which results in a new order being created.
- Verifying an order
- Copying an order
- Reinstating a discontinued order

If a dispense drug is associated with an active Non-VA med order, that dispense drug will be used for the Drug Interaction order check.

If no dispense drug is associated with an active Non-VA med order, the first active dispense drug marked for Non-VA med use associated with the Orderable Item will be used for the Drug Interaction order check.

If there are no active dispense drugs marked for Non-VA med use that are associated with the Orderable Item, then the first active dispense drug marked for Outpatient use associated with the Orderable item will be used.

If there are no active dispense drugs marked for Outpatient use associated with the Orderable Item, the first active dispense drugs associated with the Orderable Item will be used.

If there are no active dispense drugs associated with the Orderable Item for the Non-VA med order, no Drug Interaction order check will be performed.

Drug interaction order checks will be performed against pending orders.

The software will display to a non-pharmacist (does not hold PSORPH key) when entering a new order via pharmacy backdoor options or when finishing an order entered through CPRS the same Drug Interaction warning information as shown to a pharmacist.

See examples below:

Example: Critical Drug Interaction with Local Rx

Example: Significant Drug Interaction with Local Rx

```
***SIGNIFICANT*** Drug Interaction with Prospective Drug:

WARFARIN 5MG TAB and

Local RX#: 2443

Drug: ASPIRIN 325MG TAB (ACTIVE)

WARFARIN 5MG TAB and

Pending Drug: ASPIRIN 325MG TAB
SIG: TAKE ONE TABLET EVERY 8 HOURS

*** REFER TO MONOGRAPH FOR SIGNIFICANT INTERACTION CLINICAL EFFECTS
```

The FDB standard professional Drug Interaction monograph is shown below:

This information is generalized and not intended as specific medical advice. Consult your healthcare professional before taking or discontinuing any drug or commencing any course of treatment.

MONOGRAPH TITLE: Anticoagulants/Salicylates

SEVERITY LEVEL: 2-Severe Interaction: Action is required to reduce the risk of severe adverse interaction.

MECHANISM OF ACTION: Multiple processes are involved: 1) Salicylate doses greater than 3 gm daily decrease plasma prothrombin levels. 2) Salicylates may also displace anticoagulants from plasma protein binding sites. 3) Salicylates impair platelet function, resulting in prolonged bleeding time. 4) Salicylates may cause gastrointestinal bleeding due to irritation.

CLINICAL EFFECTS: The concurrent use of anticoagulants and salicylates may result in increased INR values and increase the risk of bleeding.

PREDISPOSING FACTORS: None determined.

PATIENT MANAGEMENT: Avoid concomitant administration of these drugs. If salicylate use is necessary, monitor prothrombin time, bleeding time, or INR values closely. When possible, the administration of a non-aspirin salicylate would be preferable.

DISCUSSION: This interaction has been reported between aspirin and warfarin and between aspirin and dicumarol. Diflunisal, sodium salicylate, and topical methyl salicylate have been shown to interact with anticoagulants as well. Based on the proposed mechanisms, other salicylates would be expected to interact with anticoagulants as well. The time of highest risk for a coumarintype drug interaction is when the precipitant drug is initiated, altered, or discontinued.

Following the drug interaction monograph prompts, when a critical or significant drug interaction is generated with a local, pending, Non-VA med or remote medication order, users not holding a PSORPH key shall be presented with the next prompt in the current order entry dialog. They shall not be shown any intervention prompts or dialog.

Following the Drug Interaction monograph prompts, when a significant Drug Interaction is generated with a local, pending, or remote medication order, the user will be presented with 'Do you want to intervene?' prompt for the following processes:

- New order entry via backdoor pharmacy options
- Finishing a pending order
- Renewing an order
- Copying an order
- Editing an order which results in creation of a new order
- Verifying an order
- Reinstating an order

Professional Monograph

Drug Interaction with WARFARIN and ASPIRIN

MONOGRAPH TITLE: Anticoagulants/Salicylates

SEVERITY LEVEL: 2-Severe Interaction: Action is required to reduce the risk of severe adverse interaction.

MECHANISM OF ACTION: Multiple processes are involved: 1) Salicylate doses greater than 3 gm daily decrease plasma prothrombin levels. 2) Salicylates may also displace anticoagulants from plasma protein binding sites. 3) Salicylates impair platelet function, resulting in prolonged bleeding time. 4) Salicylates may cause gastrointestinal bleeding due to irritation.

CLINICAL EFFECTS: The concurrent use of anticoagulants and salicylates may result in increased INR values and increase the risk of bleeding.

PREDISPOSING FACTORS: None determined.

PATIENT MANAGEMENT: Avoid concomitant administration of these drugs. If salicylate use is necessary, monitor prothrombin time, bleeding time, or INR values closely. When possible, the administration of a non-aspirin salicylate would be preferable.

DISCUSSION: This interaction has been reported between aspirin and warfarin and between aspirin and dicumarol. Diflunisal, sodium salicylate, and topical methyl salicylate have been shown to interact with anticoagulants as well. Based on the proposed mechanisms, other salicylates would be expected to interact with anticoagulants as well. The time of highest risk for a coumarintype drug interaction is when the precipitant drug is initiated, altered, or discontinued.

Professional Monograph
Drug Interaction with WARFARIN and IBUPROFEN
MONOGRAPH TITLE: Anticoagulants/NSAIDs
SEVERITY LEVEL: 3-Moderate Interaction: Assess the risk to the patient and
take action as needed.
```

MECHANISM OF ACTION: The exact mechanism is unknown. Some NSAIDs may displace anticoagulants from plasma protein binding sites. NSAIDs also have the potential to produce gastrointestinal ulceration and bleeding. Some NSAIDs may impair platelet function and prolong bleeding times.

CLINICAL EFFECTS: In some patients, NSAIDs have been associated with an increase in the hypoprothrombinemic effect to anticoagulants.

PREDISPOSING FACTORS: None determined.

PATIENT MANAGEMENT: If concurrent therapy with anticoagulants and NSAIDs is warranted, patients should be monitored for an increased hypoprothrombinemic response when NSAIDs are added to the patient's drug regimen. In addition to routine monitoring of INR values, the patient should be observed for signs of increased effect, including bruising or bleeding. The time of highest risk for a coumarin-type drug interaction is when the precipitant drug is initiated or discontinued. Consult with the prescriber before initiating, altering the dose of, or discontinuing either drug.

DISCUSSION: The effects of NSAIDs on the hypoprothrombinemic response to anticoagulants appears to vary between patients as well as with different NSAIDs. Documentation is frequently contradictory - while studies have shown several NSAIDs to have no effect on the pharmacokinetics of warfarin, case reports have documented increased effects with and without bleeding when these same NSAIDs were administered concurrently with warfarin. While celecoxib has been shown not to affect platelet aggregation or bleeding times and had no effects on the anticoagulant effect of warfarin in healthy subjects, increased prothrombin times and bleeding episodes, some of which were fatal, have been reported, predominantly in the elderly, in patients receiving concurrent therapy with celecoxib and warfarin. Rofecoxib has been shown to increase prothrombin times in subjects who received concurrent warfarin therapy. If concurrent therapy with anticoagulants and NSAIDs is warranted, it would be prudent to monitor patients closely for increased anticoagulant effects.

       Pending Drug: AMIODARONE HCL (PACERONE) 200MG TAB
                SIG: TAKE ONE TABLET BY MOUTH EVERY 8 HOURS
  The concurrent administration of amiodarone and an anticoagulant may result
  in an increase in the clinical effects of the anticoagulant and an
  increased risk of bleeding.(1-22) It may take several weeks of concurrent
  therapy before the full effects of this interaction are noted. The effect
  of amiodarone on anticoagulant levels may continue for several months after
  amiodarone is discontinued.

Allergy/ADR Order Checks (PSO*7*251)

This section will detail the Allergy/ADR order check display within Outpatient Pharmacy.

Legacy Outpatient Pharmacy displays the same allergy/ADR warning twice if drug class(es) and drug ingredient(s) are defined for the allergy/ADR. The drug class is listed on one display and the drug ingredient on the other. The user is also prompted to intervene for both warnings. Local and remote Allergy/ADRs are combined.

If no Allergy Assessment has been documented for the patient for whom the medication order is being processed, an intervention dialog is available for each order. Only one warning will be displayed for an Allergy/ADR. If no intervention is chosen, the standard order entry dialog will resume.

See examples below:

Remote Allergy/ADR – New Order Entry Backdoor – Both Ingredient and Drug Class defined for Allergy/ADR

Therapeutic Duplication

This section describes enhancements to the existing VistA Duplicate Class order checks. The current VistA Duplicate Class checks have been enhanced using the FDB business rules and database, as well as the FDB Enhanced Therapeutic Classification (ETC) system. The Duplicate Class check will now be referred to as the Duplicate Therapy order check. This order check will continue to be performed against active, pending, non-verified orders on hold (initiated through pharmacy or CPRS), expired and discontinued orders. The timeframe for inclusion of expired and discontinued orders is determined by the display rules on the medication profile. This check will be performed on active Non-VA Medication orders.

No changes have been made to the existing user actions for Duplicate Therapy order checks. Users will continue to have the ability to discontinue the order. The existing order will only be discontinued upon acceptance of the order being processed. No discontinue actions can be performed on remote outpatient orders, Non-VA medications, discontinued, and expired orders or orders placed on provider hold through CPRS. If the CANCEL DRUG IN SAME CLASS outpatient site parameter is set to 'No', no discontinue action is allowed on any duplicate class order.

Any remote Outpatient order (from another VAMC or Department of Defense (DoD) facility) using data from Health Data Repository Historical (HDR-Hx) or Health Data Repository- Interim Messaging Solution (HDR-IMS) that has been expired for 120 days or less will be included in the list of medications to be checked.

FDB custom tables will be used to store custom changes to the duplication allowance for a FDB therapeutic classification. Each duplicate therapy class is assigned a duplication allowance. The duplication allowance for a therapeutic allowance determines whether or not the therapeutic duplication warning will be displayed to the user.

The Vendor's (currently FDB) Enhanced Therapeutic Classification (ETC) System is now used in place of the VA Drug Class for the Duplicate Therapy (formerly duplicate class) order checks.

Duplicate Therapy order checks will no longer be processed in pairs. Each duplicate therapy warning includes as many outpatient medication orders as it applies to.

A duplicate therapy warning is only displayed if the number of duplicate therapy matches exceeds the duplication allowance specified for the FDB duplicate therapy class.

The following processes use the enhanced functionality:

- Entering a new outpatient medication order through pharmacy options
- Finishing a pending outpatient medication order
- Renewing an outpatient medication order
- When a new outpatient medication order is created via an edit
- Verification of an outpatient medication order entered or finished by a non-pharmacist
- Copy of an outpatient medication order
- Reinstatement of an outpatient medication order

See illustrations below:

Example: Local RX

Example: Remote Rx

```
*** THERAPEUTIC DUPLICATION(S) *** SUCRALFATE 1GM TAB with

LOCATION: <VA OR DOD FACILITY> Remote Rx#: 65343

Drug: RANITIDINE HCL 150MG TAB (EXPIRED)

SIG: TAKE ONE TABLET BY MOUTH TWICE A DAY

QTY: 180

Days Supply: 90

Last Filled On: 11/08/06

Class(es)Involved in Therapeutic Duplication(s): Peptic Ulcer Agents
```

Example: Pending Order

```
*** THERAPEUTIC DUPLICATION(S) *** NIZATIDINE 150MG CAP with

Pending Drug: FAMOTIDINE 20MG TAB

SIG: TAKE ONE TABLET BY TWICE DAILY

Class(es)Involved in Therapeutic Duplication(s): Peptic Ulcer Agents
```

Example: Non-VA Med Order

```
*** THERAPEUTIC DUPLICATION(S) *** FAMOTIDINE 20MG TAB with

Non-VA Med: CIMETIDINE 300MG TAB

Dosage: 300MG Schedule: TWICE A DAY

Class(es)Involved in Therapeutic Duplication(s): Peptic Ulcer Agents,
Histamine-2 Receptor Antagonists (H2 Antagonists)
```

If the CANCEL DRUG IN SAME CLASS outpatient site parameter is set to 'No', the following information is shown for the duplicate therapy warning:

```
= *** THERAPEUTIC DUPLICATION(S) *** NIZATIDINE 150MG CAP with

Local Rx #2561 (ACTIVE) for CIMETIDINE 300MG TAB

Local Rx #2572 (PROVIDER HOLD) for SUCRALFATE 1MG TAB

Remote Rx #2571 (DISCONTINUED) for RANITIDINE HCL 150MG TAB

Pending Order for FAMOTIDINE 20MG TAB

Non-VA Med Order for CIMETIDINE 300MG TAB

Class(es)Involved in Therapeutic Duplication(s): PEPTIC ULCER AGENTS,
HISTAMINE-2 RECEPTOR ANTAGOINSTS (H2 ANTAGONISTS)
```

If there is more than one remote, local, pending or Non-VA med order involved in the therapeutic duplication, the order details will be displayed one after the other.

If the same drugs are involved in multiple therapeutic duplications, a single therapeutic duplication warning will be displayed and multiple therapeutic classes will be listed.

If the CANCEL DRUG IN SAME CLASS outpatient site parameter is set to 'No', no discontinue action prompt will be presented.

After all the therapeutic duplication warnings are displayed and if the CANCEL DRUG IN SAME CLASS outpatient site parameter is set to 'Yes', the user will be asked if they want to discontinue any of the orders.

See Examples:

```
Discontinue RX #2580A SUCRALFATE 1GM TAB? Y/N

Discontinue Pending Order SUCRALFATE 1GM TAB? Y/N
```

The system will only allow a discontinuation action on active, pending, non-verified and orders placed on hold by pharmacy.

The system will display the following information for the numbered list of orders:

- Prescription number (if applicable)
- Dispense Drug (Orderable item if dispense drug not assigned to order)
- Indicate if the order is pending (with text 'Pending Order')

See example below.

```
1. Pending order AMLODIPINE 5MG/ATORVASTATIN 10MG
2. RX #2426 LOVASTATIN 40MG TAB
```

The discontinuation of selected orders by the system will occur at the time the user accepts the order that is being processed.

```
Discontinue order(s)? Y/N Y es

1. RX #2577 AMLODIPINE 5MG/ATORVASTATIN 10MG TAB
2. RX #2581 CHOLESTYRAMINE 9GM PACKETS

Select (1-2): 1 Duplicate Therapy RX #2577 AMLODIPINE 5MG/ATORVASTATIN 10MG
TAB will be discontinued after the acceptance of the new order.
```

```
Discontinue order(s)? Y/N Y es

1. RX #2577 AMLODIPINE 5MG/ATORVASTATIN 10MG TAB
2. Pending Order CHOLESTYRAMINE 9GM PACKETS

Select (1-2): 2 Duplicate Therapy Pending Order CHOLESTYRAMINE 9GM PACKETS will be discontinued after the acceptance of the new order.
```

If the user fails to accept the order that is being processed or exits before accepting the order, the system shall not discontinue the order(s) selected.

The message displayed to the user shall contain:

- Indicate that discontinuance was for Duplicate Therapy
- The prescription number or text 'Pending order' if order status is pending.
- Dispense Drug (Orderable item if dispense drug not assigned to order)
- Ending with text 'NOT Discontinued.'

See examples below:

```
Duplicate Therapy RX #2710 CIMETIDINE 300MG TAB NOT Discontinued.

Duplicate Therapy Pending Order RANITIDINE 150MG TAB NOT Discontinued.
```

Once the order being processed is accepted and there were orders selected for discontinuation, the system shall inform the user when the discontinuation occurs.

The message displayed to the user shall contain:

- Indicate that discontinuance was for Duplicate Therapy
- The prescription number or text 'Pending order' if order status is pending.
- Dispense Drug (Orderable item if dispense drug not assigned to order)
- Ending with text 'has been discontinued.'

See examples below.

```
Duplicate Therapy RX #2549 CIMETIDINE 300MG TAB has been discontinued...

Duplicate Therapy Pending Order RANITIDINE 150MG TAB has been discontinued...
```

See Therapeutic Duplication examples below:

Example: Finishing pending order – Therapeutic Duplication with Non-VA med and discontinued order -No discontinue action allowed.

Chapter 15: Pull Early from Suspense

This chapter describes the option for pulling prescriptions early from the SUSPENSE file.

Pull Early from Suspense

[PSO PNDRX]

This option is used to pull a specific prescription or all prescriptions for a patient early. If a prescription is pulled early using this option, it will not be associated with any printed batch. A label cannot be reprinted with the *Reprint Batches from Suspense* option if the prescription has been pulled early suspense. In addition, Method of Pickup can be edited. Also, there is no longer a "DELETE FROM SUSPENSE PROMPT." That prompt has been changed to "Pull Rx(s) and delete from Suspense." Yes must be answered to this prompt to pull the prescriptions, and they will always be deleted from suspense. Since prescriptions that are pulled early from suspense do not belong to any printed batch and cannot be reprinted from suspense, there is no reason to leave them in suspense.

If the routing is changed to "Window" when pulling from suspense early, and the bingo board is being used, those prescriptions will be sent to the bingo board.

If the patient has remote prescriptions, then the text "THIS PATIENT HAS PRESCRIPTIONS AT OTHER FACILITIES" will appear on the report as shown in the following example.

PRESCRIPTION PROFILE AS OF 12/30/2008	
NAME: PSOPATIENT, ONE	
THIS PATIENT HAS PRESCRIPTIONS AT OTHER FACILITIES	
PHARMACIST:	DATE:

If a prescription is determined to be an ePharmacy prescription (e.g., third party electronically billable), an electronic claim will be sent by ECME to the third party payer. The communication events between Outpatient Pharmacy and ECME are recorded in the ECME Log section of each prescription. The ECME log can be viewed in the patient Medication Profile screen (Activity Log option - AL) and also from the *View Prescriptions* option. If the claim submission returns a Refill Too Soon (79) or Drug Utilization Review (88) reject, the label is not printed for the prescription and it is moved to the Refill Too Soon/DUR section of the patient Medication Profile screen until the user resolves the reject. The prescription will also display on the Third Party Payer Reject worklist.

(This page included for two-sided copying.)

Chapter 16: Queue CMOP Prescription

This chapter describes the option for suspending prescriptions for mail-routed CMOP drugs.

QUEUE CMOP Prescription

[PSO RX QUEUE CMOP]

The *Queue CMOP Prescription* option allows the users (including pharmacy technicians) to put mail-routed prescription(s) for CMOP drugs on suspense for CMOP.

Example: Queue CMOP Prescription

```
Select Suspense Functions Option: QUEUE CMOP Prescription Enter the Rx # to queue to CMOP: 300486
```

If the prescription does not have a routing of mail, has already been released, or is not for a CMOP drug, and does not pass all the other normal checks for CMOP it will not be put on suspense for CMOP.

(This page included for two-sided copying.)

Chapter 17: Releasing Medication

This chapter describes the option used for releasing medications.

Release Medication

[PSO RELEASE]

The *Release Medication* option is used at the time the prescription is filled and ready to be given to the patient. Inventory is decreased, certain fields in the file are updated, and a copay is generated if the action is applicable to the prescription. With this option, prescriptions can be batch processed. Communication is made with the Integrated Funds Control, Accounting and Procurement (IFCAP) and Integrated Billing (IB) software to generate copay charges. IFCAP and IB software handle patient billing, tracking of charges, and payment received.

The copay status of a prescription is re-evaluated whenever a fill is released. Various actions can occur based on changes to the criteria that determine the copay status of a prescription. The actions that may result at the time a fill is released are described below.

- 1. **No action is taken.** No changes to the criteria that determine copay status of a prescription have occurred.
- 2. The copay status of the prescription is automatically reset and an entry is placed in the copay activity log.

Example: The drug for which the prescription is written is no longer marked for investigational use. The copay status of the prescription is reset from No Copayment to Copay.

3. The copay status of the prescription is automatically reset, an entry is placed in the copay activity log, and a MailMan message is generated detailing missing information required for user follow up.

Example: The drug for which the prescription is written is no longer marked for investigational use. The copay status of the prescription is reset from No Copayment to Copay. The patient has been documented as being exposed to Southwest Asia Conditions during Persian Gulf War service since the last fill. A MailMan message will be generated informing the user that the 'Is this Rx for treatment related to service in SW Asia?' question must be addressed and documented using the *Reset Copay Status/Cancel Charges* option.

4. A MailMan message is generated detailing missing information required for user follow-up.

Example: A veteran is documented as having Agent Orange exposure. Refill #2 for a prescription entered into the system before the new medication copay exemptions took effect on January 1, 2002 is released. The prescription is copay eligible. A MailMan message will be generated informing recipients that the 'Is this Rx for treatment of Vietnam-Era Herbicide (Agent Orange) exposure?' question must be addressed. The copay status of the Rx may change based on the response entered using the *Reset Copay Status/Cancel Charges* option.

If a MailMan message is generated at the time a prescription fill is released, the recipients of the message will be the provider of record, the pharmacy user who finished the order, and holders of the PSO COPAY key. The message lists the patient name, prescription number, and medication ordered, current copay status, and applicable copay exemption questions that need addressing to determine the prescription's copay status. The *Reset Copay Status/Cancel Charges* option must be used to enter the responses to the medication copay exemption questions listed in the MailMan message. If responses are not entered for the applicable medication copay exemption questions, any subsequent refills when released for this prescription and possibly other prescriptions for this patient will continue to generate the same MailMan message.

Example: MailMan Message

```
Subj: PRESCRIPTION QUESTIONS REVIEW NEEDED (500) [#30364] 10/11/05@19:56
From: OUTPATIENT PHARMACY PACKAGE In 'IN' basket. Page 1
OPPATIENT29, ONE (6543P) CHEYENNE VAM&ROC
Eligibility: SC LESS THAN 50% SC%: 20
            REIMBURSABLE INSURANCE
Disabilities: ARTHRITIS-10%(SC), FOREARM CONDITION-5%(NSC),
            FOREARM CONDITION-4% (NSC), BENIGN EYE GROWTH-0% (NSC),
            LOSS OF FIELD OF VISION-20% (SC),
Rx# 102006 (1) COPAY
ALBUTEROL SO4 0.083% INHL 3ML
Due to a change in criteria, additional information listed below is needed
to determine the final VA copay and/or insurance billable status for this Rx
so that appropriate action can be taken by pharmacy personnel.
Is this Rx for a Service Connected Condition?
Is this Rx for treatment related to service in SW Asia?
This message has been sent to the provider of record, the pharmacist who
finished the prescription order, and all holders of the PSO COPAY key.
Enter RETURN to continue or '^' to exit: <Enter>

```
Subj: PRESCRIPTION QUESTIONS REVIEW NEEDED (500) [#30364] Page 2
Providers:
Please respond with your answer to the question(s) as a reply to this
message. The prescription will be updated by the appropriate staff.
Staff assigned to update the Prescription responses:
Please use the RESET COPAY STATUS/CANCEL CHARGES option to enter the responses
to the questions above, which may result in a Rx copay status change and/or
the need to remove VA copay charges or may result in a charge to the patient's
insurance carrier.
Note: The SC question is now asked for Veterans who are SC>49\% in order to
determine if the Rx can be billed to a third party insurance. These Veterans
will NOT be charged a VA copay.
Supply, nutritional and investigational drugs are not charged a VA copay but
could be
reimbursable by third party insurance.
Enter message action (in IN basket): Ignore//
```

An annual copayment cap is applied to patients in specific priority enrollment groups. Once a patient reaches the annual copayment cap, no further medication copay charges will be billed for the calendar year. An entry to that effect is made to the Copay Activity Log. The '\$' indicator remains next to the prescription number to indicate that the prescription is still copay eligible. Integrated Billing software keeps track of all prescription fills not billed due to the annual cap.

Example: Copay Activity Log When Annual Cap Reached

Cop	Copay Activity Log:					
#	Date	Reason	Rx Ref	Initiator Of Activity		
===						
1	10/23/01	ANNUAL CAP REACHED	ORIGINAL	OPPHARMACIST11, THREE		
Con	nment: NO Bl	ILLING FOR THIS FILL				

If for whatever reason (e.g. prescription fill is returned to stock and copay charges cancelled), a patient falls below the annual copayment cap, the Integrated Billing package can initiate copay charges to bring the patient back up to the annual copayment cap. Integrated billing software will go back and bill a copay charge for those fills previously not charged due to the annual cap, bringing the patient's total copayment up to the cap. Whenever this occurs an entry will be placed in the copay activity log.

Example: Copay Activity Log With IB-Initiated Charge

Cop	ay Activity	Log:			
#	Date	Reason	Rx Ref	Initiator Of Activity	
1	10/23/01	ANNUAL CAP REACHED	ORIGINAL	OPPHARMACIST11, THREE	
Con	ment: NO B	ILLING FOR THIS FILL			
2	10/23/01	IB-INITIATED COPAY	ORIGINAL	OPPHARMACIST11, THREE	
Con	Comment: PARTIAL CHARGE				

If a prescription is <u>not</u> in a releasable status, the user will be given an error message, such as:

- Prescription has a status of (status) and is not eligible for release.
- Prescription was deleted.
- Improper barcode format.
- Non-existent prescription.

Copay is not charged for a partial fill.

Important

This is a mandatory function that must be used by the pharmacy.

Changes to Releasing Orders function - Digitally Signed Orders Only

The release function in the *Patient Prescription Processing* option has been modified with patch PSO*7*131 to require that all digitally signed orders for Schedule II controlled substances (CSII orders) be released through the *Outpatient Rx* option in the *Controlled Substances* (CS) menu. If DEA/PKI is activated and an order is digitally signed, the user will be advised that the order must be released through the *Outpatient Rx* option in the *Controlled Substances* (CS) menu. The same message will display if a user attempts to release a digitally signed CSII order during Speed Release or when using the *Release Medications* option.

At this time the functionality for entering and processing digitally signed orders is part of a pilot project limited to only one site. System-wide implementation of this functionality requires further study and modifications.

Changes to Releasing Orders function - ScripTalk®

The release function in the *Patient Prescription Processing* option has been modified to display a message to the user when the site is using a Bingo Board and when the patient is enrolled in ScripTalk®. This message will alert the user that the patient is enrolled in ScripTalk® and may need to have a verbal announcement that the prescription(s) is ready, instead of a visual announcement.

Example: Releasing Medication to a ScripTalk® Patient

```
Prescription Number 400693 Released
No Refill(s) to be Released
No Partial(s) to be Released

OPPATIENT16, ONE added to the WAITING display.
This patient is enrolled in ScripTalk and may benefit from a non-visual announcement that prescriptions are ready.

Press Return to Continue:
```

Changes to Releasing Orders function – HIPAA NCPDP Global

The release function has been modified with patch PSO*7*148 to perform National Drug Code (NDC) validation for ePharmacy prescriptions. These changes also affect the Controlled Substance prescription release, which is performed through the Controlled Substances package.

The user releasing the third-party electronically billable prescription will be prompted for the NDC for the drug being dispensed to the patient. The NDC code previously retrieved when the prescription was finished will be presented as the current (default) NDC for the prescription. The other possible values that the user will be able to choose from are:

- NDC field value in the DRUG file, if valid and different than the current prescription NDC.
- LAST LOCAL NDC field value in NDC BY OUTPATIENT SITE sub-file in the DRUG file for the division filling the prescription, if valid and different that the current prescription NDC.
- NDC CODE field values in the SYNONYM sub-file in the DRUG file, if valid and different that the current prescription NDC.

If the NDC dispensed is not on the list to select, the user must contact the ADPAC or other designated person to add the NDC in a synonym multiple for that drug in file 50.

If the NDC code selected matches the current NDC in the prescription no further NDC processing is required. However, if the user selects a different NDC, the following steps will occur:

- 1. Outpatient Pharmacy V. 7.0 will instruct ECME to reverse the previous claim for the previous NDC code and submit a new claim for the newly selected NDC code.
- 2. The newly selected NDC code will be saved in the LAST LOCAL NDC field in NDC BY OUTPATIENT SITE sub-file in the DRUG file for the division filling the prescription.

The following examples show the new prompt for NDC validation during the release process.

Example: Releasing an ePharmacy Order - Selecting Default NDC

```
Select Outpatient Pharmacy Manager Option: RELEASE Medication

Enter PHARMACIST: OPPHARMACIST4, THREE

Enter/Wand PRESCRIPTION number: 100003853

NDC: 00580-0277-10// ?

Chapter 18: Returning Medication to Stock

This chapter describes the option used for returning medication to stock.

Return Medication to Stock

[PSO RETURNED STOCK]

This option is used when a prescription has been released, but has been refused, not picked up, or not given to the patient for some reason. Comments can be entered to explain why the medication was returned to stock.

A prescription can only be returned to stock if the prescription status is Active, Discontinued, or Expired. If the prescription is not released, there is no need to return it to stock. This function increases the inventory so that a more current level is maintained by the Outpatient Pharmacy package and removes the copay charge if it is applicable to the prescription. It is highly recommended that this option be used.

When an ePharmacy prescription is returned to stock, the software checks if the it has a PAYABLE claim, if so, a request is sent to ECME to electronically reverse the claim with the third party payer. Also, if the prescription contains any unresolved DUR or REFILL TOO SOON reject, it will be marked resolved with the reason 'Prescription Returned To Stock'.

If a copay charge is removed by returning a prescription fill to stock, an entry will be placed in the copay activity log documenting the action.

Example: Returning Medication to Stock

Cop	Copay Activity Log:					
#	Date	Reason		Rx Ref	Initiator Of Activity	
	========					
1	11/21/01	REMOVE COPAY	CHARGE	REFILL 1	OPPHARMACIST9, THREE	
Com	ment: RX REF	USED Returned	to stoc	k		

If an **original fill** is returned to stock and reprinted, it can be released again. If a **refill** is returned to stock, the refill is deleted so the patient will not lose it.

(This page included for two-sided copying.)

Chapter 19: Ordering/Processing a Prescription

This chapter describes the menu and options used in processing prescriptions.

Rx (Prescriptions)

[PSO RX]

The *Rx* (*Prescriptions*) menu allows the pharmacist to manipulate information that pertains to prescriptions. Actions are taken on prescriptions via this menu. Some previous options, such as renew, refill, edit, release, are now actions in the *Patient Prescription Processing* option found on this menu. Also, data now must be entered for the individual fields that are used to build a Sig.

Default values display for possible dosages, schedules, med routes, and patient instructions. When possible, default quantities are calculated using data entered into specific fields during medication order entry.

The following options are available on this menu:

- Patient Prescription Processing
- Barcode Rx Menu ...
- Complete Orders from OERR
- *Discontinue Prescription(s)*
- Edit Prescriptions
- ePharmacy Menu ...
- List One Patient's Archived Rx's
- Manual Print of Multi-Rx Forms
- Reprint an Outpatient Rx Label
- Signature Log Reprint
- View Prescriptions

Patient Prescription Processing [PSO LM BACKDOOR ORDERS]

This option is used to process outpatient medication through OERR V. 3.0. The *Patient Prescription Processing* option is found on the *Outpatient Pharmacy Manager Menu* and the *Pharmacist Menu* under the *Rx (Prescriptions)* option. This option uses List Manager features to allow the outpatient pharmacy manager and pharmacist to perform the following actions on a prescription without leaving this option.

- Enter a new Rx
- Discontinue
- Edit
- Refill
- Renew
- Hold
- Unhold
- Order a partial

- Release
- Reprint
- Copy
- Verify a prescription
- Show a profile
- View activity log
- Pull early from suspense

When a new drug order is processed (new, renewal, finish, verify, copy, or an edit that creates a new order), order checks are performed. These include checking for duplicate drug, duplicate drug therapy, drug-drug interaction, and drug-drug allergy.

With the introduction of enhanced Order checks (PSO*7*251), Outpatient Pharmacy generated order checks are displayed in this sequence:

- System Errors
- Duplicate Drug
- Clozapine
- Allergy/ADR (local & remote) or Non-Assessment
- CPRS checks generated backdoor (3 new checks)
- Drug Level Errors
- Local & Remote Critical Drug Interactions
- Local & Remote Significant Drug Interactions
- Local & Remote Duplicate Therapy

Additionally, the order check display sequence is applied to the following processes:

- Backdoor new order entry
- Finishing a pending order
- When renewing an outpatient medication order
- Creating a new order when editing an outpatient medication order
- Verifying an outpatient medication order.
- Copying an outpatient medication order
- Reinstating a discontinued outpatient medication order.

There are two levels of error messages associated with Enhanced Order Checking (Drug Interactions and Duplicate Therapy):

- 1. System When a system level error occurs, no Drug Interaction or Duplicate Therapy order checks that utilize the COTS database (FDB) will be performed. Other order checks, such as Allergy/ADRs, Duplicate Drug (for outpatient only) and the new CPRS order checks, etc. that are performed entirely within VISTA will continue to be executed.
- 2. Drug When a drug level error occurs, no Drug Interaction or Duplicate Therapy order checks will be performed for a specific drug. Drug level errors can occur for the prospective drug (drug being processed) or the profile drug. If a drug level error occurs on the prospective drug, no profile drug errors will be displayed. The only exception to this is when you are processing an IV order with multiple prospective drugs (i.e. multiple IV Additives). Profile drug level errors will only be shown once per patient session.

There are two reasons that a drug level error is generated; the drug is not matched to NDF or the drug is matched to NDF, but the VA Product to which it is matched does not have a GCNSEQNO assigned or the GCNSEQNO assigned does not match up to the GCNSEQNO in the COTS database. The latter (GCNSENO mismatch) is rare.

See table below for an explanation of the errors:

Error Level	Error Message	Reason	Why message is being displayed.
System	No Enhanced Order Checks can be performed.	Vendor Database cannot be reached.	The connectivity to the vendor database has gone down. A MailMan message is sent to the G. PSS ORDER CHECKS mail group when the link goes down and when it comes back up.
System	No Enhanced Order Checks can be performed.	The connection to the vendor database has been disabled.	A user has executed the Enable/Disable Vendor Database Link [PSS ENABLE/DISABLE DB LINK] option and disabled the interface.
System	No Enhanced Order Checks can be performed	Vendor database updates are being processed	The vendor database (custom and standard data) is being updated using the DATUP (Data Update) process.
Drug	Enhanced Order Checks cannot be performed for Local or Local Outpatient Drug: <drug name=""></drug>	Drug not matched to NDF	The local drug being ordered/ or on profile has not been matched to NDF. Matching the drug to a VA Product will eliminate this message.
Drug	Order Checks could not be done for Remote Drug: <drug name="">, please complete a manual check for Drug Interactions and Duplicate Therapy. Remote order indicator</drug>		If this error message is displayed, it means that the VA product that the local or remote drug being ordered/or on the local or remote profile does not have a GCNSEQNO or in rare cases, the GCNSEQNO assigned to the VA Product does not match up with a GCNSEQNO in the vendor database.

Error Level	Error Message	Reason	Why message is being displayed.
Drug	Enhanced Order Checks cannot be performed for Orderable Item: <oi NAME></oi 	No active Dispense Drug found	Highly unlikely that this error would be seen. At the time the order check was being performed the orderable item did not have an active dispense drug associated.
Drug	Enhanced Order Checks cannot be performed for Orderable Item: <oi NAME></oi 	No active, marked for IV Fluid Order Entry IV Additive/Solution found	The orderable item associate with an IV Fluid order did not have an active IV Additive/IV Solution marked for IV fluid order entry use at the time the order check was executed. This is another error the user will probably not see.

See Examples below to illustrate error sequences.

Example: New Order Entry - System Level Error

```
Select Action: Quit// NO New Order

Duplicate Drug Order Check

The Duplicate Drug warning displays the following information for a local or remote outpatient medication order:

Example: Local Rx

```
Duplicate Drug in Local Rx:

Rx #: 2608
Drug: ASPIRIN 81MG EC TAB
SIG: TAKE ONE TABLET BY MOUTH EVERY MORNING
QTY: 30
Refills remaining: 11
Provider: PSOPROVIDER, TEN Issued: 03/24/08
Status: Active Last filled on: 03/24/08
Processing Status: Released locally on 3/24/08@08:55:32 (Window)
Days Supply: 30
```

Example: Remote Rx

Duplicate Drug Order Check for Pending Orders:

Example: Pending Order

```
DUPLICATE DRUG in a Pending Order for:

Drug: ALLOPURINOL 300MG TAB
SIG: TAKE ONE TABLET BY MOUTH EVERY MORNING
QTY: 180 # of Refills: 3
Provider: PSOPROVIDER, TEN Issue Date: 03/24/08@14:44:15
Provider Comments: <only if data present>
```

Duplicate Drug order check for Non-VA Medications

Example: Non-VA Med Order

```
Duplicate Drug in a Non-VA Med Order for

Drug: CIMETIDINE 300MG TAB
Dosage: 300MG
Schedule: AT BEDTIME
Medication Route: MOUTH
Start Date: <NOT ENTERED> CPRS Order #: 13554
Documented By: PSOPROVIDER, TEN on Mar 24, 2008@14:44:15
```

Duplicate Drug Order Check business rules:

- If the DRUG CHECK FOR CLERK outpatient site parameter is set to NO, the system will not prompt a clerk (no PSORPH key) to discontinue the order when a Duplicate Drug order check occurs.
- If the DRUG CHECK FOR CLERK outpatient site parameter is set to NO, and a new order is being entered by a clerk (no PSORPH key) via the pharmacy backdoor, the order being processed will be deleted by the system immediately after the duplicate drug warning is displayed.
- If the duplicate drug is a remote order, the system will allow the clerk to process the new order after the display of the duplicate drug warning.
- If the DRUG CHECK FOR CLERK outpatient site parameter is set to NO, and a clerk (no PSORPH key) is finishing a pending order:

- When the VERIFICATION outpatient site parameter is set to YES and the duplicate drug is a local order, the system will return the user back to the detailed order ListMan display with the available actions of Accept/Edit/Discontinue.
- When the VERIFICATION outpatient site parameter is set to YES and the duplicate drug is a remote order
 - A duplicate drug warning will be displayed
 - The clerk will be allowed to finish the order
 - The finished order will have a status of non-verified
- When the VERIFICATION outpatient site parameter is set to NO, the clerk will not be allowed to finish the order.
- o If the DRUG CHECK FOR CLERK outpatient site parameter is set to Yes, a clerk (no PSORPH key) will see the same discontinue prompts as a pharmacist.
- If the VERIFICATION outpatient site parameter is set to YES when reinstating an order, no duplicate message will be displayed and the reinstated order will have a non-verified status.
- No discontinuation prompt will be displayed for a duplicate Non-VA medication order in any situation.

After the Duplicate Drug warning is displayed, the system will ask the user if they wish to discontinue the order.

Active Order

Discontinue RX #2580A SUCRALFATE 1GM TAB? Y/N

Pending Order

Discontinue Pending Order for ALLOPURINOL 300MG? Y/N

If the user chooses not to discontinue the displayed order when entering a new order via the pharmacy backdoor, the system will delete the order being entered (prospective drug).

If the user chooses not to discontinue the displayed order when finishing a pending order, the system will redisplay the pending order and prompt them to accept, edit or discontinue the order.

If the DRUG CHECK FOR CLERK outpatient site parameter is set to NO, and if the clerk (no PSORPH key) is copying an order, the system will return them back to the detailed order ListMan display where the copy action was initiated.

If the DRUG CHECK FOR CLERK outpatient site parameter is set to NO and the VERIFICATION outpatient site parameter is set to YES when a clerk (no PSORPH key) is reinstating a discontinued order for a medication for which an active local order exists, the system will delete the active order and reinstate the discontinued order.

If the DRUG CHECK FOR CLERK outpatient site parameter is set to NO and the VERIFICATION outpatient site parameter is set to NO when a clerk is reinstating a discontinued order for a medication for which an active local order exists, the system will display a duplicate drug warning, but the order will not be reinstated.

If the DRUG CHECK FOR CLERK outpatient site parameter is set to YES or NO and the VERIFICATION outpatient site parameter is set to NO when a clerk is reinstating a discontinued order for a medication for which a remote order exists, the system will display a duplicate drug warning and the reinstated order will be assigned an active status.

If the DRUG CHECK FOR CLERK outpatient site parameter is set to YES or NO and the VERIFICATION outpatient site parameter is set to YES when a clerk is reinstating a discontinued order, the system will not display a duplicate drug warning and the reinstated order will be assigned a non-verified status.

If a duplicate drug warning is displayed for a medication order, it will not be included in a duplicate therapy order check.

The following examples illustrate the conditions described above.

Example: Duplicate Pending Order

```

The CPRS Auto Refill field can be updated using the *Pharmacy Systems Parameter Edit* [PSS MGR] option. This parameter works in conjunction with the PSOUATRF security key.

- When the CPRS Auto Refill field is set to YES and the PSOAUTRF security key has been
 assigned to at least one user, all refills placed in CPRS by the provider are processed and
 suspended with the next fill date and all routing is set to Mail automatically.
- When the CPRS Auto Refill field is set to NO or if the PSOAUTRF security key is not assigned, the manual refill process is required.

If the auto refill process fails, the order will not be processed and will require manual refilling. A MailMan message will be sent to the holders of the PSOAUTRF key describing the reason for not filling the auto refill. All of the refill activity, manual or automatic, is recorded in the Activity Log entry notes.

With Patch PSO*7*233, when a name is selected, if the patient's address is flagged with a Bad Address Indicator, a warning message is displayed. If the user has proper authorization (i.e., the PSO SITE parameter "EDIT PATIENT DATA" is set to Yes or the user holds the new PSO ADDRESS UPDATE security key), a prompt appears asking if the user wants to update the address. Also, for the *Patient Prescription Processing, Complete Orders from OERR*, and *Action Profile (132 COLUMN PRINTOUT)* options, if a temporary address has no end date, the following text is now displayed: "(Temp address from XXX 99,9999 till (no end date))".

Following the installation of patches PSO*7*207 and OR*3*238 (Remote Data Interoperability (RDI) trigger patch), order checks will be made using additional data from the Health Data Repository Interim Messaging Solution (HDR-IMS) and the HDR-Historical (HDR-Hx). This will contain both Outpatient orders from other VAMCs as well as from Department of Defense (DoD) facilities, if available. All

(This page included for two-sided copying.)

November 2010

remote prescription statuses will be included in order checking for a new order being processed from within backdoor outpatient pharmacy and for new orders being placed by CPRS or by Inpatient Medications. Any remote Outpatient order that has been expired or discontinued for 30 days or less will be included in the list of medications to be checked.

The check for remote data availability is performed upon entering the patient's profile, rather than on each order, to ensure that both remote data and local data are used for order checking.

Note: Once the above patches have been installed, a new comment for remote order checks, "Now doing remote order checks. Please wait..." has been added to the screen. The previous comment, "Now doing order checks. Please wait..." is replaced by: "Now doing drug interaction and allergy checks. Please wait..."

The following will not be included in order checks (after patch PSO*7*243):

- Prescriptions with a status of "DELETED" in the STATUS field in the PRESCRIPTION file from a remote facility
- Prescriptions with a missing expiration date, unless the ISSUE DATE field of the PRESCRIPTION file is within the past year

Remote order checking added (after patch PSO*7*243):

- For drug class when orders are placed for locally defined drugs
- allergy Analgesic class order checks only match against the specific 5-character class if the class begins with "CN10"

If for any reason remote order checks cannot be performed, the following message displays:

Remote data not available - Only local order checks processed.

Note: For remote order checking, if the remote order does not have a VA PRODUCT file VUID, then it will not be included in drug-drug order checks. However, future patches are planned to send/receive the drug class to the HDR, and then it will be possible to use non-standardized remote orders for duplicate drug class checks.

When an order is an ePharmacy order (determined to be third party billable), the billing data is sent to the Electronic Claims Management Engine (ECME) when an order is finished. ECME sends a message back to Outpatient Pharmacy displaying the status of the claim. This message displays for new, edited, copied, and renewed ePharmacy orders.

```
Is this correct? YES// <Enter>
-Rx 100003869A has been discontinued...

Prescription 100003919 successfully submitted to ECME for claim generation.

```

Entering a New Order

Actions display in the action area of the screen. Actions with parentheses () around them are invalid actions for that order. A double question mark (??) displays all the actions available, including the Outpatient Pharmacy actions described in the section "Using List Manager." If one of the hidden actions is selected and it is invalid, a message will display in the message window.

Example: Entering a New Order

```
Select Option: RX (Prescriptions)

Orders to be completed for all divisions: 14

Do you want an Order Summary? No//
```

A summary list of the number of pending orders can be displayed by Division or by each Clinic within the Division where the user is signed on. This is helpful when completing batch orders. In this example, an individual patient name is entered.

```

The system checks the medication selected for any duplicate drugs or classes, interactions, or allergies that are noted in the patient's local and remote record. This also includes any local Non-VA Meds. See the following example of local and remote order checking.

If the new order is for Clozapine, there are additional restrictions for filling a prescription. See "Chapter 8: Controlling the Dispensing of Clozapine" for more information.

Please Note: More than one ingredient and more than one VA Drug Class may be associated with an Allergy/ADR.

See output below:

```
A Drug-Allergy Reaction exists for this medication and/or class!

Drug: DILTIAZEM (DILACOR XR) 240MG SA CAP
   Ingredients: DILTIAZEM (REMOTE SITE(S)),
   Class: CV200 CALCIUM CHANNEL BLOCKERS (REMOTE SITE(S))
```

After the Allergy/ADR warning is displayed, the system ask the user if they want to intervene.

If the user chooses to intervene after the Allergy/ADR warning is displayed, the intervention dialog will launch.

If the user chooses not to intervene after the Allergy/ADR warning is displayed, the order entry dialog will start.

Example: Remote Allergy/ADR – New Order Entry Backdoor – Both Ingredient and Drug Class defined for Allergy/ADR

CPRS Order Checks

Three CPRS order checks have been added to the list of order checks performed within the Outpatient Pharmacy application.

- Aminoglycoside Ordered
- Dangerous Meds for Patient >64
- Glucophage –Lab Results

Please Note: See Appendix 5 for details on each order check as taken from CPRS (OERR) documentation.

The CPRS order checks shall be incorporated in the following Outpatient Pharmacy order entry processes:

- Entering a new order via backdoor pharmacy options
- Finishing a pending order
- Renewing an order
- Editing an order which results in a new order being created.
- Verifying an order
- Copying an order
- Reinstating a discontinued order

No user action/intervention shall be required after a CPRS order check warning is displayed.

The following information is displayed for the Aminoglycoside Ordered order check:

- Order Check Name
- Text message displaying an estimated CrCL if available or a message that it is not.

```
***Aminoglycoside Ordered***

Aminoglycoside - est. CrCl: <VALUE> (CREAT: <result> BUN: <result>) [Est. CrCl Based on modified Cockcroft-Gault equation using Adjusted Body Weight (if ht > 60 in)].
```

-OR-

```
***Aminoglycoside Ordered***

Aminoglycoside - est. CrCl: <Unavailable> (<Results Not Found>) [Est. CrCl Based on modified Cockcroft-Gault equation using Adjusted Body Weight (if ht > 60
```

The following information is displayed for the Dangerous Meds for Patient >64 order check:

- Order Check Name
- Text message displaying a message if patient is greater than 64 and has been prescribed Amitriptyline

```
***Dangerous Meds for Patient >64***

Patient is <age>. Amitriptyline can cause cognitive impairment and loss of balance in older patients. Consider other antidepressant medications on formulary.
```

-OR-

Text message displaying a message if patient is greater than 64 and has been prescribed Chlorpropamide

```
***Dangerous Meds for Patient >64***

Patient is <age>. Older patients may experience hypoglycemia with
Chlorpropamide due do its long duration and variable renal secretion. They may
also be at increased risk for Chlorpropamide-induced SIADH.
```

-OR-

Text message displaying a message if patient is greater than 64 and has been prescribed Dipyridamole

```
***Dangerous Meds for Patient >64***

Patient is <age>. Older patients can experience adverse reactions at high doses of Dipyridamole (e.g., headache, dizziness, syncope, GI intolerance.)

There is also questionable efficacy at lower doses.
```

The following information is displayed for the Glucophage Lab Results order check:

- Order Check Name
- Text message displaying a serum creatinine does not exist or it is greater than 1.5

```
***Metformin Lab Results***

Metformin - no serum creatinine within past 60 days.
```

-OR-

```
***Metformin Lab Results***

Metformin - Creatinine results: <creatinine greater than 1.5 w/in past <x>
days>
```

Example: New Order Entry - Backdoor - Dangerous Meds for Patient >64 for Dipyridamole

Metformin - Creatinine results: <creatinine greater than 1.5 w/in past <x>
days>
Prescription #2614 REINSTATED!
  Prescription #2614 Filled: MAR 25, 2008Printed: MAR 25, 2008Released:
    Either print the label using the reprint option
     or check later to see if the label has been printed.
```

The list of available possible dosages shown after order checks is linked to the drug ordered. One of the dosages listed may be chosen or a different, free text dosage may be entered. Confirmation of the dosage is required and the value entered is displayed again to allow the user to confirm that it is correct.

```
Available Dosage(s)

1. 250MG
2. 500MG
3. 1000MG

Select from list of Available Dosages, Enter Free Text Dose or Enter a Question Mark (?) to view list: 3 500MG

You entered 500MG is this correct? Yes// <Enter> YES
```

For numeric dosages, the Dispense Units Per Dose value is calculated based on the strength of the dosage ordered divided by the strength of the medication ordered. The 500 mg Dosage Ordered will require two 250 mg capsules. The Dosage Ordered is re-displayed after the Dispense Units to allow the entry to be double-checked.

```
DISPENSE UNITS PER DOSE(CAPSULES): 2// <Enter> 2
Dosage Ordered: 500MG
```

If a Route has not been associated with the Dispense Drug, the default Route of PO or Oral will be displayed. A different Route can be entered or it can be deleted at this point if needed. The Route is not required to complete a prescription. If the abbreviation entered is in the MEDICATION ROUTES file, the entry will be expanded in the Sig based on the OUTPATIENT EXPANSION field.

```
ROUTE: PO// <Enter> ORAL PO MOUTH

Or

ROUTE: PO// @ <Enter to delete>
```

A default schedule associated with the Orderable Item of the drug ordered is displayed at the "Schedule:" prompt. The default can be accepted or a different free text schedule can be entered. Free text entries cannot contain more than two spaces or be more than twenty characters long. Entries will be compared against a list of common abbreviations, first in the ADMINISTRATION SCHEDULE file and then in the MEDICATION INSTRUCTION file, and expanded if the entry matches. Any entry not found in the list of common abbreviations will be displayed in the Sig as entered.

```
Schedule: QID// (FOUR TIMES A DAY)
-----example continues-----
```

The LIMITED DURATION field is used only when a medication should be taken for a limited period of time. Days are assumed for numeric entries. The user should follow the number with an "H" to specify hours or an "M" to specify minutes.

Do not use the LIMITED DURATION field for Days Supply.

Example: Entering a New Order (continued)

```
LIMITED DURATION (IN DAYS, HOURS OR MINUTES): 10 (DAYS)
```

The CONJUCTION field is used to join dosing sequences in complex orders. Entries are limited to AND, THEN, or EXCEPT. AND is used for concurrent doses, such as "Take 1 tablet every morning AND take 2 tablets at bedtime." THEN is used for consecutive doses, such as "Take 2 tablets daily for one week THEN take 1 tablet for five days." EXCEPT is used to describe any dosing sequence that is not routine, such as "Take 1 tablet every day EXCEPT take no tablets Wednesday." See Chapter 2 in the *User Manual - Supplemental* for examples.

```
CONJUNCTION: <Enter>
```

Any entry in the PATIENT INSTRUCTIONS field will first be checked to see if it contains any abbreviations that can be expanded. The entry will be added to the end of the Sig, after the dosing information, and the entire Sig will be displayed.

```
PATIENT INSTRUCTIONS: WF WITH FOOD

(TAKE TWO CAPSULES BY MOUTH FOUR TIMES A DAY FOR 10 DAYS WITH FOOD)

OTHER PATIENT INSTRUCTIONS: WF CON ALIMENTO
```

Two optional fields, OTHER LANGUAGE PREFERENCE and PMI LANGUAGE PREFERENCE in the PHARMACY PATIENT file, store if a patient has another language preference and if the patient's PMI sheets should print in English or Spanish at the CMOP. The CMOP functionality was requested for future CMOP use. When printing locally from Outpatient Pharmacy this parameter is not used. These fields are accessed through the *Update Patient Record* option and the protocol Patient Record Update [PSO PATIENT RECORD UPDATE]. If the other language preference is indicated for a patient, the user will be prompted to enter OTHER PATIENT INSTRUCTIONS after selecting the PATIENT INSTRUCTIONS field to enter/edit. If a quick code is entered at the OTHER PATIENT INSTRUCTIONS EXPANSIONS will print on the prescription label.

A default value for Days Supply based on patient status is displayed. A default quantity is calculated when possible. See Chapter 2 in the *User Manual - Supplemental* for more information on QUANTITY calculations.

```
DAYS SUPPLY: (1-90): 30// 10
QTY ( CAP ) : 80// <Enter> 80
-----example continues-----
```

Example: Entering a New Order (continued)

WAS THE PATIENT COUNSELED: NO// Y YES
WAS COUNSELING UNDERSTOOD: NO// Y YES
```

An option to add a progress note has been added. If "Yes" is entered at this prompt, the progress note entry will begin after the order information has been displayed and confirmed. The order is redisplayed, along with information on any service-connected disabilities on record.

To determine if the order should be charged copay, eligible copay exemptions for the order are displayed one at a time. The user is asked if it the first applies to the order. In this example, the user is first asked if the order is being prescribed for any of the service-connected conditions displayed. If yes had been entered at this prompt, the fill would have been set for No Copay and no other exemption questions would have been asked. In this example, the patient has reported exposure to herbicides during Vietnam-era service.

```
Was treatment related to Agent Orange exposure? NO

Is this correct? YES// <Enter>

Another New Order for OPPATIENT16,ONE? YES//
```

-----example continues-----

Medications with non-numeric dosages, such as ointments and creams, will display non-numeric possible dosages as a default. Because the dosage is non-numeric, values for dispense units per dose and quantity cannot be calculated.

Example: Entering a New Order (continued)

```
DRUG: HYDROCORTISONE 0.5% CREAM DE200 VISN FORM; 30 GM/TUBE (IEN)
...OK? Yes// (Yes)

Now doing order checks. Please wait...

Available Dosage(s)

1. SMALL AMOUNT
2. MODERATE AMOUNT
3. LIBERALLY
4. LARGE AMOUNT

Select from list of Available Dosages, Enter Free Text Dose or Enter a Question Mark (?) to view list: 2 MODERATE AMOUNT

You entered MODERATE AMOUNT is this correct? Yes// <Enter> YES
ROUTE: TOPICAL// <Enter> TOPICAL
```

Entering a New Order -- ePharmacy (Third Party Billable)

For patients who have active third party insurance and have the appropriate eligibility requirements, the software will submit electronic claims to their insurance companies when prescriptions for billable drugs are ordered.

After a WINDOW order is entered and finished, the billing data is sent to the Electronic Claims Management Engine (ECME). ECME sends a message back to Outpatient Pharmacy displaying the status of the claim. For MAIL orders, the communication between Outpatient Pharmacy and ECME happens either during the Local Mail Label Print or during the CMOP transmission.

The following example shows the creation of a new WINDOW order starting with the "DRUG:" prompt.

Example: Entering a New Order for ePharmacy Billing

```
DRUG: PREDNISONE

Lookup: GENERIC NAME

1 PREDNISONE 1MG TAB HS051

2 PREDNISONE 20MG S.T. HS051

3 PREDNISONE 5MG TAB HS051

CHOOSE 1-3: 3 PREDNISONE 5MG TAB HS051

E PAYABLE

Another New Order for OPPATIENT, FOUR? YES// NO
```

View of RX:

If a new order is rejected due to a Drug Utilization Review (DUR) or Refill Too Soon, the prescription will be marked as "REJECTED", and the user will have the opportunity to resolve before continuing.

The following example shows a sample ECME transmission rejection, and how to resolve the rejection error.

Example: Handling a Rejected New Order for ePharmacy Billing

```
Prescription 999999 successfully submitted to ECME for claim generation.

Claim Status:
IN PROGRESS-Waiting to start
IN PROGRESS-Waiting for packet build
IN PROGRESS-Waiting for transmit

For Refill Too Soon rejects, the same choices apply.

Displaying a Patient's Remote Prescriptions

If a patient has prescriptions at another location, when the user selects the patient to enter a new order from Patient Prescription Processing, the following message appears.

```
REMOTE PRESCRIPTIONS AVAILABLE!
Display Remote Data? N//
```

If the user responds **NO**, then the normal procedure occurs for entering prescriptions. If the user responds **YES**, the "Remote Facilities Visited" screen appears such as the following example.

```
Remote Facilities Visited Dec 30, 2008@17:26:47 Page: 1 of 1

Editing a New Order

An asterisk or star (*) is shown in front of each field that will create a new order if it is changed. The Sig field cannot be edited directly, but it will change if the fields used to construct the Sig are edited.

When editing fields preceded by an asterisk (*) in an ePharmacy order (or electronically third party billable prescription), upon acceptance of the edited order the original prescription will be discontinued and a new order created. If the latest fill of the original order has not been released and is E Payable, the claim for that fill will be reversed. A new claim is submitted for the new prescription. For more information, see the example Editing an ePharmacy Order.

Do not use the up-arrow (^) after editing one field to jump past the rest of the fields. Using just the up-arrow results in the changes just entered being deleted. The user must press **Enter>** through *all* the order fields when editing to save the changes.

Example: Editing a New Order

```

WAS COUNSELING UNDERSTOOD:	NO// Y YES		

Editing an ePharmacy Order

When editing fields preceded by an asterisk (*) in an ePharmacy order (or electronically third party billable prescription), upon acceptance of the edited order the original prescription will be discontinued and a new order created. If the latest fill of the original order has not been released and is E Payable, the claim for that fill will be reversed. A new claim is submitted for the new prescription.

If the original claim was E Payable, and edits are made to any of these fields – Provider, Qty, Days Supply, Division, Fill Date, NDC, or DAW Code – then the original payable claim is reversed and a new claim is submitted to ECME. If the original claim was rejected, then a reversal is not necessary, and a new claim is submitted to ECME.

Press **Enter>** twice to scroll to page 3 of the Medication Profile. Notice that a new field displays on the profile: DAW Code. DAW stands for "Dispense as Written" and refers to a set of ten NCPDP codes (0-9) that tells third party payers why a brand or generic product was selected to fill a prescription. When a new prescription is entered for a specific drug, the DAW code from the drug is stored in the PRESCRIPTION file (#52) for each fill. This field is solely being used for electronic billing purposes. It communicates to the third party payer that a drug has a special characteristic, which may prevent the payer from rejecting the claim. The available codes include:

Code Description

- 0 NO PRODUCT SELECTION INDICATED
- 1 SUBSTITUTION NOT ALLOWED BY PRESCRIBER
- 2 SUBSTITUTION ALLOWED-PATIENT REQUESTED PRODUCT DISPENSED
- 3 SUBSTITUTION ALLOWED-PHARMACIST SELECTED PRODUCT DISPENSED
- 4 SUBSTITUTION ALLOWED-GENERIC DRUG NOT IN STOCK
- 5 SUBSTITUTION ALLOWED-BRAND DRUG DISPENSED AS A GENERIC
- 6 OVERRIDE
- 7 SUBSTITUTION NOT ALLOWED-BRAND DRUG MANDATED BY LAW
- 8 SUBSTITUTION ALLOWED-GENERIC DRUG NOT AVAILABLE IN MARKETPLACE
- 9 OTHER

The DAW Code default is 0 – No Product Selection Indicated, unless the DAW Code has been set for this drug at the DRUG file level.

Enter **21** to edit the field.

Using the Copy Action

If a double question mark (??) is entered at the "Select Action" prompt above, the hidden actions below will display in the action area.

```
The following actions are also available:

AL Activity Logs (OP) OTH Other OP Actions FS First Screen
VF Verify (OP) REJ View REJECT GO Go to Page
CO Copy (OP) DIN Drug Restr/Guide (OP)LS Last Screen
RP Reprint (OP) + Next Screen PS Print Screen

Copying an ePharmacy Order

When copying an ePharmacy order, upon acceptance of the copied order the original prescription will be discontinued and a new order created. If the latest fill of the original order has not been released and is E Payable, the claim for that fill will be reversed. A new claim is submitted for the new prescription.

Renewing a Prescription

This action allows the pharmacy manager, pharmacist, or pharmacy technician to process renewals for existing orders.

Example: Renewing a Prescription

[This example begins after an order is selected from the Medication Profile screen.]

```

```

The user may renew more than one order on the same patient by typing the desired order numbers separated by a comma (for example: 1,3,5).

Original provider comments are not carried over to any renewals in Outpatient Pharmacy.

Renewing an ePharmacy Order

When renewing an ePharmacy order, upon acceptance of the renewed order the original prescription will be discontinued and a new order created. If the latest fill of the original order has not been released and is E Payable, the claim for that fill will be reversed. A new claim is submitted for the new prescription.

[This example begins after an order is selected from the Medication Profile screen.]

Flagging and Unflagging a New Pending Order

Flagging a pending order allows you to prevent an order from being processed and attach a note known as a flag to the pending order. After the flag has been addressed, you can unflag the order, allowing it to then be processed. Note that only new pending orders can be flagged.

The following provides examples of how to flag and unflag a pending order from a medication profile within *Patient Prescription Processing*.

If a pending order is flagged, the row number is highlighted on the Medication Profile screen (shown in the following example). Select the order to view the flag or to flag the new pending order.

Example: A Flagged Pending Order

```

Select Orders by number: (1-2): 2
```

From the Pending OP Orders screen, you can flag and unflag an order, as well as view the flagged reason. To flag the order, enter **FL** and then enter a "REASON FOR FLAG", alert the proper individual that the flag has been added by pressing **Enter**> to select the default name or entering a different user name and pressing **Enter**>, and the flagging process is complete.

Example: Flagging an Order

```
REASON FOR FLAG: DOUBLE CHECK WITH PATIENT FOR HEART CONDITION BEFORE DISPENSING.

Send alert to: PSOUSER, ONE// BIRMINGHAM ALABAMA OP PHARMACIST ... order flagged.
```

When an order is flagged, "FL-" is placed in front of "Pending OP Orders" in the upper left corner, and the flagged reason is listed below the patient identifying information.

Example: A Flagged Order

```

ED Edit
                       FN Finish
Select Item(s): Next Screen// FL Flag/Unflag
```

To unflag an order, enter **FL** at the "Select Item(s)" prompt, and then enter your "COMMENTS". When you press **Enter**>, the order is no longer flagged.

Example: Unflagging an Order

```
FLAGGED: 03/13 23:14 by OPPHARM, TWO

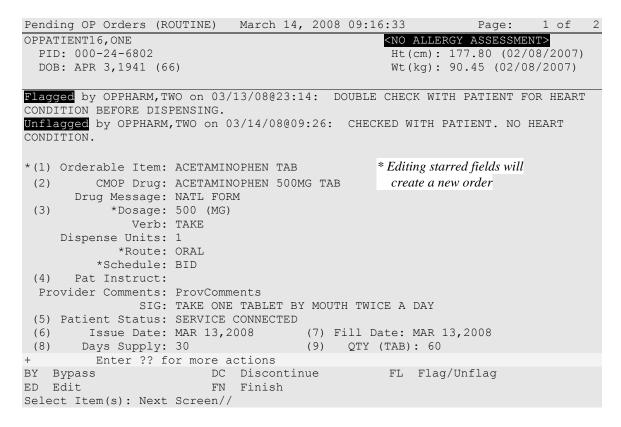

DOUBLE CHECK WITH PATIENT FOR HEART CONDITION BEFORE DISPENSING.

COMMENTS: CHECKED WITH PATIENT. NO HEART CONDITION.

... order unflagged.
```

At that point, the flag from the Medication Profile is removed, but the flagged/unflagged reason remains on the Pending OP Orders screen unless you reflag the order.

Example: An Unflagged Order

After pending orders have been unflagged, they can be processed.

If you attempt to process a flagged order, you are prompted "Unflag Order? NO//". If you respond **YES**, enter comments to unflag the order and continue with processing. If you respond **NO**, you cannot process the order because it is still flagged.

Barcode Rx Menu[PSO BARCODE MENU]

Use this menu to batch barcode refills and renewals of prescriptions, and check the quality of the barcode print. The menu contains the following options:

- Barcode Batch Prescription Entry
- Check Quality of Barcode
- Process Internet Refills

Barcode Batch Prescription Entry

[PSO BATCH BARCODE]

Enter refills or renewals by batch entry using barcodes with this option. Select either refills or renews. Then fill in information for the prescriptions to be batch barcode, i.e., fill date, route, etc. Next, use a barcode wand to enter the barcodes for the prescriptions to be refilled or renewed.

Check Quality of Barcode

[PSO BARCODE CHECK]

No action is taken on the prescription by using this option. Use this option to check the quality of the printed barcodes or use it to practice using the barcode reader. After the barcode is scanned the barcode number will echo back on the screen and the screen will return to the "Read Barcode" prompt. No action is taken on the prescription by using this option.

The following are some common causes for failure of the barcode reader and how they can be corrected.

- 1. Barcode too faint (change printer ribbon)
- 2. Improper scanning (move the wand at a steady rate)
- 3. Defective barcode reader (replace the reader)

Process Internet Refills

[PSO INTERNET REFILLS]

This option allows the pharmacist to process prescription orders entered on the Internet through My HealtheVet. The system will prompt the user for the information as shown in the following example. The user enters the appropriate response for each prompt by pressing **Enter** on the keyboard to accept the default setting for a prompt. The user must type the appropriate word or letter to enter a response contrary to the default.

The recommended usage of this option is three times a day to ensure the requested refills are processed in a timely manner.

Example: Process Internet Refills Screen

```
FILL DATE: (1/28/2005 - 12/31/2699): TODAY// <Enter> (AUG 11, 2005)
MAIL/WINDOW: MAIL// <Enter> MAIL
Will these refills be Queued or Suspended? Q// S <Enter> USPENDED
Allow refills for inpatient ? N// <Enter> O
Allow refills for CNH ? N// <Enter> O
Allow early refills? N// <Enter> O
Process internet refill requests at this time? YES// <Enter> YES
Process internet refills for all divisions? NO// <Enter> O
```

Users can process refills for their division or all divisions within a site. However, sites can set parameters in the PHARMACY SYSTEM file for the INTERDIVISIONAL PROCESSING and DIVISION PROMPT ASKED fields that control responses to user input on the Internet Refills Screen. Note that site control parameters override any entries made by the user in the Process Internet Refills screen.

If the INTERDIVISIONAL PROCESSING parameter is set to **No**, regardless of the user's input at the "Process internet refills for all divisions?" prompt, only the refills for the user's division will be filled.

If the INTERDIVISIONAL PROCESSING parameter is set to **Yes** and the DIVISION PROMPT ASKED parameter is set to **No**, then the refill orders are processed for all divisions without any additional user input.

If the INTERDIVISIONAL PROCESSING parameter is set to **Yes** and the DIVISION PROMPT ASKED parameter is set to **Yes**, refills for the user's division will be processed without any additional input. If unprocessed refills outside the user's division exist, the "Continue?" prompt displays, allowing the user to confirm each refill, as shown in the example below.

Example: Process Internet Refills for all Divisions?

```
Process internet refills for all divisions? NO// Y YES

Now refilling Rx# 100002310 Drug: CAPTROPRIL 100MG TABS

Qty: 60 Sig: TAKE ONE TABLET BY MOUTH TWICE A DAY

Rx # 100002310 is for (ALBANY) division. 

This refill is outside the user's division.
```

If the user enters **Yes** at the "Continue?" prompt, the refill will be processed.

If the user enters **No** at the "Continue?" prompt, the refill will not process at this time, and the refill request will remain in the PRESCRIPTION REFILL REQUEST file. These refill requests may be processed later by a user in the same division, or any division, depending on the PHARMACY SYSTEM file parameters.

Refills processed successfully are flagged as FILLED in the RESULTS field of the PRESCRIPTION REFILL REQUEST file.

Refills not processed due to conditions such as: Rx Expired, Discontinued, On Hold, Deleted, are flagged as NOT FILLED in the RESULTS field of PRESCRIPTION REFILL REQUEST file.

Complete Orders from OERR [PSO LMOE FINISH]

When a clinician has created an order for a patient, the pharmacist then completes and verifies the order. The *Complete Orders from OERR* option is used to complete orders entered into the patient record through Order Entry Results Reporting (OERR) V. 3.0. This option uses the List Manager features.

Orders may be selected by patient, route, priority, clinic, or flag. "E" can be entered at the "Select By:" prompt to stop processing orders.

If a temporary address has no end date, the following text is now displayed: "(Temp address from XXX 99,9999 till (no end date))".

For ePharmacy orders, after an order is finished, the billing data is sent to the Electronic Claims Management Engine (ECME). ECME sends a message back to Outpatient Pharmacy displaying the status of the claim. For an example, see "Finishing an ePharmacy Order" in this section.

Example: Finishing an Order from OERR

```
Select Outpatient Pharmacy Manager Option: RX (Prescriptions)
          Orders to be completed for all divisions: 16
Do you want an Order Summary? No// <Enter> NO
         Patient Prescription Processing
          Barcode Rx Menu ...
         Complete Orders from OERR
          Discontinue Prescription(s)
         Edit Prescriptions
         ePharmacy Menu...
         List One Patient's Archived Rx's
         Manual Print of Multi-Rx Forms
         Reprint an Outpatient Rx Label
         Signature Log Reprint
         View Prescriptions
Select Rx (Prescriptions) Option: Complete Orders from OERR
There are multiple Institutions associated with this Outpatient Site for
finishing orders entered through CPRS. Select the Institution for which to
finish orders from. Enter '?' to see all choices.
Select CPRS ORDERING INSTITUTION: ALBANY// <Enter> NY VAMC 500
You have selected ALBANY.
After completing these orders, you may re-enter this option and select again.

All Patients or Single Patient: (A/S/E): SINGLE// <Enter>
Select Patient: OPPATIENT16, ONE OPPATIENT16, ONE
                                                   4-3-41 000246802
        SC VETERAN
Do you want to see Medication Profile? Yes//
```

-----example continues-----

The user may enter a question mark at the "Select Patient" prompt to view a list of patients with pending orders. A single patient may be selected for processing, or pending orders for all patients may be processed in sequence by the time of each order's entry into the system.

Flagged orders will not be processed. They are not a part of any pending orders. To process flagged orders, you should enter **FL** at the "Select By" prompt. This ensures you will view all patients with flagged pending orders, allowing you to address their flagged orders; however, if you know which patients have flagged orders, you can access the flagged orders through the Medication Profile.

If the user answers **YES** to "Do you want to see Medication Profile?" and the patient has remote prescription(s), the following prompt appears.

REMOTE PRESCRIPTIONS AVAILABLE! Display Remote Data? N//

If the user answers **YES** to "Display Remote Data?" then the "Remote Facilities Visited" screen appears, allowing the user to see what facilities the patient has prescriptions at and what those prescriptions are.

After the user answers the medication profile prompt, a warning displays if no allergy assessment has been made. The patient's eligibility and RX patient status also displays.

Example: Finishing an Order from OERR (continued)

Flagging and Unflagging a New Pending Order

Flagging a pending order allows you to prevent an order from being processed and attach a note known as a flag to the pending order. After the flag has been addressed, you can unflag the order, allowing it to then be processed. Note that only new pending orders can be flagged.

Flagged orders will not be processed. They are not a part of any pending orders. When you have flagged orders to process from the *Complete Orders from OERR* option, you should enter **FL** at the "Select By" prompt (shown in the following example). This ensures you will view all patients with flagged pending orders, allowing you to address their flagged orders; however, if you know which patients have flagged orders, you can access the flagged orders through the Medication Profile.

The following provides examples of how to flag and unflag pending orders from a medication profile within the *Complete Orders from OERR* option.

Example: Finishing an Order from OERR

```
Select Outpatient Pharmacy Manager Option: RX (Prescriptions)
          Orders to be completed for all divisions: 16
Do you want an Order Summary? No// <Enter> NO
          Patient Prescription Processing
          Barcode Rx Menu ...
          Complete Orders from OERR
          Discontinue Prescription(s)
         Edit Prescriptions
         ePharmacy Menu...
         List One Patient's Archived Rx's
         Manual Print of Multi-Rx Forms
         Reprint an Outpatient Rx Label
         Signature Log Reprint
         View Prescriptions
Select Rx (Prescriptions) Option: COMPlete Orders from OERR
There are multiple Institutions associated with this Outpatient Site for
finishing orders entered through CPRS. Select the Institution for which to
finish orders from. Enter '?' to see all choices.
Select CPRS ORDERING INSTITUTION: ALBANY// <Enter> NY VAMC 500
You have selected ALBANY.
After completing these orders, you may re-enter this option and select again.
      <There are 3 flagged orders for ALBANY>
Select By: (PA/RT/PR/CL/FL/E): PATIENT// FL <Enter>
Do you want to see Medication Profile? Yes// <Enter>
```

After answering the "Medication Profile" prompt, a warning displays if no allergy assessment has been made. The patient's eligibility and RX patient status also displays.

```

                         FN Finish
ED Edit
Select Item(s): Next Screen// FL Flag/Unflag
```

To unflag an order, enter **FL** at the "Select Item(s)" prompt, and then enter your "COMMENTS". When you press **<Enter>**, the order is no longer flagged.

Example: Unflagging an Order

```
FLAGGED: 03/13 23:14 by OPPHARM, TWO

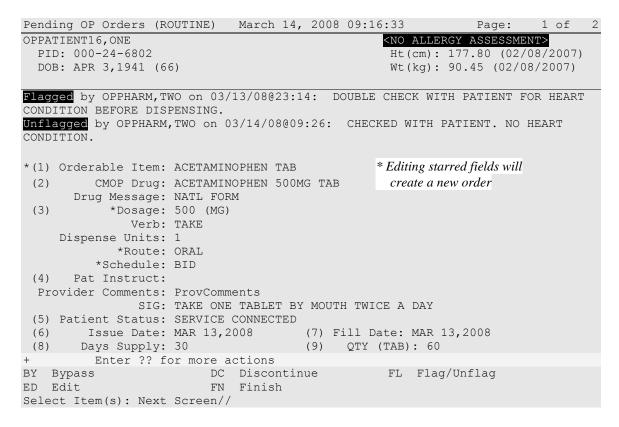

DOUBLE CHECK WITH PATIENT FOR HEART CONDITION BEFORE DISPENSING.

COMMENTS: CHECKED WITH PATIENT. NO HEART CONDITION.

... order unflagged.
```

At that point, the flag from the Medication Profile is removed, but the flagged/unflagged reason remains on the Pending OP Orders screen unless you reflag the order.

Example: An Unflagged Order

After pending orders have been unflagged, they can be processed.

If you attempt to process a flagged order, you are prompted "Unflag Order? NO//". If you respond **YES**, enter comments to unflag the order and continue with processing. If you respond **NO**, you cannot process the order because it is still flagged.

Changes to Finishing Pending Orders Process - Digitally Signed Orders Only

Digitally signed orders will be identifiable by the "Digitally Signed Order' message in reverse video on the message bar.

If the terminal in use is set up as a VT-100, there may be problems with this message display and the "Processing Digitally Signed Order" message. Updating the VistA terminal session to use VT-320 will avoid this problem.

The provider's PKI certificate is re-validated when accessing a digitally signed order. If the validation check is unsuccessful, an error code is sent to the pharmacist and an entry is made in the Rx Activity Log. The error code type will result in either the order being automatically rejected/discontinued or the pharmacist being given the choice to finish, bypass, or discontinue the order. Digitally signed prescriptions that have been discontinued cannot be reinstated. The Speed Discontinuation functionality will no longer delete unverified prescriptions.

Finishing an Order from OERR with Multiple Institutions

Multiple Institution entries can be added using the *Site Parameter Enter/Edit* option. If the local site has multiple entries in the CPRS ORDERING INSTITUTION field the user will be prompted for an Institution when entering the *Complete Orders from OERR* option. After an Institution is selected, then the Pending Orders that will be shown for completion will be those Pending Orders from clinics that are associated with the Institution selected.

Example: Finishing an Order from OERR with Multiple Institutions

```
Select Outpatient Pharmacy Manager Option: RX (Prescriptions)

Orders to be completed for all divisions: 21

Do you want an Order Summary:? No// <Enter> NO

Select Rx (Prescriptions) Option: COmplete Orders from OERR

There are multiple Institutions associated with this Outpatient Site for finishing orders entered through CPRS. Select the Institution from which to finish orders. Enter '?' to see all choices.
```

```
Select CPRS ORDERING INSTITUTION: BIRMINGHAM, AL.// <Enter> BIRMINGHAM, AL.521
You have selected BIRMINGHAM, AL..
After completing these orders, you may re-enter this option and select again.
Select By: (PA/RT/PR/CL/E): PATIENT// PA
```

[See the previous example for completion of this option.]

Finishing an ePharmacy Order

After the user reviews the ePharmacy order and chooses to accept the order, the billing data is sent to ECME, which sends a message back to Outpatient Pharmacy displaying the status of the claim. The ECME section of the Activity Log is also updated.

```
Is this correct? YES// <Enter>
-Rx 100003869A has been discontinued...

Prescription 100003919 successfully submitted to ECME for claim generation.

Claim Status:
IN PROGRESS-Waiting to start
IN PROGRESS-Waiting for packet build
IN PROGRESS-Packet being built
IN PROGRESS-Waiting for transmit
IN PROGRESS-Transmitting
E PAYABLE
```

Activity Log

Multiple Activity Logs exist for a completed or finished order. Any single activity log or all activity logs can be viewed.

Use the hidden action (AL) to view the activity log once a completed or finished order is selected.

Example: Activity Log

```
OP Medications (ACTIVE)

```

When a prescription is discontinued, the software checks for any unresolved ECME rejections for that prescription. If a DUR REJECT or REFILL TOO SOON REJECT is found, it will be marked resolved with the reason PRESCRIPTION DISCONTINUED.

When an ePharmacy prescription is discontinued, the software checks for any unreleased fills with a PAYABLE claim. If found, a reversal request is sent to ECME, which forwards it on to the third party payer.

When a pending renewal order is discontinued, Outpatient Pharmacy verifies if there is an active prescription for the same drug. If an active prescription is found, you are prompted with "There is an active Rx for this pending order, Discontinue both (Y/N)?" If you respond **YES**, both the pending order and the active order are discontinued. If you respond **NO**, only the pending order is discontinued and the active order is not discontinued.

Edit Prescriptions[PSO EXEDIT]

This option allows changes to be made to entered orders. Newly entered orders can be edited before release by typing in the corresponding field number. Previously entered orders can be edited by entering the prescription number, then specifying the field to be edited. An asterisk or star (*) is shown in front of each field that will create a new order if it is changed. See the section "Editing an Order" for an example.

When editing fields preceded by an asterisk (*) in an ePharmacy order (or electronically third party billable prescription), upon acceptance of the edited order the original prescription will be discontinued and a new order created. If the latest fill of the original order has not been released, the claim for that fill will be reversed. A new claim is created for the new prescription. See "Editing an ePharmacy Order" for an example of editing ePharmacy orders.

DAW/NDC Edit

The Dispensed As Written (DAW)/National Drug Code (NDC) field for discontinued and expired orders can be edited.

For ePharmacy prescriptions, the DAW/NDC field for discontinued and expired orders can be edited. The following statuses are editable.

- 11 EXPIRED
- 12 DISCONTINUED
- 14 DISCONTINUED BY PROVIDER
- 15 DISCONTINUED (EDIT).

These are additional status results from the prescription being discontinued from CPRS. For status 14 - DISCONTINUED BY PROVIDER, the user can choose to discontinue the prescription in CPRS by selecting "Requesting Physician Cancelled" for the reason.

The following is an example of the activity log entry stored on the prescription for this type of discontinue:

```
1 06/20/08 DISCONTINUED ORIGINAL OPPHARM, ONE Comments: Discontinued by OE/RR.
```

For status 15 - DISCONTINUED (EDIT), the user can edit a prescription in CPRS which discontinues the prescription being edited resulting in status 15 in the Outpatient Pharmacy package. The following is an example of the activity log entry on the prescription in OP:

2 06/05/08 DISCONTINUED ORIGINAL OPHARM, ONE

ePharmacy Menu [PSO EPHARMACY MENU]

The following menu items are locked with the PSORPH key: ePharmacy Medication Profile Division Preferences, ePharmacy Site Parameters, Third Party Payer Rejects – View/Process and Third Party Payer Rejects – Worklist. The following menu item is locked with the PSO TRICARE MGR key: TRICARE Bypass/Override Report.

These menu items allow the user to perform ePharmacy specific functions including rejections by third party payers including DUR/RTS and has the following options:

- Ignored Rejects Report
- ePharmacy Medication Profile (View Only)
- NDC Validation
- ePharmacy Medication Profile Division Preferences
- ePharmacy SiteParameters
- Third Party Payer Rejects View/Process
- Third Party Payer Rejects Worklist
- TRICARE Bypass/Override Report

DURs can occur when a third party determines there are safety issues involved with an Rx claim submission, and they can be due to high dose, drug interaction, and excessive utilization. The third party payer returns an NCPDP rejection code of 88 to indicate a DUR.

Refill Too Soon rejections happen when a third party payer determines that a prescription is being processed too early compared to the last time the prescription was filled. This can occur for several reasons, including third party payer's policy differs from VA policy, patient receiving medication at another pharmacy, or the provider may have increased the dosage or frequency of the medication. The third party payer returns an NCPDP rejection code of 79 to indicate a Refill Too Soon.

Prescriptions rejected as DUR and Refill Too Soon are moved to the REFILL TOO SOON/DUR REJECTS (Third Party) section of the Medication Profile. The user must resolve a rejected prescription before other actions such as release, label print, renew, and refill, among others, can be performed on it. Actions may still be taken on these prescriptions through CPRS.

Ignored Rejects Report

[PSO IGNORED REJECTS REPORT]

This option gives the user the ability to run a report for third-party rejects that have been ignored and consequently closed by the pharmacy users.

The user can select one of the following parameters to filter the data in the report:

- **DIVISION**: Allows the user to select one, some or all divisions.
- **DATE RANGE**: Allows the user to select a date range.
- **SORT BY**: Allows the user to choose different fields to sort the report by. Any combination can be selected:
 - o **PATIENT**: Allows the user to select a single, multiple or all patients
 - o **DRUG:** Allows the user to select a single, multiple or all drugs.
 - USER: Allows the user to select a single, multiple or all users that have ignored third party rejects.

Example: Ignored Rejects Report

```
Select ePharmacy Menu Option: IR Ignored Rejects Report
You may select a single or multiple DIVISIONS,
or enter ^ALL to select all DIVISIONS.
DIVISION: ^ALL
BEGIN REJECT DATE: 030606 (MAR 06, 2006)
  END REJECT DATE: 061407 (JUN 14, 2007)
    Enter the SORT field(s) for this Report:
      1 - PATIENT
       2 - DRUG
       3 - USER
    Or any combination of the above, separated by comma,
    as in these examples:
       2,1 - BY PATIENT, THEN DRUG
      3,1,2 - BY USER, THEN BY PATIENT, THEN BY DRUG
SORT BY: PATIENT// 1,2
     SORT BY PATIENT
         THEN BY DRUG
You may select a single or multiple PATIENTS,
or enter ^ALL to select all PATIENTS.
PATIENT: ^ALL
You may select a single or multiple DRUGS,
or enter ^ALL to select all DRUGS.
DRUG: ^ALL
DEVICE: HOME// [Select Printer Device]
```

ePharmacy Medication Profile (View Only)

[PSO PMP]

Although the name indicates "ePharmacy Medication Profile", this option can be used to list the medication profile for any patient on file. It will be used mostly by ePharmacy users for claims research purposes. This functionality is also available from the Reject Worklist through the Medication Profile (MP) action.

Example 1: Medication Profile with default view

NDC Validation

The initial validation of the NDC can be performed by a pharmacy technician. This functionality only applies to local fills that are not sent to OPAI. This function provides a pharmacy technician the ability to manually enter the prescription number or scan the bar code of the existing prescription label. Then the user may manually enter or scan the NDC of the stock bottle used to fill the prescription. When the system matches the NDC, confirmation is provided to the pharmacy tech and allows the technician to continue processing. However, if the system detects a mismatch and the NDC of the stock bottle has an associated entry in the synonym file, the NDC will be updated in Prescription file (#52) for the fill. The system will then prompt the technician to press enter to continue, a new label will be printed, the original electronic claim reversed, and a new claim submission will be transmitted with the new NDC. In the event that the revised NDC prompts a RTS/DUR rejection, the system will immediately send the item to the Reject Worklist.

In a case where the NDC entered is not defined for the drug in the Drug File, the system prompts the technician that a mismatch has occurred and the prescription needs to be validated by a pharmacist. The system notes that the NDC had not been validated and allows the pharmacy tech to move to the next prescription. In the event of a change of NDC prompted a rejection, the system immediately sends the item to the Reject Worklist.

The releasing pharmacist will receive a notation that NDC has been validated by technician when processing. If the NDC change has prompted a claim reversal and produced a RTS/DUR rejection, the pharmacist will be presented with a Reject Processing screen at release.

Example: Matched NDC:

```
Select ePharmacy Menu Option: NV NDC Validation

Prescription: 101310 DIPYRIDAMOLE 25MG TAB

Rx: 101310 Fill: 0 Patient: OPPATIENT, ONE
Drug: DIPYRIDAMOLE 25MG TAB NDC: 00597-0017-10

Prescription label NDC: 00597-0017-10

Stock NDC: 00597001710

NDC match confirmed

Prescription:
```

Example: Non-matched NDC:

```
Prescription: 101341 BIPERIDEN 2MG TAB

Rx: 101341 Fill: 0 Patient: OPPATIENT, ONE

Drug: BIPERIDEN 2MG TAB NDC: 00044-0120-05

Prescription label NDC: 00044-0120-05

Stock NDC: 00044012006

Due to a change in NDC, a claims reversal and resubmission will be performed.

Prescription 101341 successfully submitted to ECME for claim generation.

ePharmacy Medication Profile Division Preferences

[PSO PMP SITE PREFERENCES]

This option allows the user to specify certain settings that will control how the *ePharmacy Medication Profile* option works for that user. Below is the list of settings that can be specified through this option:

- **EXP/CANCEL CUTOFF:** Indicates the maximum number of days for an expired and/or discontinued prescription to be cut from the profile.
- **SORT BY:** Indicates the default sorting column. The options are: Rx#, Drug Name, Issue Date or Last Fill Date.
- **SORT ORDER:** Indicates the order in which the column above will be sorted: Ascending or Descending.
- **DISPLAY SIG:** Indicates whether the SIG should be displayed under each prescription or if it should be hidden.
- **GROUP BY STATUS:** Indicates whether the list should be grouped by status (Active, Discontinued, Hold, etc...) or not.
- **DISPLAY ORDER COUNT:** Indicates whether the number of orders under each group should be displayed besides the group name. Example _____ACTIVE (3 orders)_____

```
Select ePharmacy Menu Option: PF ePharmacy Medication Profile Division
Preferences
     ALBANY ISC's current default view:
     EXP/CANCEL CUTOFF : 200 DAYS
     SORT BY : Rx#
SORT ORDER : ASCENDING
DISPLAY SIG : ON
     GROUP BY STATUS : OFF
     DISPLAY ORDER COUNT: OFF
     Delete this default view? NO// <Enter>
EXP/CANCEL CUTOFF: 200// <Enter> DAYS
SORT BY: RX// <Enter> Rx#
SORT ORDER: ASCENDING// ^EXP
EXP/CANCEL CUTOFF: 200// 120 DAYS
SORT BY: RX// <Enter> Rx#
SORT ORDER: ASCENDING// <Enter>
DISPLAY SIG: ON// <Enter>
GROUP BY STATUS: OFF// <Enter>
DISPLAY ORDER COUNT: OFF//<Enter>
Saving...OK!
```

If there is a set of preferences already on file for the division the user is logged under, the option to delete such preferences is presented to the user as seen above.

ePharmacy Site Parameters

The ePharmacy Site Parameters file (#52.86) has been added to store ePharmacy Site parameters by division. Along with this, a new EPHARMACY SITE PARAMETERS [PSO ePHARM SITE PARAMETERS] option has been added to the existing ePharmacy Menu [PSO EPHARMACY MENU].

This new option requires the PSORPH security key.

The following site parameters are definable using this option:

- ALLOW ALL REJECTS: Requires a YES or NO answer. <u>It is highly suggested that NO be answered at this prompt.</u> Answering YES to this prompt will signify that all prescription fills with ePharmacy rejected claims will automatically be placed on the Third Party Payer Rejects Worklist, also known as the Pharmacy Reject Worklist. This is in addition to Refill-Too-Soon (79), Drug Utilization Review (DUR/88) and TRICARE rejects which are automatically placed on the Pharmacy Reject Worklist. Any individually defined reject codes in this file will be overridden when a "YES" answer is given.
- REJECT WORKLIST DAYS: This is the number of days an uncommented reject can remain on the reject worklist without being included in the nightly reject worklist alert mail message.

The following prompts appear consecutively and the user may enter as many reject codes as they desire along with the manner in which each will be allowed to be placed on the reject worklist.

- REJECT CODE: A valid third party claim reject code should be entered. A listing of these codes is provided when double question marks (??) are entered for this prompt. Valid codes are contained within the BPS NCPDP REJECT CODES file (#9002313.93). Also, a value defined in this field triggers definition of USER field (#2) and DATE OF LAST UPDATE field (#3). Any individually defined codes will be overridden when the ALLOW ALL REJECTS prompt is answered as YES.
- AUTO SEND: This prompt is a companion to the REJECT CODE prompt. Enter YES to allow
 the entered REJECT CODE to be automatically placed on the Pharmacy Reject Worklist or NO
 to require Outpatient Pharmacy Electronic Claims Coordinator (OPECC) intervention to do so. A
 null value will be treated the same as entering NO in this field.

The following is an example of definition of ePharmacy Site Parameters:

```
Select ePharmacy Menu Option: SP ePharmacy Site Parameters
Regardless of any parameters defined, Refill-Too-Soon, Drug Utilization
Review(DUR) and Tricare rejects will always be placed on the Third Party
Payer Rejects - Worklist, also known as Pharmacy Reject Worklist. These
parameters are uneditable and are the default parameters.

Third Party Payer Rejects - View/Process

[PSO REJECTS VIEW/PROCESS]

This option provides information about rejects that have been on the Third Party Payer Rejects – Worklist. This option allows the user to find, display and reopen rejects previously resolved from the Third Party Payer Rejects – Worklist in order to take action on them again.

The user can choose to view rejects for one, multiple, or all Outpatient Pharmacy Divisions.

Example: Viewing and Resolving Open Rejects

```
Select ePharmacy Menu Option: VP Third Party Payer Rejects - View/Process

You may select a single or multiple DIVISIONS,
or enter ^ALL to select all DIVISIONS.

DIVISION: ^ALL
```

The user can select one of the following selections to filter the data displayed:

• **DATE RANGE**: Selects a date range (Default: Last 90 days).

```
BEGIN REJECT DATE: T-90// <Enter> (MAR 09, 2007)

END REJECT DATE: T// <Enter> (JUN 07, 2007)
```

- (P)ATIENT: Selects a single patient, multiple patients, or all patients.
- (D)RUG: Selects a single drug, multiple drugs, or all drugs.
- (R)x: Selects a single prescription number, or multiple prescription numbers.
- (I)NSURANCE: Selects a single insurance, multiple insurances, or all insurances.

```
Select one of the following:

P PATIENT
D DRUG
R RX
I INSURANCE

By (P)atient, (D)rug, (R)x or (I)nsurance: P// INSURANCE

Enter the whole or part of the Insurance Company name for which you want to view/process REJECTS.

INSURANCE: TEST INS
ANOTHER ONE: <Enter>
```

Next, the user can choose to display either Unresolved, Resolved, or Both types of rejects.

```
Select one of the following:
              UNRESOLVED
       R RESOLVED BOTH
(U) NRESOLVED, (R) RESOLVED or (B) OTH REJECT statuses: B// <Enter> BOTH
Please wait...
-----example continues-----
```

Example: Viewing and Resolving Open Rejects (continued)

```

DR Sort by Drug RE Sort by Reason RX Sort by Prescription PA Sort by Patient RF Screen Refresh GI Group by Insurance
Select: Quit//
        -----example continues------
```

The following options are available on the screen above:

- DR Sorts the list by the drug name.
- PA Sorts the list by the patient's last name.
- RE Sorts the list by the reject reason.
- RF Refreshes the screen. (This selection retrieves DUR/ REFILL TOO SOON rejects that happened after the screen was originally populated.)
- RX Sorts the list by Prescription number.
- GI Groups the rejects by Insurance Company name.

The following two sets of characters denote the order by which the list is being ordered: $[^{\land}]$ for ascending and $[^{\lor}]$ for descending. The order inverts every time the user selects the same column by which the list is already ordered. Thus, if the list is currently ordered by Patient in ascending order ($[^{\land}]$) and the user types "PA", the list will be re-sorted in descending order and the order indicator will change to ($[^{\lor}]$)

The user selects a specific record to display all relevant information about the prescription and the claim submitted to the payer.

Example: Viewing and Resolving Open Rejects (continued)

Third Party Payer Rejects - Worklist

[PSO REJECTS WORKLIST]

This option gives the user the ability to process Third Party Payer Rejects and TRICARE Non-billable rejects for one, multiple, or all Outpatient Pharmacy Divisions. Only OPEN/UNRESOLVED rejects that have clinical significance, such as DUR and Fill Too Soon, and rejects transferred from the ECME user screen, are added to the Worklist. Once the reject is marked CLOSED/RESOLVED, it is automatically removed from the Worklist.

Example: Resolving Open Rejects

```
Select Rx (Prescriptions) Option: EPHARMACY Menu

When a claim is rejected, typically the Payer provides a "Reason for Service Code", which displays on the reject as "Reason Code". The user can use this reason to then select which code is entered for "Professional Service Code" and "Result of Service Code".

Available codes for "Professional Service Code" include:

Code	Description
00	NO INTERVENTION
AS	PATIENT ASSESSMENT
CC	COORDINATION OF CARE
DE	DOSING EVALUATION/DETERMINATION
FE	FORMULARY ENFORCEMENT
GP	GENERIC PRODUCT SELECTION
M 0	PRESCRIBER CONSULTED
MA	MEDICATION ADMINISTRATION
MR	MEDICATION REVIEW
P0	PATIENT CONSULTED
PE	PATIENT EDUCATION/INSTRUCTION
PF	PATIENT REFERRAL
PH	PATIENT MEDICATION HISTORY
PM	PATIENT MONITORING
R0	PHARMACIST CONSULTED OTHER SOURCE
RT	RECOMMENDED LABORATORY TEST
SC	SELF-CARE CONSULTATION
SW	LITERATURE SEARCH/REVIEW
TC	PAYER/PROCESSOR CONSULTED
TH	THERAPEUTIC PRODUCT INTERCHANGE

Available codes for "Result of Service Code" include:

Code	Description
00	NOT SPECIFIED
1A	FILLED AS IS, FALSE POSITIVE
1B	FILLED PRESCRIPTION AS IS
1C	FILLED, WITH DIFFERENT DOSE
1D	FILLED, WITH DIFFERENT DIRECTIONS
1E	FILLED, WITH DIFFERENT DRUG
1F	FILLED, WITH DIFFERENT QUANTITY
1G	FILLED, WITH PRESCRIBER APPROVAL
1H	BRAND-TO-GENERIC CHANGE
1 J	RX-TO-OTC CHANGE
1K	FILLED, WITH DIFFERENT DOSAGE FORM
2A	PRESCRIPTION NOT FILLED
2B	NOT FILLED, DIRECTIONS CLARIFIED
3A	RECOMMENDATION ACCEPTED
3B	RECOMMENDATION NOT ACCEPTED
3C	DISCONTINUED DRUG
3D	REGIMEN CHANGED
3E	THERAPY CHANGED
3F	THERAPY CHANGED - COST INCREASE ACKNOWLEDGED

3G	DRUG THERAPY UNCHANGED
3H	FOLLOW-UP REPORT
3J	PATIENT REFERRAL
3M	COMPLIANCE AID PROVIDED

(This page included for two-sided copying.)

TRICARE Bypass/Override Report

[PSO Bypass/Override Report]

This menu option is locked with the PSO TRICARE MGR security key.

This option provides information in a detail or summary report format that will list prescriptions where the Bypass or Override was performed to enable processing of these prescriptions. The user has the ability to process TRICARE (I)npatient; TRICARE (N)on-Billable Product; TRICARE (R)eject Override; or(A)ll. Besides allowing the selection of all types, the report allows the selection of one or two types. For example, the user can select Non-billable and Reject for the same report.

- Date of Action (user-defined date range)
- Summary or Detail
- Subtotals of number of Rxs and bill cost available by Pharmacist or Provider
- Grand total number of Rxs contained in the report
- Grand total bill cost of the Rxs contained in the report

Example: Accessing the TRICARE Bypass/Override Report

```
Select Rx (Prescriptions) Option: epharmacy Menu
      Ignored Rejects Report

TRICARE Reject Processing

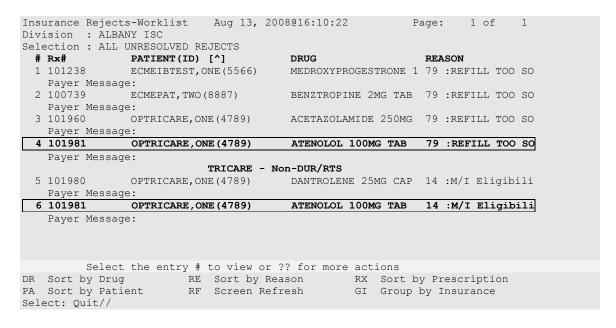

The Third Party Payer Rejects - Worklist [PSO REJECTS WORKLIST] and Third Party Payer Rejects - View/Process [PSO REJECTS VIEW/PROCESS] options have been modified in the following manner:

1. Display of non-DUR/RTS rejects

• Non-DUR/RTS TRICARE rejections will be segregated at the end of the displayed information. They will be denoted with a "TRICARE - Non-DUR/RTS" header. This header remains regardless of whether the GI - Group by Insurance action is toggled on or off. The TRICARE section sorts in the same manner as the main sort for non-TRICARE prescriptions (by Rx, drug, patient).

```

Select: Quit//
```

• TRICARE DUR/RTS rejects displays with all other DUR/RTS rejects. See the boxed text in the example below. Sequence 4 and 6 are rejects for the same prescription. Also note that in the following example GI - Group by Insurance action is toggled OFF.

When GI - Group by Insurance action is toggled ON, the header "TRICARE" displays, and this "TRICARE" section sorts alphabetically within RTS/DUR insurances. This TRICARE section is separate from the Non-DUR/RTS section that displays at the end of the listing.

Example with GI action toggled on:

```

2. Processing of TRICARE Rejections - TRICARE Eligible Bypass/Override Functions

• A bypass function is provided to allow continued processing of prescriptions for TRICARE eligible inpatients who's Patient status = Inpatient at the time the prescription is issued.

In the following example a patient who has been admitted into a VA hospital (Patient status = Inpatient) is allowed to go on a weekend "pass" and issued outpatient medications such as OTC drugs or supplies for the weekend. The system displays the Non-Billable Reason "TRICARE INPATIENT/DISCHARGE" on the screen. The display of the new Non-Billable Reason is due to the patient having Patient status = Inpatient, the patient is a TRICARE patient with TRICARE Insurance and an outpatient medication, OTC or Supply was issued.

```
ISSUE DATE: OCT 31,2010// (OCT 31, 2010)
FILL DATE: (10/31/2010 - 11/01/2011): OCT 31,2010// (OCT 31, 2010)
Nature of Order: WRITTEN// W
WAS THE PATIENT COUNSELED: NO// NO
Do you want to enter a Progress Note? No//
                                            NO
Rx # XXXX885
                     10/31/10
TRICARE, ONE (XXX-XX-XXXX) #3
TAKE 1 BY MOUTH 9
ACETAMINOPHEN 160MG/5ML ELIXIR (OZ)
VHAPROVIDER, ONE JOHN, DOE
# of Refills: 5
Is this correct? YES//
TRICARE INPATIENT/DISCHARGE
Another New Order for TRICARE, ONE? YES//
```

The following is a sample of the View Prescription ECME Log update. The Non-Billable Reason "TRICARE INPATIENT/DISCHARGE" is now displayed on the View Prescription ECME Log. The TRICARE INPATIENT/DISCHARGE status allows the system to record why a TRICARE Rx was allowed to be bypassed

Example: View Prescription ECME Log entry: TRICARE INPATIENT/DISCHARGE

TRICARE Eligible Outpatient Override Function

- An override function is provided to allow continued processing of prescriptions for TRICARE eligible outpatients when a rejected response is received from the TRICARE payer/PBM.
- The Reject Action prompt will default to "Quit". If the Q (Quit) action is selected, the rejected claim will go to the TRICARE section of the Pharmacy Third Party Payer Rejects Worklist. If the D (Discontinue) action is selected, the next prompt "Nature of Order" will default to "Service Reject". The I (Ignore) action is available if the user holds the "PSO TRICARE" security key and if selected, continued processing will occur.
- The Reject Action prompt will be updated to a default of "Quit".

Example of Reject Notification Screen Non-DUR/RTS with the default action of D (Discontinue)

You are bypassing claims processing. Do you wish to continue? NO// y YES
```

• For Non-Billable TRICARE rejects, a Non-Billable Notification Screen is provided to allow continued processing of prescriptions. The Reject Action prompt will default to "Discontinue". If the action D (Discontinue) is selected, the prompt "Nature of Order" will default to "Service Reject". The I (Ignore) action is available if the user holds the "PSO TRICARE" security key and if selected, continued processing will occur. If the action Q (Quit) is selected, the Non-Billable TRICARE eligible prescription will go to the **Pharmacy Third Party Payer Rejects** – **Worklist** utilizing Reject Code "eT" with reject description "TRICARE-DRUG NON BILLABLE." (The reject code "eT" is for use internal to the VistA system only and has no relation to any NCPDP reject code listing.) The new entry will be displayed in the TRICARE section of the **Pharmacy Third Party Payer Rejects** – **Worklist.**

In the following example a TRICARE Active Duty patient with Outpatient status submits an OTC, Non-Billable drug or supplies prescription for dispensing. The pharmacist will have the option of Discontinuing the Rx, Ignoring the Rx or Quitting. Discontinue is the option displayed below.

Example of Non-Billable Notification Screen

```
Is this correct? YES//
DRUG NOT BILLABLE
                    *** TRICARE - NON-BILLABLE ***
   Division: XXXX DIVISION NPI#: XXXXXXXXXX Patient: TRICARE, ONE (XXX-XX-XXXX) Sex: M DOB: JAN 1,19XX(XX)
   Rx/Drug : XXX5339/0 - DOCUSATE NA 100MG CA
   Date/Time: OCT 31, 2010@12:22:10
  Reason : Drug not billable
   This is a non-billable TRICARE prescription.
       Select one of the following:
            D
                      (D) iscontinue - DO NOT FILL PRESCRIPTION
                      (Q) UIT - SEND TO WORKLIST (REQUIRES INTERVENTION)
                      (I) gnore - FILL Rx WITHOUT CLAIM SUBMISSION
            Ι

- The Non-Billable TRICARE prescriptions will appear on the Reject Information screen shown in the example below once the TRICARE Non-Billable claim has been selected from the Pharmacy Third Party Payer Rejects Worklist. The screen will display:
- ECME# field will be blank
- Insurance Information will be blank
- Reject code section will have the reject code eT and status will state "NO CLAIM SUBMITTED"
- Available Actions will be DC Discontinue Rx, VW -View Rx, MP Medication Profile, FIL Fill Rx and IGN Ignore Reject (FIL and IGN will require PSO TRICARE Security key)
- Available Hidden Actions will be COM Add Comments ED Edit Rx and all other standard List Manager hidden actions
- If the action DC is chosen, the system will discontinue the prescription and the prompt "Nature of Order" will default to "SERVICE REJECT"
- The following actions, Resubmit Claim (RES), Change Suspense Date (CSD) and Submit Override Codes (OVR) actions are not available for processing a TRICARE eligible Non-Billable reject. If selected, an error message will appear: "RES not allowed for TRICARE Non-Billable claim", "CSD not allowed for TRICARE Non-Billable claim" or "OVR not allowed for TRICARE Non-Billable claim". The only actions available are to Discontinue, Fill the prescription, View prescription or Medication Profile"

Reject Information Screen - Electronic Signature and TRICARE Justification

• A user must hold the "PSO TRICARE" security key for certain actions on the Third Party Payer Rejects – Worklist and the "Ignore" action on the TRICARE Reject Notification screen. If the user holds the security key "PSO TRICARE", the prompt will display: "You are bypassing claims processing. Do you wish to continue?" If the user enters (No=Default), the user will return to the reject notification screen. If the user selects Yes to continue, the system will mimic the current Ignore action/functionality. The user will be prompted to enter their electronic signature code and asked to enter data into the TRICARE Justification field which is required. The user will be allowed to "^" out of the process. If the user opts to "^" out of the process, they will be taken back to the Reject Information screen prompt.

In the following example a TRICARE patient with Outpatient status submits a prescription for processing and a rejected response is received from the TRICARE payer/PBM. The pharmacist initially sends the prescription to the Third Party Payer Rejects – Worklist then later decides to finish processing the prescription and chooses the FIL action.

Example of Reject Information Screen - Electronic Signature and TRICARE Justification

• The person that resolves TRICARE non-DUR/RTS rejects is dependent upon the type of reject. Dispense As Written (DAW) reject code 22 can be resolved by the pharmacy staff by editing the prescription and entering the appropriate DAW code which results in a claims resubmission. Other insurance related rejects (missing eligibility or cardholder ID number) are resolved by the Outpatient Pharmacy Electronic Claims Coordinator (OPECC). Once the rejection has been resolved, the Reject Information screen under the pharmacy reject worklist shows the status of the prescription as E PAYABLE. At this point the user may select the FIL action that will prompt for label print.

• For rejects that remain in suspense, the user will be allowed to process the rejection as indicated above; however no labels will be printed until the prescription is pulled early or printed from suspense. Upon resolving the reject, the user will be notified of this information. CMOP prescriptions will function in the same manner.

Other Rejects

[PSO REJECTS WORKLIST]

Rejects under the OTHER REJECTS section of the screen contain non-clinical rejects and are resolved in the same manner as DUR/RTS rejects. The comments section denotes whether the reject was transferred automatically as is the case in the example below or "Transferred by OPECC" will denote those rejects where the OPECC manually transferred them to pharmacy for resolution.

The following example shows the user selecting to resolve sequence 16 from the Third Party Payer Rejects - Worklist option shown above. The user selects ED to edit the DAW code for the prescription, then resubmits the claim afterward. Since the claim was payable, both the RTS reject in sequence 13 and the DAW reject in sequence 16 were marked resolved. Also both are removed from the worklist after submission. The user then proceeds to Patient Prescription Processing option to view the ECME logs which show that claim resubmission was payable and that both rejects have been resolved.

MailMan Message for Open/Unresolved Rejects

When prescriptions remain on the Third Party Payer Reject – Worklist over the specified number of days, the system will send a Mailman Message. This message will be sent to the PSO REJECTS BACKGROUND MESSAGE mail group. Those users needing access to this information will need to be added manually to this mail group

The specified number of days referred to above is the number of days an uncommented reject can remain on the reject worklist without being included in the nightly reject worklist alert mail message. The number of days are defined in the EPHARMACY SITE PARAMETERS file (#52.86) in the REJECT WORKLIST DAYS field.

The following are the criteria for generating a Mailman message regarding a rejected claim:

- Prescription is active
- Prescription is unreleased
- Claim is on the Reject Worklist for specified number of days or greater, and
- Claim has no comments added within date range.

Adding a comment to the reject will automatically reset the clock for the alert. The specified number of days will be site configurable and stored in EPHARMACY SITE PARAMETER file (#52.86). The initial patch default setting will be five (5) days; however, the site will be able to reset the parameter between one (1) and thirty (30) to generate the alert message. MailMan message will be sent as a Priority message, and there will be a separate MailMan message for each division. The following is an example of the message:

```
Subj: ePharmacy - OPEN/UNRESOLVED REJECTS LIST for ALBANY ISC [#2680833]
07/25/08@11:52 53 lines
From: OUTPATIENT PHARMACY PACKAGE In 'IN' basket. Page 1 *New*
The prescriptions listed below are third party electronically billable and can
not be filled until the rejection is resolved. No action to resolve the
rejection has taken place within the past 1 days.
Please use the THIRD PARTY PAYER REJECTS WORKLIST option to resolve the
rejection or add a comment to the rejection.
Unresolved rejects will not be sent to CMOP or the local print queue for
filling. They will continue to show on the rejects list until acted upon.

Alerts for Discontinued CMOP Prescription

Discontinued by a Background Process

When a CMOP prescription with a status of Transmitted or Retransmitted is discontinued by a background process to the Outpatient Pharmacy options, e.g. CPRS or Registration V. 5.3 packages, an email will be sent to the PSX EXTERNAL DISPENSE ALERTS mail group. If no recipients are defined in the new mail group, the message will be sent to PSXCMOPMGR key holders stating that a prescription was just discontinued and that the CMOP status for the discontinued prescription was either Transmitted or Retransmitted.

```
Subj: TROY - DC Alert on CMOP Rx 123456789 TRANSMITTED [#90494]
03/03/09@17:37 8 lines
From: POSTMASTER In 'IN' basket. Page 1 *New*

Rx #: 123456789 Fill: 0
Patient: OUTPATIENT, DCONE (6660)
Drug: TAMOXIFEN CITRATE 10MG TABS
Rx Status: DISCONTINUED BY PROVIDER
Processing Status: TRANSMITTED to CMOP on 02/27/09
Provider: OPPROVIDER, PROV

******** Please contact CMOP or take appropriate action ********
Enter message action (in IN basket): Ignore//
```

Discontinued by a Foreground Pharmacy Process

When a CMOP prescription with a status of Transmitted or Retransmitted is discontinued by a foreground Pharmacy process due to a duplicate drug scenario that would trigger the duplicate to be discontinued, then the Processing Status field of the duplicate drug message is highlighted to alert the user.

```
Duplicate Drug in Local Rx:

Rx #: 123456789

Drug: A AND Z OINTMENT

SIG: APPLY 1 TUBE TO AFFECTED AREA TWICE A DAY

QTY: 1

Refills remaining: 5

Provider: OPPROVIDER, PROV

Status: Active

Last filled on: 11/27/09

Processing Status: Transmitted to CMOP on 11/27/09

Days Supply: 5
```

In the above example, the line "Processing Status: Transmitted to CMOP on 11/27/09" is bold.

List One Patient's Archived Rx's [PSO ARCHIVE LIST RX'S]

This option shows the basic patient demographics and the prescription numbers and dates of archiving for archived prescriptions for this patient.

Manual Print of Multi-Rx Forms [PSO LM MULTI-RX PRINT]

This option allows the user to reprint the Multi-Rx Refill Request form on laser label stock without having to reprint the entire prescription labels. The user will receive a system confirmation that this form has been queued to print.

Example: Manually Printing Multi-Rx Forms

```
Select Rx (Prescriptions) Option: MANual Print of Multi-Rx Forms

Enter patient to reprint Multi-Rx refill form for: OPPATIENT2,ONE

Select LABEL DEVICE: LEX2 LEX2$PRT Bay Pines

Multi-Rx form queued to print
```

Reprint an Outpatient Rx Label [PSO RXRPT]

The label reprint function allows a single label or many copies of the same label to be reproduced. When the patient is enrolled in ScripTalk®, a message is displayed to the user indicating this and prompting the user to use the ScripTalk® label for the prescription bottle.

Example: Reprinting an Outpatient Rx Label

```
Select Rx (Prescriptions) Option: REPRINT AN OUTPATIENT RX LABEL

Reprint Prescription Label: 400693 ADHESIVE TAPE WATERPROOF 1IN ROLL
Patient is a ScripTalk patient. Use ScripTalk label for prescription bottle.

Number of Copies?: (1-99): 1// <Enter>
Print adhesive portion of label only? N// <Enter> O

Signature Log Reprint [PSO SIGLOG REPRINT]

This option allows the user to reprint the Signature Log for a prescription. The system will prompt for a prescription number and printer device. The user will receive a system confirmation that this log has been queued to print.

Example: Reprinting a Signature Log

```
Select Rx (Prescriptions) Option: Signature Log Reprint

Reprint Signature Log for Prescription: 100002277A PREDNISONE 20MG S.T.

Select LABEL DEVICE: LEX2 LEX2$PRT Bay Pines

Signature Log Reprint queued
```

View Prescriptions

[PSO VIEW]

View the most complete information available for a specific prescription. The activity log lists the date, reason, prescription reference (Rx Ref), the initiator of the activity, and comments. The label log lists the date, prescription (Rx Ref), the person who printed it, and comments. Prescriptions with a deleted status cannot be viewed.

Chapter 20: Updating a Patient's Record

This chapter describes the option used for updating a patient's record.

Update Patient Record

[PSO PAT]

Use this option to update the patient information currently in the computer. Patient records can also be updated while being viewed by using the *Patient Record Update* screen action. If implementing Other Language Modifications, use either to set a patient's other language preference.

In support of Registration patch DG*5.3*522, the Outpatient Pharmacy software provides for the automatic population of city, state, and county based on entry of a zip code.

Example: Updating a patient record

```
Select Outpatient Pharmacy Manager Option: UPDATE Patient Record
Select Patient: OPPATIENT, ONE 12-4-53 000007890 YES
                                                               SC VETERAN
OPPATIENT, ONE
                                      ID#: 000-00-7890

Chapter 21: Verifying Prescriptions

This chapter describes the option and methods used for verifying prescriptions.

Verification

[PSO VER]

The *Verification* menu is used by pharmacists to verify prescriptions with a non-verified status; obtain a listing of those remaining non-verified prescriptions; or calculate the number of non-verified prescriptions by entering the patient or the clerk.

The following options are available on the *Verification* menu:

- List Non-Verified Scripts
- Non-Verified Counts
- Rx Verification by Clerk

If the verification site parameter is set to yes, new prescriptions entered by a non-pharmacist (i.e., someone who does not hold the PSORPH key) will be put in a non-verified status, entered into the non-verified orders file, and will not be made active (nor will labels be printed) until they are reviewed and verified by a pharmacist. Once new and renewed prescriptions for a patient are verified, all labels for that patient will be printed together. If a patient has refills only, these labels will be printed as they are entered.

A pharmacist may choose to verify all entries made by a particular technician rather than all the prescriptions for an individual patient.

Prescriptions in a non-verified status cannot be canceled, edited, or deleted through the usual options. If a non-verified prescription is autocanceled on admission, it can be reinstated, but it returns to the non-verified status.

When the VERIFICATION outpatient site parameter is set to 'No', a user who does not hold the PSORPH key will not be allowed to finish a pending order.

The *Patient Prescription Processing* [PSO LM BACKDOOR ORDERS] and *Complete Orders from OERR* [PSO LMOE FINISH] options have been modified to incorporate the above functionality.

List Non-Verified Scripts [PSO VRPT]

This option allows the user to obtain a list of all scripts remaining in a status of 'Non-Verified' by either patient or entering clerk.

Example: Non-verified prescriptions (sorted by patient)

Select Outpatient Pharmacy Manager Option: Verification		
Select Verification Option: List Non-Verified Scripts Sort By Patient or Clerk: P// <enter> ATIENT DEVICE: HOME// [Select Print Device]</enter>		
	NON-VERIFIED PRESCRIPTIONS AS OF JUL 16,2007@14:49:54 SORTED BY PATIENT (# indicates Critical Drug Interaction)

Select Verification Option:		

Non-Verified Counts

[PSO NVCNT]

This option allows the user to obtain a count of the number of prescriptions remaining in a status of non-verified.

Example: Total of Non-verified prescriptions

```
Select Verification Option: NON-Verified Counts
DEVICE: HOME// [Select Print Device]
                        NON-VERIFIED PRESCRIPTION COUNTS
                              JUL 16,2007@14:57:34
TOTAL NUMBER OF NON-VERIFIED PRESCRIPTIONS : 12
NUMBER OF PATIENTS WITH ONE OR MORE NON-VERIFIED PRESCRIPTIONS : 9
(NOTE: Total number of patients listed here may not always equal the number at
the bottom, since some patients at the bottom may be counted more than once,
possibly having non-verified Rx's entered on different days.)
                   # of
    Date Non-verified Rx's Different Patients
  07-27-98 1
05-18-99 2
06-22-00 2
                                            1
                                            1
TOTAL
Enter RETURN to continue or '^' to exit:
```

Rx Verification by Clerk [PSO VR]

This option verifies prescriptions in the non-verified status by entering the clerk.

Verifying ePharmacy Orders

Verifying an ePharmacy order is similar to finishing an order. After the user reviews the ePharmacy order and chooses to accept the order, the billing data is sent to ECME, which sends a message back to Outpatient Pharmacy displaying the status of the claim. The ECME section of the Activity Log is also updated.

```

Chapter 22: CPRS Order Checks: How They Work

Introduction

In CPRS, Order Checks occur by evaluating a requested order against existing patient data. Most order checks are processed via the CPRS Expert System. A few are processed within the Pharmacy, Allergy Tracking System, and Order Entry packages. Order Checks are a real-time process that occurs during the ordering session and is driven by responses entered by the ordering provider. Order Check messages are displayed interactively in the ordering session.

Order Checks review existing data and current events to produce a relevant message, which is presented to patient caregivers. Order Checks use the CPRS Expert System (OCX namespace), to define logical expressions for this evaluation and message creation. In addition to the expert system Order Checks have some hard-coded algorithms. For example, the drug-drug interaction order check is made via an entry point in the pharmacy package whereas Renal Functions for Patients 65 and Over is defined as a rule in the CPRS Expert System.

Order Check Data Caching

Data caching was recently added to improve the speed of order checks. Before data caching, order checks could be slow because each order check retrieved data from the other VISTA packages—even if the order checks used the same data. With data caching, the first order check in an ordering session retrieves data from other VISTA packages, uses the data to evaluate whether it should display a warning, and then stores the retrieved data in the ^XTMP("OCXCACHE" global for five minutes. The order checks that occur in the next five minutes can use the cached data, if it is the appropriate data, instead of retrieving data from the other packages. After five minutes, the cached data expires, and order checks must retrieve new data from the VISTA packages.

For example, before data caching was implemented, if an order check took 3 seconds to retrieve data from other VISTA packages, and there were 12 order checks, clinicians might wait 36 seconds to sign orders. With data caching, the first order check might take 3 seconds to retrieve the data, but subsequent order checks could use the cache and might take only .03 seconds each. That would be 3.33 seconds compared to 36 seconds. The numbers in this example are for illustration only and do not reflect real system speed. However, data caching should speed up order checks.

To avoid using all available disk space for storing data from order checks, there are several ways to clear the ^XTMP("OCXCACHE" global. ORMTIME removes data from the global when it runs. The suggested frequency for running ORMTIME is every 30 minutes, but not every site runs it that frequently. Kernel clean up utilities also remove data from the cache when they run, which is usually every 24 hours. If needed, users that have access to the programmer's prompt can manually clear the cache from that prompt by using PURGE^OCXCACHE.

(This page included for two-sided copying.)

Chapter 23: Error Messages

Error Level	Error Message	Reason	Why message is being displayed.
System	No Enhanced Order Checks can be performed.	Vendor Database cannot be reached.	The connectivity to the vendor database has gone down. A MailMan message is sent to the G. PSS ORDER CHECKS mail group when the link goes down and when it comes back up.
System	No Enhanced Order Checks can be performed.	The connection to the vendor database has been disabled.	A user has executed the Enable/Disable Vendor Database Link [PSS ENABLE/DISABLE DB LINK] option and disabled the interface.
System	No Enhanced Order Checks can be performed	Vendor database updates are being processed	The vendor database (custom and standard data) is being updated using the DATUP (Data Update) process.
Drug	Enhanced Order Checks cannot be performed for Local or Local Outpatient Drug: <drug name=""></drug>	Drug not matched to NDF	The local drug being ordered/ or on profile has not been matched to NDF. Matching the drug to a VA Product will eliminate this message.
Drug	Order Checks could not be done for Remote Drug: <drug name="">, please complete a manual check for Drug Interactions and Duplicate Therapy. Remote order indicator</drug>		If this error message is displayed, it means that the VA product that the local or remote drug being ordered/or on the local or remote profile does not have a GCNSEQNO or in rare cases, the GCNSEQNO assigned to the VA Product does not match up with a GCNSEQNO in the vendor database.
Drug	Enhanced Order Checks cannot be performed for Orderable Item: <oi NAME></oi 	No active Dispense Drug found	Highly unlikely that this error would be seen. At the time the order check was being performed the orderable item did not have an active dispense drug associated.
Drug	Enhanced Order Checks cannot be performed for Orderable Item: <oi NAME></oi 	No active, marked for IV Fluid Order Entry IV Additive/Solution found	The orderable item associate with an IV Fluid order did not have an active IV Additive/IV Solution marked for IV fluid order entry use at the time the order check was executed. This is another error the user will probably not see.

Error Information

The text in the error message and reason column will be displayed to the user. The type of error is displayed in column 1.

Two Levels of Error Messages

System

When such an error occurs no drug interaction or duplicate therapy order checks will be performed. Other order checks that do not use the COTS database (FDB) will still be performed such as allergy/ADRs, duplicate drug (for outpatient only) and new CPRS order checks, etc.

Drug

The second error level is for the drug and no drug interaction/duplicate therapy order checks will be performed for a specific drug. When you are processing an order, you may see a drug level error for a drug that is on the profile. This indicates that a drug interaction or duplicate therapy order check will not be performed for the drug in the order you are processing against this profile drug. Profile drug errors will only be shown once per patient session. So if you process several more orders, you will not see the error again. However, if you exit the option and at some later time reselect this patient to process new orders or take action on any existing orders, you will be shown the profile drug error once again.

If a drug level error occurs on the drug in the order you are processing, no profile drug errors will be displayed. No order checks (duplicate therapy or drug interaction) will occur for the processing drug (prospective drug). The only exception to this is when you are processing an IV order with multiple prospective drugs (i.e. multiple additives)

Chapter 24: On-Demand Displaying of FDA Medication Guides

Medication Guides are paper handouts that come with many prescription medicines. These guides address issues that are specific to particular drugs and drug classes, and they contain FDA approved information that can help patients avoid serious adverse events. The FDA requires that medication guides be issued with certain prescribed drugs and biological products when the agency determines that: certain information is necessary to prevent serious adverse effect; patient decision-making should be informed by information about a know serious side effect with a product; or patient adherence to directions for the use of a product are essential to its effectiveness. The VA maintains a web-enabled repository of all approved FDA Medication Guides, both current and archived versions of the documents. Following is the link to this repository:

http://vaww.national.cmop.va.gov/FDAMedGuides/

Displaying a Medication Guide

The system provides users the ability to display individual FDA Medication Guides for a specific prescription when one is available.

Outpatient Pharmacy provides an option under the OTH hidden action within the Patient Prescription Processing [PSO LM BACKDOOR] option, aka 'Backdoor Pharmacy', allowing users to retrieve the Medication Guide associated with a prescription similar to the reprint of the PMI. Users may retrieve an FDA Mediation Guide for a specific prescription by invoking the OTH (Other OP Actions) hidden action and selecting the new action, MG Display FDA Medication Guide.

A Java software component running on the user's PC will then display the FDA Medication Guide Adobe Acrobat document (.pdf) by automatically opening it through the Adobe Acrobat reader via Microsoft Internet Explorer.

Example 1: Displaying an FDA Medication Guide

```
PN Progress Note (OP)
AP Action Profile (OP)
MI Print Medication Instructions
DO Display Orders' Statuses
MG Display FDA Medication Guide

Select Item(s): MG Display FDA Medication Guide

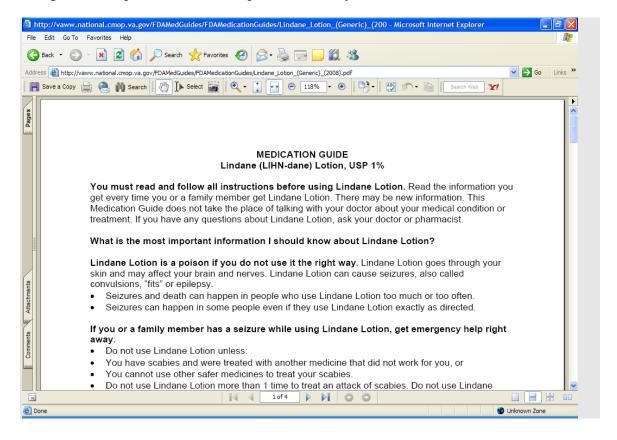

The following URL provides the link to the FDA Medication Guide associated with this medication: Thin Client users; copy/paste the URL below into a browser to access the FDA Medication Guide for this drug:

vaww.national.cmop.va.gov/FDAMedGuides/Lindane_(Generic)_(2008).pdf

Please wait...

Enter RETURN to continue, '?' for HELP, or '^' to exit:
```

The following Internet explorer browser will open automatically:

Example 2: Displaying an FDA Medication Guide for an Rx when the Java Software Component is not installed.

If a user tries to use this option from a computer which does not have the required Java software component installed, the following message will display:

```
Select Item(s): MG Display FDA Medication Guide

The following URL provides the link to the FDA Medication Guide associated with this medication. Thin Client users: copy/paste the URL below into a browser to access the FDA Medication Guide for this drug:

vaww.national.cmop.va.gov/FDAMedGuides/Lindane_(Generic)_(2008).pdf

Please wait...

The system is unable to display FDA Med Guide automatically.

The FDA Medication Guide will not automatically open on Thin Client and some types of encrypted sessions. If you do not believe this is the reason contact your local technical support for assistance.

You can copy/paste the link above into your browser's address bar to retrieve the FDA Medication Guide.

Enter RETURN to continue, '?' for HELP, or '^' to exit: ?
```

When unable to get the FDA Medication Guide to display, review the following suggestion(s) for troubleshooting potential problems:

1) The browser did not open automatically. This may be due to the following: - You might be connected to VistA via Thin Client or an encrypted session that prevents the FDA Med Guide from automatically displaying. Please copy and paste the URL link below into your browser's address bar to retrieve the FDA Medication Guide:

vaww.national.cmop.va.gov/FDAMedGuides/Lindane Lotion (Generic) (2008).pdf

- The computer might not have the required Java software component installed or the software might not be functioning properly. Please, contact technical support for assistance.
- 2) When doing a copy/paste of the link into the browser's address and an HTTP 404 File Not Found error is received. This may be due to the following:
 - A common issue exists when the link is displayed in two lines in the terminal screen. When you copy both lines at the same time and paste it into the browser's address, the second line is ignored by the browser resulting in a 'broken' link. To resolve this issue, copy and paste one line at a time from the terminal screen into the browser's address to make sure the complete link is used.
 - The FDA Medication Guide Server may be down at the moment. Please, wait a few minutes and try again. If the problem persists, contact technical support for assistance.
- 3) The browser opened automatically, however you receive an HTTP 404 File Not Found error. This may be due to the following:
 - The FDA Medication Guide Server may be down at the moment. Please, wait a few minutes and try again. If the problem persists, contact technical support for assistance.

Example 3: Displaying an FDA Medication Guide for a medication that does not have an FDA Medication Guide on file.

If a user tries to use this option for a medication that does not have an FDA Medication Guide on file, the following message will display:

```
Select Item(s): MG Display FDA Medication Guide

There is no FDA Medication Guide associated with this medication.

Enter RETURN to continue, '?' for HELP, or '^' to exit: ?

When unable to get the FDA Medication Guide to display, review the following suggestion(s) for troubleshooting potential problems:

1) If no FDA Medication Guide exists for a product that you believe should have one, confirm that one is required by visiting the FDA website (www.fda.gov). If one is required, log a support ticket to request its addition. Please understand that there may be a delay between the time that a new Medication Guide is posted to the FDA website and when it is
```

made available in VistA through a National Drug File data update patch.

(This page included for two-sided copying.)

Glossary

The following table provides definitions for common acronyms and terms used in this manual.

Acronym/Term	Definition
Action Profile	A list of all active and recently canceled or expired prescriptions for a patient sorted by classification. This profile also includes a signature line for each prescription to allow the physician to cancel or renew it.
Activity Log	A log, by date, of changes made to or actions taken on a prescription. An entry is made in this log each time the prescription is edited, canceled, reinstated after being canceled, or renewed. An entry will be made into this log each time a label is reprinted. A CMOP activity log will contain information related to CMOP dispensing activities.
Allergy/ADR Information	Includes non-verified and verified allergy and/or adverse reaction information as defined in the Adverse Reaction Tracking (ART) package. The allergy data is sorted by type (DRUG, OTHER, FOOD). If no data is found for a category, the heading for that category is not displayed.
AMIS	Automated Management Information System
Answer Sheet	An entry in the DUE ANSWER SHEET file. It contains the questions and answers of a DUE questionnaire. This term is also used to refer to the hard copy representation of a DUE ANSWER SHEET entry.
API	Application Programming Interfaces
APSP	Originally Indian Health Service Pharmacy's name space now owned by the Outpatient Pharmacy software.
Bypass	Take no action on a medication order.
СМОР	Consolidated Mail Outpatient Pharmacy.
CPRS	Computerized Patient Record System. CPRS is an entry point in VistA that allows the user to enter all necessary orders for a patient in different packages (e.g., Outpatient Pharmacy, Inpatient Pharmacy, etc.) from a single entry point.
Critical	Interactions with severe consequences that require some type of action (finding facts, contacting prescribers) to prevent potential serious harm.
DATUP	Data Update (DATUP). Functionality that allows the Pharmacy Enterprise Customization System (PECS) to send out custom and standard commercial-off-the-shelf (COTS) vendor database changes to update the two centralized databases at Austin and Martinsburg.
DEA	Drug Enforcement Agency
DEA Special Handling	The Drug Enforcement Agency special Handling code used for drugs to designate if they are over-the counter, narcotics, bulk compounds, supply items, etc.
DHCP	See VistA.

DIF	Drug Information Framework
Dispense Drug	The Dispense Drug name has the strength attached to it (e.g., Acetaminophen 325 mg). The name alone without a strength attached is the Orderable Item name.
DoD	Department of Defense
Dosage Ordered	After the user has selected the drug during order entry, the dosage ordered prompt is displayed.
Drug/Drug Interaction	The pharmacological or clinical response to the administration of a drug combination different from that anticipated from the known effects of the two agents when given alone.
DUE	Drug Usage Evaluation
ETC	Enhanced Therapeutic Classification
Expiration/Stop	The date on which a prescription is no longer active. Typically, this date is 30 days after the issue date for narcotics, 365 days after the issue date for other medications and 365 days after the issue date for supplies.
FDB	First DataBank
Finish	Term used for completing orders from Order Entry/Results Reporting V. 3.0.
GUI	Acronym for Graphical User Interface.
HDR-Hx	Health Data Repository Historical
HDR-IMS	Health Data Repository- Interim Messaging Solution
Issue Date	The date on which the prescription was written. This date is usually, but not always, the same as the first fill date. This date cannot be later than the first fill date.
HFS	Host File Server.
Health Insurance Portability and Accountability Act of 1996 (HIPAA)	A Federal law that makes a number of changes that have the goal of allowing persons to qualify immediately for comparable health insurance coverage when they change their employment relationships. Title II, Subtitle F, of HIPAA gives HHS the authority to mandate the use of standards for the electronic exchange of health care data; to specify what medical and administrative code sets should be used within those standards; to require the use of national identification systems for health care patients, providers, payers (or plans), and employers (or sponsors); and to specify the types of measures required to protect the security and privacy of personally identifiable health care information. Also known as the Kennedy-Kassebaum Bill, the Kassebaum-Kennedy Bill, K2, or Public Law 104-191.
ЈСАНО	Acronym for Joint Commission on Accreditation of Healthcare Organizations

Label/Profile Monitor	A file for each printer which records, in the order in which they were printed, the last 1000 labels or profiles printed on that printer. This allows a rapid reprint of a series of labels or profiles that were damaged by a printer malfunction or other event.
Local Possible Dosages	Free text dosages that are associated with drugs that do not meet all of the criteria for Possible Dosages.
Medication Instruction File	The MEDICATION INSTRUCTION file is used by Unit Dose and Outpatient Pharmacy. It contains the medication instruction name, expansion and intended use.
Medication Order	A prescription.
Medication Profile	A list of all active or recently canceled or expired prescriptions for a patient sorted either by date, drug, or classification. Unlike the action profile, this profile is for information only and does not provide a signature line for a physician to indicate action to be taken on the prescription.
Medication Routes File	The MEDICATION ROUTES file contains medication route names. The user can enter an abbreviation for each route to be used at the local site. The abbreviation will most likely be the Latin abbreviation for the term.
Med Route	The method in which the prescription is to be administered (e.g., oral, injection).
NCCC	Acronym for National Clozapine Coordinating Center.
Non-Formulary Drugs	The medications, which are defined as commercially available drug products not included in the VA National Formulary.
Non-VA Meds	Term that encompasses any Over-the-Counter (OTC) medications, Herbal supplements, Veterans Health Administration (VHA) prescribed medications but purchased by the patient at an outside pharmacy, and medications prescribed by providers outside VHA. All Non-VA Meds must be documented in patients' medical records.
Order	Request for medication.
Orderable Item	An Orderable Item name has no strength attached to it (e.g., Acetaminophen). The name with a strength attached to it is the Dispense drug name (e.g., Acetaminophen 325mg).
Partial Prescription	A prescription that has been filled for a quantity smaller than requested. A possible reason for a partial fill is that a patient is to return to the clinic in ten days but the prescription calls for a thirty-day supply. Partials do count as workload but do not count against the total number of refills for a prescription.
Payer	In health care, an entity that assumes the risk of paying for medical treatments. This can be an uninsured patient, a self-insured employer, or a health care plan or Health Maintenance Organization (HMO).

Pending Order	A pending order is one that has been entered by a provider through CPRS
	without Pharmacy finishing the order. Once Pharmacy has finished the order, it will become active.
Pharmacy Narrative	OUTPATIENT NARRATIVE field that may be used by pharmacy staff to display information specific to the patient.
Polypharmacy	The administration of many drugs together.
POE	Acronym for Pharmacy Ordering Enhancements (POE) project. Patch PSO*7*46 contains all the related changes for Outpatient Pharmacy.
Possible Dosages	Dosages that have a numeric dosage and numeric dispense units per dose appropriate for administration. For a drug to have possible dosages, it must be a single ingredient product that is matched to the DRUG file. The DRUG file entry must have a numeric strength and the dosage form/unit combination must be such that a numeric strength combined with the unit can be an appropriate dosage selection.
Prescription	This term is now referred to throughout the software as medication orders.
Prescription Status	A prescription can have one of the following statuses.
	Active - A prescription with this status can be filled or refilled. Canceled - This term is now referred to throughout the software as Discontinued. (See Discontinued.) Discontinued - This status is used when a prescription was made inactive either by a new prescription or by the request of a physician. Discontinued (Edit) - Discontinued (Edit) is the status used when a medication order has been edited and causes a new order to be created due to the editing of certain data elements. Deleted - This status is used when a prescription is deleted. Prescriptions are no longer physically deleted from the system, but marked as deleted. Once a prescription is marked deleted no access is allowed other than view. Expired - This status indicates the expiration date has passed.
	*Note: A prescription that was canceled or has expired more recently than the date specified by the cutoff date, typically 120 days in the past, can still be acted upon. Hold - A prescription that was placed on hold due to reasons determined by the pharmacist. Non-verified - There are two types of non-verified statuses. Depending on a site parameter, prescriptions entered by a technician do not become active until a pharmacist reviews them. Until such review, they remain non-verified and cannot be printed, canceled or edited except through the <i>Verification</i> menu. The second non-verified status is given to prescriptions when a drug/drug interaction is encountered during the new order entry or editing of a prescription. Pending - A prescription that has been entered through OERR. Refill - A second or subsequent filling authorized by the provider. Suspended - A prescription that will be filled at some future date.
Progress Notes	A component of Text Integration Utilities (TIU) that can function as part of CPRS.

Provider	The person who authorized an order. Only users identified as providers who are authorized to write medication orders may be selected.
Reprinted Label	Unlike a partial prescription, a reprint does not count as workload.
Questionnaire	An entry in the DUE QUESTIONNAIRE file. This file entry contains the set of questions related to a DUE as well as the drugs being evaluated.
Schedule	The frequency by which the doses are to be administered, such as Q8H, BID, NOW, etc.
Sig	The instructions printed on the label.
Significant	The potential for harm is either rare or generally known so that it is reasonable to expect that all prescribers have taken this information into account.
Speed Actions	See Actions.
Suspense	A prescription may not be able to be filled on the day it was requested. When the prescription is entered, a label is not printed. Rather, the prescription is put in the RX SUSPENSE file to be printed at a later date.
Third (3 rd) Party Claims	Health care insurance claims submitted to an entity for reimbursement of health care bills.
Time In	This is the time that the patient's name was entered in the computer.
Time Out	This is the time that the patient's name was entered on the bingo board monitor.
TIU	Text Integration Utilities; a package for document handling, that includes Consults, Discharge summary, and Progress Notes, and will later add other document types such as surgical pathology reports. TIU components can be accessed for individual patients through the CPRS, or for multiple patients through the TIU interface.
TRICARE	TRICARE is the uniformed service health care program for:
	active duty service members and their families
	retired service members and their families
	members of the National Guard and Reserves and their families
	• survivors, and
	others who are eligible
	There are differences in how prescriptions for TRICARE beneficiaries are processed versus how prescriptions are processed for veterans.
Units per Dose	The number of Units (tablets, capsules, etc.) to be dispensed as a Dose for an order. Fractional numbers will be accepted for medications that can be split.
VistA	Acronym for Veterans Health Information Systems and Technology Architecture, the new name for Decentralized Hospital Computer Program (DHCP).

Wait Time	This is the amount of time it took to fill the prescription. It is the difference
	between Time In and Time Out. For orders with more than one
	prescription, the wait time is the same for each.
