# **Revision History**

| Date       | Version | Description   | Author                            |
|------------|---------|---|-----------------------------------|
| 10/2013    | 3.0     | Manual Updated for FY2014 changes based on the ECX*3.0*144  | Megan Lucas                       |
| 11/2012    | 3.0     | Manual Updated for FY2013 changes based on the ECX*3.0*136  | Megan Lucas                       |
| 10/1/2011  | 3.0     | Manual Updated for FY2012 changes based on the ECX*3.0*132  | Megan Lucas                       |
| 10/15/2010 | 3.0     | Manual updated for FY2011 changes based upon the following Patches: ECX*3.0*127, LR*5.2*403 and SD*5.3*568  | Tavia Leonard                     |
| 9/28/2010  |         | Manual updated with FY2011 changes based upon the following Patches: ECX*3.0*127, LR*5.2*403 and SD*5.3*568 | Tavia Leonard                     |
| 11/2008    |         | Manual updated with FY2009 changes  | Tom Rochford                      |
| 11/2007    |         | Manual updated with FY2008 changes  | Berry Anderson,<br>Corinne Bailey |
| 11/08/2006 |         | Manual updated to include changes due to Patch ECX*3.0*92   | Berry Anderson                    |
| 11/04/2005 |         | Manual updated to include changes due to Patch ECX*3.0*84   | Berry Anderson                    |
| 3/9/2005   |         | Manual update to include Patch ECX*3.0*78.  | Mary Ellen Gray                   |
| 12/17/2004 |         | Manual updated to include changes due to Patch ECX*3.0*71   | Berry Anderson                    |

#### 1 Introduction

#### 1.1 Overview

The Decision Support System (DSS) Extracts Version 3.0 software provides a means of exporting data from selected Veterans Health Information Systems and Technology Architecture (VistA) software modules and transmitting it to a DSS database residing at the Austin Information Technology Center (AITC).

This transfer is accomplished through a set of extract routines, intermediate files, and transmission routines. Data from VistA packages is stored by the extract routines in the intermediate files, where it is temporarily available for local use and auditing. The data is then transmitted to the AITC, where it is formatted and uploaded into commercial software. After the data has been successfully uploaded into the commercial software, the extracts can be deleted.

#### 1.2 Functions of the Software

The DSS Extracts software provides the following functionalities:

- Implements Extracts Processes
- Schedules Extracts
- Verifies Extracts against other VistA Reports Transmits Extracts to Commercial Software
- Verifies Transmission
- Allows Deleting of Extracts
- Allows Purging of Holding Files for IVP and UDP

#### 1.3 Related Manuals

Listed below are the following DSS Extract manuals that are available to view on the following website: http://www.va.gov/vdl/application.asp?appid=35

| File Name       | Manual Name                                 | Description   |
|-----------------|---|---|
| DSS_3_FY2014_DD | DSS Extracts V3.0 Data Definitions<br>Guide | Provides detailed information that defines the data terminology |
| DSS_3_FY2014_UM | DSS Extracts V3.0 Extracts User Manual      | Provides an overview of the functionality and enhancements      |
| DSS_3_FY2014_RN | DSS Extracts V3.0 Extracts Release<br>Notes | Provides an overview of the new functionality and enhancements  |

#### 2 Orientation

This manual is recommended for use as a reference document for technical users (e.g. Automated Data Processing Application Coordinators (ADPACs) or Information Resource Management (IRM)) of the software. You can find information concerning package security in the Security Section of this manual.

# 2.1 User Responses

User responses in the examples presented in this manual are shown in bold type.

#### 3 General Information

#### 3.1 Namespace Information

The namespace assigned to the DSS Extracts software is ECX.

#### 3.2 Background Job Options

There are no routine background jobs that must be run to maintain normal package operation for DSS Extracts.

However, if you choose to perform a DSS data extract, it must be queued as a background task (through TaskManager). You can stop the extract background task while it is running by using the *TaskMan User* [XUTM USER] option. Data in this incomplete extract should then be deleted using the *Delete Extract Files* [ECXDELEF] option. Data in the holding files for the IVP, UDP, and VBECS files can be purged using the *Purge Extract Holding Files* [ECXPURG] option.

Both SAS and Extract Audit reports can be printed to the screen, printed directly to a print device, or queued to a print device. If queued as a background task, you can stop the background task while it is running by using the *TaskMan User* [XUTM USER] option. All other reports can only be printed as queued background jobs and cannot be stopped through the *TaskMan User* [XUTM USER] option.

The following functions must be queued as background tasks.

| Function                         | Menu Option   |
|----------------------------------|---|
| Transmission of extract data     | Transmit Data from Extract Files [ECXTRANS]. (Can be stopped through the TaskMan User [XUTM USER] option) |
| Deleting of extract data         | Delete Extract Files [ECXDELEF]   |
| Purging of extract holding files | Purge Extract Holding Files [ECXPURG]   |

#### 3.3 Resource Requirements

Listed below is a table that provides information on extract files. The bytes per record estimates seen in this table below include the file cross-reference.

| Extract Name                          | Bytes per Record      |
|---------------------------------------|-----------------------|
|                                       | (Estimated Mean Size) |
| ADM Admissions Extract                | 350                   |
| BCM BCMA Extract                      | 450                   |
| CLI Clinic Extract                    | 485                   |
| ECQ QUASAR Extract                    | 450                   |
| ECS Event Capture Extract             | 450                   |
| IVP IV Pharmacy Extract               | 500                   |
| LAB Laboratory Extract                | 250                   |
| LAR Lab Results Extract               | 200                   |
| LBB Blood Bank Extract                | 200                   |
| MOV Transfer and Discharge Extract    | 225                   |
| NUT Nutrition Extract                 | 200                   |
| PRE Prescription Extract              | 425                   |
| PRO Prosthetics Extract               | 400                   |
| RAD Radiology Extract                 | 300                   |
| SUR Surgery Extract                   | 425                   |
| TRT Treating Specialty Change Extract | 275                   |
| UDP Unit Dose Extract                 | 375                   |

# 3.3.1 Special Note on Files (#728.113) & (#728.904) – IVP, UDP Extracts

Once the software is installed, IV orders will accumulate in the IV EXTRACT DATA file (#728.113) and Unit Dose orders will begin to accumulate in the UNIT DOSE EXTRACT DATA file (#728.904). These files are loaded dynamically as Pharmacy orders for intravenous and unit dose medicines are processed. Each entry in these files uses approximately 100 bytes.

Extreme caution must be used in maintenance of IV EXTRACT DATA file (#728.113) and UNIT DOSE EXTRACT DATA file (#728.904). If data in either file is purged, the IVP or UDP monthly extract may be incomplete. It is strongly recommended that, at a minimum, sites maintain all data from the *current fiscal year*.

The holding files for IVP and UDP can be purged. Two functions were created to regenerate IVP and UDP holding file data that has been purged. These functions are located at:

- 1. Extract Manager's Options
- 2. Transmission Management menu
- 3. Recreate Extract Holding Files

**Note**: Holding files can become quite large if appropriate purging is not performed. The option *Purge Extract Holding Files* [ECXPURG] will purge holding files from IVP and UDP by date range.

# 3.3.2 Special Note on Files (#727.81), (#727.809), (# 727.819) – Pharmacy Extracts

The Pharmacy DSS Extract files (#727.81, #727.809, and #727.819) are now being audited when entries are edited with the following menu option Pharmacy Volume Edit [ECX PHA VOL EDIT]. Entries are stored in the AUDIT file (#1.1).

The QUANTITY field will be audited in the PRE, IVP, and UDP extracts. Additionally, the UNIT OF ISSUE field will be audited for the PRE Extract.

#### 3.3.3 Time Estimates for Extracts

Extracts generally require approximately two to four minutes per 1000 records extracted on an Alpha/AXP system, and should be queued to run during a non-peak system usage period.

The following table contains examples of approximate run times for extracts.

| Extract Name                    | Approximate Length of Time   |  |
|---------------------------------|------------------------------|--|
| Admission (ADM)                 | Less than ten minutes        |  |
| Treating Specialty Change (TRT) |                              |  |
| Physical Movement (MOV)         |                              |  |
| Clinic (CLI)                    | 5 hours for 48,000 records   |  |
| Laboratory (LAB)                | 6 hours for 100,000 records  |  |
| Prescription (PRE)              | 3.5 hours for 49,000 records |  |

#### 3.4 Data Transmission

Data is sent to the AITC in VA MailMan mail messages. The first line of each message is a header that identifies the following entities: Site, Extract, Year Month, and SAS version identifier in the following format:

521RAD199710007

| Site | Extract | Year and Month | Version ID |
|------|---------|----------------|------------|
| 521  | RAD     | 199710         | 007        |

As a message is sent, its Internal Entry Number (IEN) is entered in the MESSAGE NUMBER field (#301) of the DSS EXTRACT LOG file (#727). There are options that allow the Extract Manager or designee to monitor this file. As confirmation messages are received from AITC, entries in the MESSAGE NUMBER field (#301) multiple are deleted.

## 4 Implementation and Maintenance

The Maintenance Menu provides a variety of menu options that allow the Extract Manager or designee to:

- Define DSS clinic information
- Define DSS Lab Results Extract information
- Define DSS Inpatient Medications Pharmacy information
- Print a list of feeder keys sorted by feeder system
- Print a list of feeder locations sorted by feeder system
- Define and create DSS Inpatient Census information
- Access DSS Department Management Menu
- Print Lab Results Extract Untranslatable Results Report
- Modify Lab Results Translation Table
- Make CPT Inquiry
- Print SUR Volume Report
- Print LBB Pre-Extract Report
- Enter/Edit Nutrition Division Worksheet
- Enter/Edit Nutrition Product Worksheet
- Edit Pharmacy and Pharmacy Log
- Print UDP/IVP Source Audit Report
- Regenerate UDP/IVP Extract Data
- Export Clinic Review Report for All, Active, Inactive or Unreviewed Clinics
- Export DSS Identifier Non-Conforming Report
- Export Prosthetics Extract Unusual Cost Report
- Export DSS Clinics and Stop Codes Validity Report
- Export DSS LOINC Code Report
- Export Event Capture Extract Audit
- Export Prosthetics Extract Audit
- Export Prosthetics YTD PSAS HCPCS Report
- Export Prosthetics YTD Laboratory Report
- Export Pharmacy Extracts Incomplete Feeder Key Report
- Export Pharmacy Extracts Unusual Reports
- Export PSAS HCPCS Report

Please refer to the DSS Extracts Installation Guide for more information about installing and implementing the software.

#### **5 Routines**

#### 5.1 Routine List

Take the following steps to obtain routines contained in the DSS package:

- 1. Programmer Options menu
- 2. Routine Tools menu
- 3. First Line Routine Print option
- 4. Routine Selector: ECX\*

# 5.2 Callable Routines/Entry Points/Application Programmer Interfaces

The DSS Extracts software has no callable Application Programmer Interfaces (APIs).

#### 5.3 Routines to Map

There are no routines in DSS Extracts that are recommended for mapping.

#### 5.4 External Interfaces

There are no external interfaces used by DSS Extracts.

#### 6 Files

#### 6.1 Global Placement

DSS Extracts uses one global for data storage: ^ECX. If you are installing DSS Extracts for the first time, global protection and placement should be made as appropriate.

#### 6.2 File List

The DSS Extracts software with all patches installed exports the following files. VHA Directive 10-93-142 prohibits local modification of these files. Use the *List File Attributes* option in VA FileMan to print the DDs.

The file descriptions are noted and listed below.

| File<br>Number |     | File Name                         |
|----------------|-----|-----------------------------------|
| 727            |     | DSS EXTRACT LOG                   |
| 727.1          |     | EXTRACT DEFINITIONS               |
| 727.29         |     | DSS LOINC CODES                   |
| 727.3          |     | DSS DIVISION IDENTIFIER           |

# 6.3 Field List

The DSS FY2014 Extract enhancements associated with the release of Patch ECX\*3\*144 includes an array of field additions and modifications.

The field descriptions are noted and listed below.

| Field Name                | Number | File Name                                     | Number     |
|---------------------------|--------|---|------------|
| RACE 1                    | (#65)  | ADMISSIONS EXTRACT                            | (#727.802) |
| CAMP LEJEUNE STATUS       | (#94)  | ADMISSIONS EXTRACT                            | (#727.802) |
| ENCOUNTER CAMP<br>LEJEUNE | (#95)  | ADMISSIONS EXTRACT                            | (#727.802) |
| ENCOUNTER SC              | (#96)  | ADMISSIONS EXTRACT                            | (#727.802) |

# 6.3.1 Templates and File Flow

Take the following steps to obtain information about the templates and map the file flow relationships for DSS Extracts with all patches installed.

| Templates  | File Flow (Relationships Between Files)   |
|--|---|
| <ol> <li>VA FileMan Menu</li> <li>Print File Entries option</li> <li>Output from what File:         <ul> <li>Print Template</li> <li>Sort Template</li> </ul> </li> <li>Sort by: Name</li> <li>Start with name: ECX</li> <li>Go to name: ECXZ</li> <li>Within name, sort by: <ret></ret></li> <li>First print field: Name</li> </ol> | <ol> <li>VA FileMan Menu</li> <li>Data Dictionary Utilities menu</li> <li>Map Pointer Relations</li> <li>Select PACKAGE NAME: DSS</li> <li>Remove FILE: <ret></ret></li> <li>Add FILE: (Enter name or number for files you want to include in the output. This prompt will repeat.)</li> <li>Enter name of file group for optional graph header: DSS EXTRACTS//<ret></ret></li> </ol> |

## 7 Exported Options

#### 7.1 Menu Outline

The DSS Extracts software contains one primary menu option, *Extract Manager's Options* [ECXMGR], which contains the following five submenus. They are fixed, and are not subject to modification, except by the software developers.

- M Maintenance
- P Package Extracts
- S SAS Extract Audit Reports
- E Extract Source Audit Menu
- T Transmission Management

#### 7.2 Menu Diagrams

Take the following steps to obtain information concerning the menus exported with the DSS Extracts software:

- 1. Programmers Options
- 2. Menu Management menu
- 3. Display Menus and Options menu
- 4. Diagram Menus
- 5. Select User or Option Name: ECXMGR

#### 7.3 Standalone Options

All of the DSS Extracts options are designed to stand-alone.

#### 7.4 VA FileMan Access Codes

The following table lists the recommended VA FileMan access codes files for the DSS Extract Software.

| File Name               | File<br>Number | DD<br>Access | RD<br>Access | WR<br>Access | DEL<br>Access | LAYGO<br>Access |
|-------------------------|----------------|--------------|--------------|--------------|---------------|-----------------|
| DSS EXTRACT LOG         | 727            | @            |              | @            | @             | @               |
| EXTRACT DEFINITIONS     | 727.1          | ۸            |              | ۸            | ۸             | ۸               |
| DSS LOINC CODES         | 727.29         | ۸            |              | ۸            | ۸             | ٨               |
| DSS DIVISION IDENTIFIER | 727.3          | ۸            |              | ۸            | ۸             | ۸               |

| File Name                          | File<br>Number | DD<br>Access | RD<br>Access | WR<br>Access | DEL<br>Access | LAYGO<br>Access |
|------------------------------------|----------------|--------------|--------------|--------------|---------------|-----------------|

### 7.5 Security Management

The DSS Extracts software does not impose any additional legal requirements on the user, nor does it relieve the user of any legal requirements.

## 7.6 Security Keys

Take the following steps to obtain information about the security keys contained in the DSS Extracts package:

- 1. VA FileMan Menu
- 2. Print File Entries option
- 3. Output from what File: **SECURITY KEY**
- 4. Sort by: NAME// <**RET**>
- 5. START WITH NAME: FIRST// ECX
- 6. Go to name: last// ECXZ
- 7. Within name, sort by: **<RET>**
- 8. First print field: **NAME**
- 9. Then print field: **DESCRIPTION** (word-processing)
- 10. Then print field: **<RET>**
- 11. Heading (S/C): SECURITY KEY LIST// <RET>
- 12. Start at page: 1// **<RET>**
- 13. Device: **PRINTER NAME**

#### 7.7 Mail Groups and Alerts

DSS Extracts utilize a number of mail groups. The name of each mail group is prefaced with the letters "DSS". There is a mail group for each type of data extract (e.g., DSS-BCM, DSS-NUT, etc.) for the purpose of receiving messages when extracts are run and when data is transmitted to the AITC. DSS also utilizes mail groups DMS, DMV, and DMU for the purpose of receiving confirmation messages from the AITC. DSS Extracts does not utilize alerts.

#### 7.8 Remote Systems

DSS Extracts transmit messages containing extracted data to a specified queue located at the AITC. Data is transmitted via VA MailMan at the site's discretion. Confirmation messages are received from the AITC indicating that the extract messages were successfully transmitted.

#### 7.9 Contingency Planning

Technical users of the software should insure that a local contingency plan is used in the event of application problems in a live environment. The plan should identify the procedure(s) for maintaining the functionality provided by the DSS Extracts software in the event of system outage. Field station Information Security Officers (ISOs) can get assistance from the Regional ISO (RISO).

#### 7.10 Interfacing

There is no special interfacing required for the VistA DSS Extracts software.

#### 7.11 Electronic Signatures

The DSS Extracts software does not use electronic signatures.

# 8 Archiving, Deleting or Purging

#### 8.1 Archiving

DSS Extracts has no archiving capability. There is an option to delete the local extract files after transmission to the commercial software.

#### 8.2 Deleting or Purging

DSS Extracts exports the *Delete Extract Files* [ECXDELEF] option which can be used to delete individual extracts residing in files (#727.802) through (#727.833) or a range of extracts.

Data that resides in the holding files for VBECS, IVP (IV EXTRACT DATA file, (#728.113)) and UDP (UNIT DOSE EXTRACT DATA file, (#728.904)) extracts can be purged using the *Purge Extract Holding* Files [ECXPURG]..

You should exercise extreme caution when purging or deleting data for the following reasons:

- <u>Any</u> existing extract may be deleted (including <u>transmitted</u> and <u>untransmitted</u>) and <u>extracts that did not run to completion due to errors or system problems</u>.
- Choosing a range of extracts or holding files could mean an excessively large number of records to be deleted or purged and it may be very resource intensive. Please be sure to queue this for <u>non-peak hours</u> and limit the number of extracts to be deleted or holding files to be purged in a single queued session.
- Extreme caution must be used in maintenance of IV EXTRACT DATA file (#728.113) and UNIT DOSE EXTRACT DATA file (#728.904). If data in either file is purged, the IVP or UDP monthly extract may be incomplete. It is strongly recommended that, at a minimum, sites maintain all data from the *current fiscal year*.
- Two functions were created to regenerate IVP and UDP holding file data that has been purged. These functions are located at:
  - 1. Extract Manager's Options
  - 2. Transmission Management menu
  - 3. Recreate Extract Holding Files
- You may only delete extracts that are associated with a division assigned to you in the NEW PERSON file (#200).

#### 8.2.1 Recommendations

Purging of any local VistA extract data or VistA source of extract data (i.e., lab data, etc.) is not recommended until your facility has successfully created extracts, transmitted them to the AITC, audited the counts, loaded the data into DSS, <u>and is content with the results</u>.

The IV EXTRACT DATA file (#728.113) and UNIT DOSE EXTRACT DATA file (#728.904) can become quite large if appropriate purging is not performed. The file purge option, *Purge Extract Holding Files* [ECXPURG], will purge the data from these files by date range. It is recommended that records over two fiscal years old be purged from IV EXTRACT DATA file (#728.113) and UNIT DOSE EXTRACT DATA file (#728.904).

VBECS holding files can also be purged. The VBECS holding file cannot be regenerated so extreme care must be used if purging it.

# 9 External Relations

# 9.1 Minimum Software Versions Required

The DSS Extracts package relies on the following external packages based upon the minimum software versions depicted in the table listed below.

| Software Product Name  | Minimum Version Required |
|--|--------------------------|
| Admission Discharge Transfer (ADT)                                 | 5.3                      |
| Bar Code Medication Administration (BCMA)                          | 3.0                      |
| Decision Support System (DSS) Extracts                             | 3.0                      |
| Event Capture  | 2.0                      |
| FileMan  | 22.0                     |
| Health Level Seven (HL7)   | 1.6                      |
| Kernel   | 8.0                      |
| Laboratory   | 5.2                      |
| Lab: Blood Bank  | 5.2                      |
| MailMan  | 8.0                      |
| Mental Health  | 5.01                     |
| Nutrition and Food Service (N&FS)                                  | 5.5                      |
| Order Entry/Results Reporting (OE/RR)                              | 3.0                      |
| Patient Care Encounter (PCE)                                       | 1.0                      |
| Pharmacy: Data Management (PDM)                                    | 1.0                      |
| Pharmacy: Inpatient Medications                                    | 5.0                      |
| Pharmacy: National Drug File (NDF)                                 | 4.0                      |
| Pharmacy: Outpatient Pharmacy                                      | 7.0                      |
| Prosthetics  | 3.0                      |
| Quality: Audiology and Speech Pathology<br>Audit & Review (QUASAR) | 3.0                      |
| Radiology  | 5.0                      |
| Registration   | 5.3                      |
| Scheduling   | 5.3                      |
| Surgery  | 3.0                      |

# 9.2 Database Integration Agreements (DBIAs)

Take the following steps to obtain the DBIAs for DSS Extracts 3.0:

| Custodial Package   | Subscriber Package  |  |  |
|---|---|--|--|
| <ol> <li>FORUM</li> <li>DBA Menu</li> <li>Integration Agreement Menu</li> <li>Custodial Package Menu</li> <li>Active by Custodial Package Option</li> <li>Select Package Name: DSS</li> </ol> | <ol> <li>FORUM</li> <li>DBA Menu</li> <li>Integration Agreement Menu</li> <li>Subscriber Package Menu</li> <li>Print Active Subscriber Package Option</li> <li>Start with subscriber package: DSS</li> <li>Go to Subscriber package: DSS</li> </ol> |  |  |

# 10 Internal Relations

All of the DSS Extracts options have been designed to stand-alone. Each option may be independently invoked.

# 11 Package-Wide Variables

The DSS Extracts software does not contain any package-wide variables that must be defined or required for the package to run.

#### 12 How to Generate Online Documentation

This section describes some of the various methods by which users may secure DSS Technical documentation. On-line technical documentation pertaining to the DSS software, in addition to that is located in the help prompts and on the help screens that are found throughout the DSS package, may be generated through utilization of several KERNEL options. These include, but are not limited to, *XINDEX*, *Menu Management Inquire Option File*, *Print Option File*, and *FileMan List File Attributes*.

Entering question marks at the "Select ... Option:" prompt may also provide users with valuable technical information. For example, a single question mark (?) lists all options, which can be accessed from the current option. Entering two question marks (??) lists all options accessible from the current one, showing the formal name and lock for each. Three question marks (???) displays a brief description for each option in a menu while an option name proceeded by a question mark (?) shows extended help, if available, for that option.

To obtain a listing of the options and further information about other utilities that supply on-line technical information, please consult the VistA Kernel Reference Manual.

#### **12.1 XINDEX**

This option analyzes the structure of a routine(s) to determine in part if the routine(s) adheres to VistA Programming Standards. The XINDEX output may include the following components: compiled list of errors and warnings, routine listing, local variables, global variables, naked globals, label references, and external references. Running XINDEX for a specified set of routines, the user is afforded the opportunity to discover any deviations from VistA Programming Standards which exist in the selected routine(s) and to see how routines interact with one another, that is, which routines call or are called by other routines.

To run XINDEX for the DSS software, specify the following namespaces at the "routine(s)? >" prompt: ECX\*.

DSS initialization routines that reside in the UCI in which XINDEX is being run, compiled template routines, and local routines found within the ECX namespace should be omitted at the "routine(s)?>" prompt. To omit routines from selection, preface the namespace with a minus sign (-) is required.

#### **12.2 Inquire To Option File**

To secure information about DSS options, you must specify the name or namespace of the option(s) desired. This Menu Manager option provides the following information about user-specified option(s):

- Option name
- Menu text
- Option description
- Type of option
- Lock (if any)

#### **12.3 Print Options File**

Use this utility to generate a listing of options from the OPTION file. You can choose to print all of the entries in this file, or specify a single option or range of options. To obtain a list of DSS options, specify the ECX option namespace.

#### 12.4 List File Attributes

Use this FileMan option to generate documentation pertaining to files and file structure. Use the Standard format to obtain the following data dictionary information for a specified file(s):

- File name and description
- Identifiers
- Cross-references
- Files pointed to by the file specified
- Files which point to the file specified
- Input, print and sort templates

Additionally, the following information is supplied for each field in the file:

- Field name and number
- Global location
- Description
- Help prompt
- Cross-reference(s)
- Input transform
- Date last edited
- Notes

Use the Global Map format of this option to generate an output that lists:

- All cross-references for the selected file
- Global location of each field in the file
- Input, print and sort templates
